About Us

Allflex Packaging is a proud manufacturer of packaging materials to a very diverse market. We Flexo Print and laminate substrates like polyesters, LDPE and polypropylene together to give the packaging different strengths, protective properties and stability.

We are proud of our Level 1 contributor BEE and ISO 22000 accreditation. We offer our workforce medical aid with gap cover without any exclusions unless the worker prefers to be excluded. Our Pension package is compulsory.

Why choose us

Our customers choose Allflex Packaging cc as their major supplier because of our flexibility. The hierarchy of decision maker small as the directors are directly involved with sales, production and technical. Our lead times are short and flexible and our quality is of the highest level. We boast a very technical laboratory to ensure the quality specifications are met.

Our Services

Printing

Flexographic printing up to 8 colours on substrates such as Polyester, Foils, BOPP, LD& LLDPE, etc., for various applications, Using polymer plates, Rapid drying solvent & water based inks we can print most designs in CMYK and different other software options to get the best results

Lamination

Solventless and solvent-based lamination services produced to international standards, ensuring odour-free packaging with no risk of solvent contamination. Ideal for snack food, confectionery, and other foiled products requiring high barrier protection.

Pouching

We offer different type pouches eg, Doy Packs, K-seal, Stand-up pouches, spine seal and 3-side seal. We can also make bags with spouts for the liquid market such as wine-bags. We custom make the sizes, shape & barrier as per the customers requirements.

Slitting

High-speed tension-controlled slitting with precise edge control, capable of producing slit widths from 25mm to 1300mm at speeds of up to 500m/min. Suitable for beverage packaging, metallised BOPP foil for snack foods, and printed BOPP and polyester FFS films for confectionery and biscuit packaging & various other applications.

Extruder

Monolayer extrusion using LDPE and LLDPE materials for the rapid production of high-quality general-purpose films. With Exxon Mobil's innovative polymers we can offer different types of mono film eg' heat resistance, clarity, added strengths & colour etc.

Material Supply

We supply materials to the form, fill & seal and Bag & Pouch making industries with various thickness ranging from 12 – 600 micron We stock raw materials such as Metalized Polyester & BOPP, Nylons polycoated paper etc.

Delivery

We at allflex Packaging offer our clients a cost effective, reliable & quick daily delivery to areas around cape town. We arrange transportation to distant areas at a negotiated cost.

Manufacturing Capabilities

Allflex operates with a modern and continuously expanding production facility equipped with advanced flexographic printing presses, laminators, slitters, extrusion systems, and pouch-making machines.

- Multi-layer film lamination
- Custom pouch production with high sealing accuracy
- Film extrusion using LDPE and LLDPE materials
- High-speed flexographic printing
- Precision tension-controlled slitting up to 500m/min

With a strong technical team and in-house quality control laboratory, Allflex ensures every product meets strict performance and safety standards before delivery.
