

VAKIO™ Pod.

Next generation factory-finished,
100% waterproof bathroom pod.

The **VAKIO Pod** is the world's best engineered bathroom.

Factory-Finished Interiors

The Pods arrive on-site pre-fitted with tiles, fixtures, and MEP systems. The pods are customized to your project.

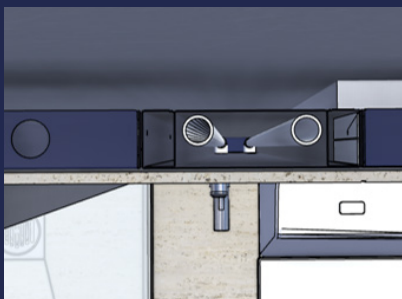

100% Leak-Proof

The Pods are waterproofed with special adhesives and textiles. All pipes run inside this waterproofing. **If a pipe bursts, no damage is done to the building or bathroom.**

4 Hour Installation

The Pods are lifted by crane into place, connected to the buildings MEP services, and apartment-facing walls are covered with with gypsum board.

Simple Maintenance

Service hatches ensure that tiles or concrete never have to be broken to reach plumbing or electrical systems. **A few hours and basic hand tools are all that's needed to service a VAKIO Pod.**

Quality in Every Pod

VAKIO Pods are made at **Vakio Jindal Build's** factory in **Alwar, India**. Each Pod is built to leading Finnish quality & engineering standards using a 16-step process never before seen in Indian construction products.

Compatible with all construction systems

MIVAN & In-Situ Cast

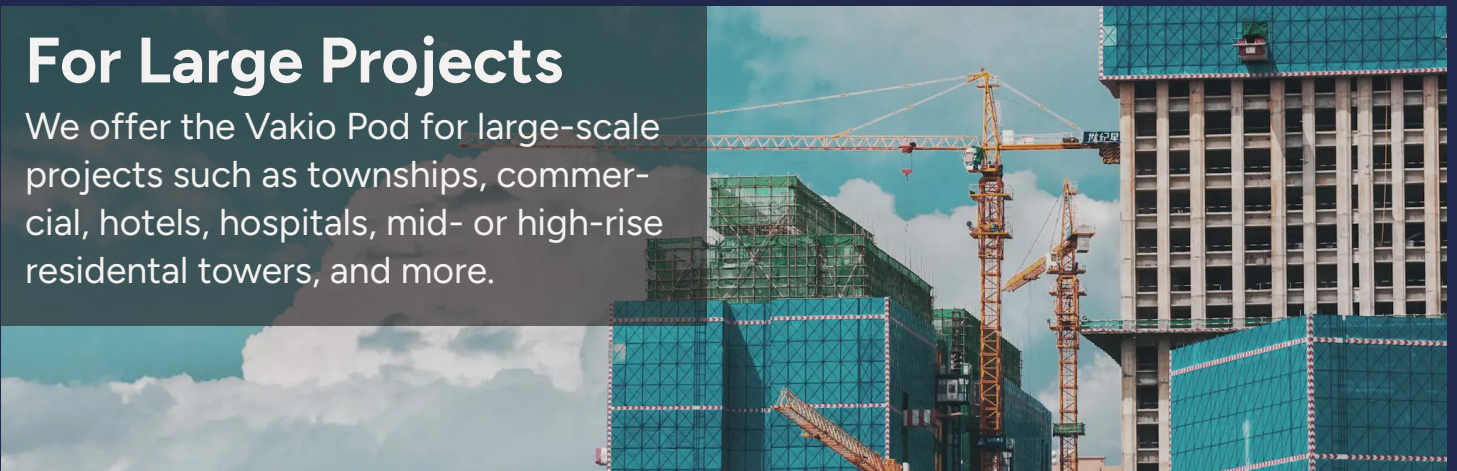

Precast Frame

Steel Frame

For Large Projects

We offer the Vakio Pod for large-scale projects such as townships, commercial, hotels, hospitals, mid- or high-rise residential towers, and more.

"Best of Finnish Technology with Jindal Scale"

Vakio Jindal Build is a joint venture between Finland's Vakio Global and India's Jindal Steel, manufacturing Vakio's cutting-edge prefabricated construction products in India.

"Vakio" is a Finnish term meaning "Standard" or "Constant." The name represents Vakio's promise of replacing the unpredictability of traditional on-site craftwork with the certainty of prefabricated construction.

Vakio Jindal Build helps its clients take full advantage of precast and prefab technologies. The impacts are groundbreaking: project timelines are reduced by up to 30%, material usage and costs are reduced by up to 15%, and nearly all construction quality issues and rework are removed.

Interested? Send us your project drawings, and we will conduct a feasibility study.
