ABOUT MENTORS

ISHANBIR NARULA

“ Trading the markets for 9+ years now! I specialize majorly in scalping & day-trading with core focus on Price action, risk management & ICT concepts. I've my own devised strategies based on advanced technicals which vary & work instrument to instrument.

It took me a while to manage my own mindset & to understand risk management which is why I understand exactly how everyone thinks & I've very well changed every student's perception! I've also been an early age investor in Indian equities & cryptocurrencies and encourage everyone to do the same.

My aim is to make my students financially independent & dependable so that they do not have to work a 9-5!

ABOUT MENTORS

VANSHIKA RASTOGI

“ Trading in the markets since 5+ years, I am deeply passionate about trading, and dedicated my career into mastering it. My specialization in 3 crucial areas price action, risk management and psychology which are the essential for successful trading. My mantra is to treat trading like a business. This approach prevents excessive emotional highs from profits and demoralizing lows from losses. My goal is to guide all my students towards achieving financial freedom through informed trading decisions.
