GLOBAL TELECOM NETWORKS

Take device management **off your IT team's hands.**

GTN Secure™ is our fully managed mobile device management service. One dedicated GTN team sets up, secures and supports every phone, tablet and laptop your business runs on.

HOW IT WORKS

A team that runs it for you, from day one.

01

We set it up

Devices configured, enrolled and secured before they arrive.

02

We keep it managed

Updates and security checks handled every day.

03

We support your team

A dedicated device lead fixes problems remotely.

WHAT IT DELIVERS

Core business outcomes.

Data protected
Lost devices locked or wiped remotely.

Ready from day one
New starters get working phones.

Less IT workload
Setup and fixes handled by GTN.

Audit-ready
Security reports when you need them.

No site visits
Problems fixed remotely.

One team
Devices and lines managed together.

CASE STUDY · RETAIL

How Blue Diamond brought its store devices back under control.

Retail | Multi-site stores | Shared devices

THE CHALLENGE

Shared store devices had different settings, out-of-date till software was breaking daily sales reporting, and handsets went missing with no way to track them.

WHAT GTN DID

Put every device on the same settings, automated updates and switched on GPS tracking and sound alerts.

100%	Reporting accuracy restored across every store
8	Missing handsets recovered straight away
0	Hours lost fixing apps or resetting devices
