SD-305 · MINERAL

Basalt Terrazzo

A cast mineral composite with white marble, black basalt and rust chips in a charcoal binder, honed by hand.

CODE	SD-305
FAMILY	Mineral
FINISH	Honed and sealed, matt
THICKNESS	12 or 20 mm
FORMATS	2400 × 1200 mm slabs · cut to size
REACTION TO FIRE	Euroclass A2-s1,d0
ACOUSTIC	Reflective surface (not an absorber)
COMPOSITION	Marble and basalt aggregate in a mineral binder
CERTIFICATIONS	62% recycled aggregate · EPD
LEAD TIME	5–6 weeks

Built from offcuts

Almost two thirds of the aggregate comes from stone offcuts collected from fabricators within a day’s drive. Each batch is cast, cured for four weeks and honed until the chips sit flush with the binder.

Where it works

Reception counters, wall cladding at reach height, washroom vanities and stair treads. At 12 mm it is light enough for wall panels on a standard rail system.
