## WELCOME NOTE FROM OUR MANAGING DIRECTOR

As the founder and director of REC LTD, I am passionate about delivering successful projects to our revered clients. Satisfying our clients' expectations whilst remaining faithful to our working principles has been and remains the vital focus for our success.

Our key strength remains the excellent relationship we have with our clients. Our driving force lies in our core team of dedicated professionals whose experience in Building Services spans for decades, have played a part in the delivery of various major successful projects (Refer to Project gallery)

I am certain that our Group has a brilliant future with fresh and pioneering ideas from our engineers and partners, together with comprehensive knowledge and experience of our staff and personnel. I have strong belief in our forthcoming sustainable energy systems and solutions leading us in the future of sustainable Energy and Power 'generation'.

KEVIN APPAVOU  
Managing Director

Incorporated as R.E.C Limited in the year 1999, our group of professionals in the Mechanical, Electrical, Plumbing and Data Transmission Services sector, being a multidisciplinary subcontracting company, has executed some of the most prominent landmark building projects in Mauritius.

### **Our Vision ...**

is to be amongst the leaders in providing the most sustainable, economic and environmentally friendly engineering solutions to construction projects in Mauritius and in developing African countries

### **Our Mission ...**

is to continuously work in close relationships with all our stakeholders to deliver our products and services to the best of our abilities.

### **Our team ...**

focus has always remained true to our axiom: "Reliability, Flexibility and Engineered Quality Service." We have a team consisting of a wide array of professionals dedicated to the seamless execution of projects.

Our engineering and project management personnel are fully trained and experienced in the on - time delivery of client solutions and together with the support of our entire project team.

Our site management and execution involves experienced technicians with ability to follow the pace during the construction phases.

# Commercial Division

**REC Limited** offers a wide range of engineering solutions for full execution of your projects.

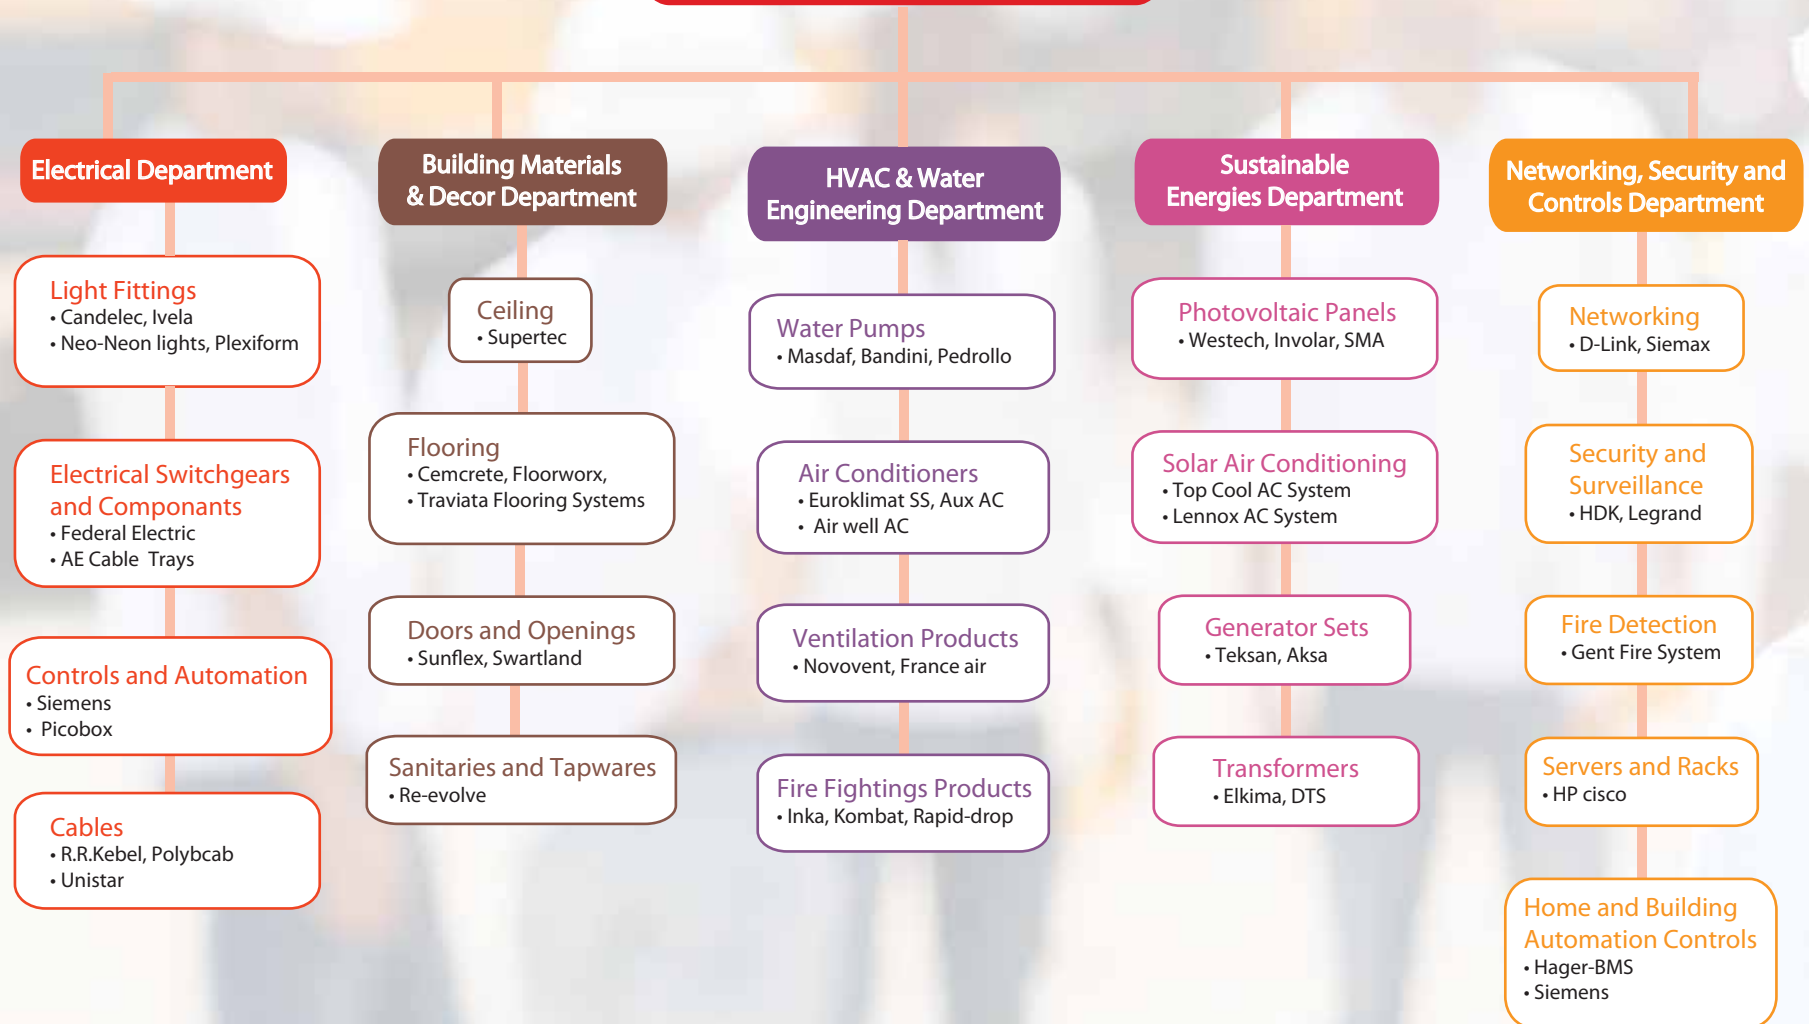

We have associated ourselves with many international brands and have access to a large pool of manufacturers and distributors worldwide. We are continuously working with a team of local and international sourcing specialist and qualified engineers in view of providing the best quality and more economical products for your projects.

Most of our products are guaranteed for minimum of 3 years with 1 full year of free maintenance. Both sales and aftersales services teams will ensure that your products are well suited to your requirements and serviced as per standards.

## COMMERCIAL DIVISION

- ↔ Electrical Department
- ↔ Building Materials & Decor Department
- ↔ HVAC & Water Engineering Department
- ↔ Sustainable Energies Department
- ↔ Networking, Security & Controls Department

## Commercial Division

# Contracting Division

## Contracting

### Electrical Department

Our Electrical Department designs, supplies, installs and services the following range of Solutions :

- LV, MV & HV Electrical Installation
- 22 KV Switchgears, Transformers & Generators Installations
- Latest technology Fire - Detection Systems.

### Security & IT Network Department

- Data, telephony & fibre-optic, installations
- Centralised audio, video, television Systems
- Installation of Automation and Control Systems using latest technology to save energy for residential, commercial and industrial use.

### HVAC, Water Engineering & Fire Fighting Department

Our HVAC and Water department designs, supplies, installs and services the following range of Solutions :

- Air-Conditioning: individual air-conditioning split unit
- MRV & VRV split; Chiller-water & air-chilled systems
- Ventilation and extraction systems
- Full plumbing and fire-fighting installations
- Irrigation and Rain-Harvesting systems.

# Division

## Green Power and Infrastructure Department

Our Green Power and Infrastructure team designs, supplies, installs and services the following range of Solutions :

- Photovoltaic Solutions ranging from 5KW to 1MW for commercial and industrial usage
- Street LED lights and dimming systems for urban projects
- Installation of UPS, Generator Sets, Transformer Sets and Power Regulators. High Capacity Switchboard for industrial applications and Power Stations.

## Maintenance and Facilities Department

Our Maintenance and Facilities team designs, supplies, installs, and services the following range of Solutions:

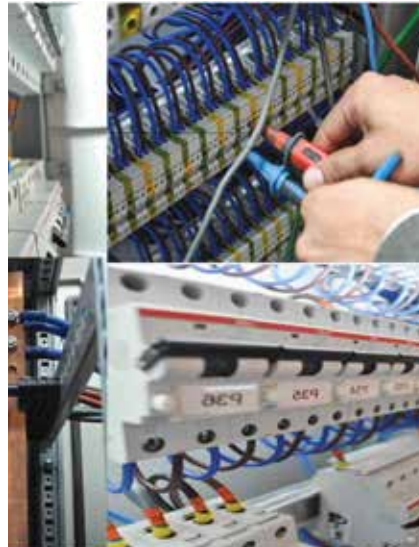

- Full Maintenance for all Electrical and Mechanical systems installed.
- 24 Hours 'Call out' and Emergency Troubleshooting services for IT server rooms and other critical equipment
- Refurbishment Works for upgrading existing installations at client premises
- Technical follow-up and reporting of Building Services Reports and technical advice

## Fit-out and Building Department

Our Fit-Out and Building team designs, supplies, installs and services the following range of Solutions :

- Technical Rooms with standards ' Ex Server Rooms, Raise Flooring and Generator Rooms and Electrical Rooms'
- Turnkey Interior Solutions from design to implementation of all Fit-out Works
- Doors and Openings; Flooring and Ceiling Works in all composite materials
- Refurbishment Works and upgrading of existing buildings
- Civil & Metal Works related to Infrastructure Building

## COMMERCIAL STRUCTURE FOR EACH DEPARTMENT

**Electrical Department**  
**HVAC and Water Engineering Department**  
**Sustainable Energies Department**  
**Networking, Security & Controls Department**  
**Building Materials & Decor Department**

### MANAGEMENT AND ADMINISTRATION

Departmental Managers, Administrative secretaries and Finance Executives

### SALES /TECHNICAL CONSULTANTS & BRAND REPRESENTATIVES

Sales and Technico commercial engineers for each brands and Technical Field Consultants

### PROCUREMENT SPECIALISTS AND SOURCING EXPERTS

Procurement and Sourcing Specialist and Technical Engineer with expertise in sourcing for Equipment and Materials and Logistics Officer

### AFTER SALES ENGINEERS AND TRAINED TECHNICIANS

Support Engineer and Technician for Site Verification and Aftersales Technicians for maintenance of your equipment installed

## CONTRACTING STRUCTURE FOR EACH DEPARTMENT

**Electrical Department**  
**Security & IT Network Department**  
**Fit-Out & Building Department**  
**Green Power & Infrastructure Department**  
**Maintenance and Facilities Management Department**

### MANAGEMENT AND ADMINISTRATION

Departmental Managers, Administrative secretaries and Finance Executives

### PROJECT / CONTRACT MANAGERS

Project and Program Managers, Contract Executive and secretaries and Technical Consultants and Foreign Partners for Specialized Projects.

### DESIGN AND PROJECT ENGINEERS AND CAD ENGINEERS AND QS

Design & CAD Engineers & Technicians, Project Engineers & Estimators, Site Cost Controllers and Quantity Surveyors

### SITE MANAGERS AND SITE SUPERVISORS AND TECHNICIANS

Site Managers, Site Coordinators, Site Supervisors, Site Technicians, Site Foreman and Operators

### FACILITIES ENGINEERS AND MAINTENANCE TECHNICIANS

Maintenance Engineers, After Sales Technicians, Maintenance Technicians, Facilities Technicians

## TRAINING AND CONTINUOUS DEVELOPMENT

We at REC Limited are committed to providing excellent service to our clients and maintain strong relationships with our partners. Our staff are fully conversant with new techniques and technicalities of proposed equipment and products. Our Company

constantly reviews our training program to adapt to new challenges in the market place. We are engaged in recruiting local engineers through employment of young graduate's program and ongoing continuous up-skilling programs with our partners.

## GREEN INITIATIVES

We at REC Limited strongly believe that protecting nature and its natural resources will make our planet a greener space and hence contribute to a healthier, more sustainable growth of our societies.

Our projects are designed using preferably naturally available resources. With the assistance of our MEP team, we make use of LED Lights where needed whilst encouraging natural lighting and use of all energy efficient equipment. Rain Harvesting and grey water storage are also encouraged for industrial use. We opt for recycled materials with low carbon footprint for use as far as possible.

Preference is constantly given to suppliers and partners who undertake Green initiatives and bring about Green Products as part of our Green Sourcing Initiative.

Training on energy saving and development of new energy sources are offered freely to our stakeholders and clients by our trained specialised engineered students.

## CSR-SOCIAL ENGAGEMENT

Since our inception, we have been actively involved in participating in various social and religious benevolent activities.

REC Limited has continuously been approached for their contribution in assisting in several project renovations and new constructions for many religious institutions including Grand Bassin

REC Limited believes in the concept of giving back to our local societies to create a brighter future for all. We hope that our small contribute, be it in any form, can make a difference to all who benefit from it and we pledge to give a little more, the more we grow.
