IDA BIANKA MATUS

IDA BIANKA MATUS

ARCHITECT ✦ 2/3D GRAPHIC ARTIST

I am an architect, but today I mainly deal with artistic, functional and computer graphics. Furthermore, I draw and paint.

Initially, I tied my life to architecture. But then I was already captured by graphics and the capabilities of graphics programs. For many years now, I have been dealing with 2D and 3D advertising graphics. I design furniture and advertising displays for well-known brands. I also gained experience in the press and internet advertising.

After hours, I am fulfilling myself in various fields of art. I design interiors, I draw and paint wallpapers and pictures. DIY is definitely my thing.

My passion for creating wallpapers was born by chance while I was designing an interior for one of my clients. To my surprise, I enjoy searching, recreating and composing floral motifs so much. Each wallpaper tells a story of details. First, I draw each element. Manual drawing is demanding, but pays off. I try different painting techniques and choose the one that best harmonizes with the component. Flora and fauna inspire me. Everywhere, I am seeking motifs - from bold to subtle, from the saturation of colours, through a delicate play of details. Depending on the mood, I compose wallpapers for both modern and stylish interiors.

I have been immersed in art since childhood, it has a profound impact on my aesthetics and perception of the world. My mother Wanda Matus was a designer of artistic ceramics in the world-famous Zakłady Ceramiki in Bolesławiec. At home, we often talked about art, we were surrounded by it, what was and is natural for me.

I am currently collaborating with italian copany Li&Pra (Season 1&2) and Wallcolors from Poland.
