ABOUT US

Melbourne-based scaffolding contractor providing scaffolding solutions since 2013.

MTMI Scaffolding Solutions is a Melbourne-based scaffolding contractor providing professional scaffolding solutions to the construction industry. Operating since 2013, MTMI has built its business around reliable service, quality workmanship, site safety and the ability to support builders and construction teams throughout the project lifecycle. We work with builders, developers, construction companies and subcontractors across Melbourne, providing practical scaffolding solutions for residential, commercial and medium-density construction projects.

Our team understands the importance of safe access, efficient installation and dismantling, project scheduling and maintaining a productive construction site.

Our Commitment

At MTMI Scaffolding Solutions, our objective is simple: provide safe, reliable and efficient scaffolding services that help our clients keep their projects moving.

WHAT WE SUPPORT

Project Types

MTMI Scaffolding Solutions is positioned to support a range of construction projects, including:

Residential Construction

- ✓ Townhouse developments
- ✓ Medium-density residential projects
- ✓ Multi-unit developments
- ✓ New residential construction
- ✓ Renovation and construction projects

Commercial Construction

- ✓ Commercial developments
- ✓ Building projects
- ✓ Construction and refurbishment works
- ✓ Projects requiring temporary access systems

Builder & Developer Projects

We are available to work as a subcontractor for:

- ✓ Builders
- ✓ Construction companies
- ✓ Property developers
- ✓ Principal contractors
- ✓ Commercial contractors
- ✓ Medium-density builders
- ✓ Construction subcontractors

WHAT WE DO

Our Core Services

Scaffolding Erection

MTMI provides professional scaffolding erection services for construction and building projects. Our team works to establish suitable access and working platforms for trades operating on site, with a focus on safe installation, efficient project delivery and coordination with the construction program.

- ✓ General scaffolding erection
- ✓ External building scaffolding
- ✓ Construction access scaffolding
- ✓ Working platforms
- ✓ Access solutions for construction trades
- ✓ Scaffolding for residential and medium-density developments
- ✓ Project-specific scaffolding requirements

Stretcher Towers

MTMI provides stretcher tower scaffolding solutions where specialised access is required for construction projects. Our team can work with builders and site management to provide practical access arrangements suited to the project's requirements.

Scaffolding Dismantling

Once scaffolding is no longer required, MTMI provides efficient dismantling and removal services. We coordinate dismantling with site management to minimise disruption to other trades and maintain an organised construction environment.

- ✓ Planned scaffolding dismantling
- ✓ Progressive dismantling
- ✓ Site coordination
- ✓ Safe removal of scaffolding components
- ✓ Removal and clearing of scaffolding materials

Stair Towers

MTMI provides stair tower solutions to improve safe and practical access between construction levels. Stair towers can assist with worker movement and material access while supporting efficient site operations.

WHY CHOOSE MTMI

Why Choose MTMI Scaffolding Solutions?

Established Since 2013

With operations dating back to 2013, MTMI brings years of experience working within the construction environment.

Reliable Site Support

We understand that scaffolding is often a critical part of a project's construction sequence. Our focus is on delivering services in line with agreed project requirements and schedules.

Safety Focused

Safety is central to our approach. We aim to provide properly planned and professionally installed access solutions while working in coordination with site management and applicable project requirements.

Construction Industry Experience

We understand the practical requirements of construction sites and the importance of coordinating scaffolding works with builders, supervisors and other trades.

Flexible Project Support

Whether the requirement is a residential development, medium-density project or commercial construction site, MTMI can work with the project team to establish an appropriate scaffolding solution.

Professional Service

We aim to build long-term relationships with our clients through dependable communication, quality workmanship and consistent project support.

PROJECT DELIVERY

Our Approach to Project Delivery

MTMI follows a practical project approach:

1

Project Discussion: We discuss the project requirements, construction program, site conditions and access requirements with the builder or project team.

2

Planning & Coordination: Scaffolding requirements are coordinated with the construction schedule and other site activities.

3

Installation: Our team undertakes scaffolding erection in accordance with the agreed project requirements and applicable safety requirements.

4

Site Coordination: We communicate with site management regarding access, changes and project requirements.

5

Alterations & Adjustments: Where required, scaffolding arrangements can be adjusted to suit the changing stages of construction, subject to project requirements.

6

Dismantling: When the scaffolding is no longer required, MTMI coordinates dismantling and removal with the site team.

HOW WE WORK TOGETHER

Working With Builders

MTMI understands that builders need subcontractors who are: Reliable. Responsive. Safety focused. Professional.

We aim to make the scaffolding component of a project straightforward for the builder and site team.

Our team can work with construction managers and site supervisors regarding:

- ✓ Project commencement dates
- ✓ Scaffolding requirements
- ✓ Construction sequencing
- ✓ Site access
- ✓ Program changes
- ✓ Alterations
- ✓ Dismantling requirements
- ✓ Completion dates

We are interested in developing long-term subcontractor relationships rather than simply completing individual jobs.

PREQUALIFICATION & TENDER

Prequalification & Tender Support

MTMI Scaffolding Solutions is available to participate in builder and principal contractor prequalification processes.

We can provide company information and supporting documentation required for tendering and subcontractor onboarding.

Information Available on Request

- ✓ Company profile
- ✓ Capability statement
- ✓ Insurance certificates
- ✓ Licences and competency documentation
- ✓ SWMS
- ✓ WHS documentation
- ✓ Relevant project experience
- ✓ Contact details
- ✓ Pricing / quotation information

OUR STANDARDS

Safety & Compliance

MTMI Scaffolding Solutions recognises that scaffolding is a critical component of construction site safety.

Our approach is centred on:

- ✓ Safe work practices
- ✓ Appropriate planning and coordination
- ✓ Competent personnel
- ✓ Site communication
- ✓ Appropriate access and working platforms
- ✓ Compliance with applicable Victorian construction requirements
- ✓ Maintaining safe and organised work areas
- ✓ Coordination with builders and site supervisors

Compliance Documentation

MTMI can provide relevant company and subcontractor documentation as required by builders and principal contractors, subject to project requirements.

Typical documentation may include:

- ✓ Public liability insurance
 - ✓ Workers' compensation documentation
 - ✓ Relevant licences and competency records
 - ✓ Safe Work Method Statements (SWMS)
 - ✓ Risk assessment documentation
 - ✓ Plant and equipment information
 - ✓ Company details
 - ✓ Relevant training records.
- Documentation can be supplied as part of the builder's subcontractor prequalification process.

SERVICE AREA & PROMISE

Our Service Area

Melbourne & Metropolitan Melbourne

MTMI Scaffolding Solutions provides scaffolding services throughout Melbourne and surrounding metropolitan areas.

We welcome enquiries from builders and construction companies looking for reliable scaffolding subcontractors for upcoming projects.

Our Client Partnership Promise

At MTMI Scaffolding Solutions, we understand that successful construction projects depend on reliable subcontractors.

We aim to provide:

- ✓ **Reliable Service:** We understand the importance of meeting agreed construction schedules.
- ✓ **Clear Communication:** We maintain communication with builders and site teams throughout the project.
- ✓ **Professional Workmanship:** We take pride in delivering quality scaffolding services.
- ✓ **Safety-Focused Operations:** We prioritise safe work practices and appropriate site coordination.
- ✓ **Long-Term Relationships:** We are interested in building ongoing relationships with builders and construction companies.

OUR APPROACH

Quality Assurance

MTMI is committed to delivering scaffolding services that meet the requirements of each project.

Our quality approach includes:

- ✓ Understanding project requirements before commencing work
- ✓ Coordinating with site management
- ✓ Using suitable scaffolding equipment
- ✓ Maintaining professional installation practices
- ✓ Responding to site requirements
- ✓ Communicating changes with the project team
- ✓ Supporting an efficient construction sequence
- ✓ Our goal is to provide scaffolding that allows other trades to work safely and efficiently.
