MEMORABLE MOMENTS

Beauty and excitement are all around us almost everywhere we go,
but we have to slow down and look around to be able to see them.

Tom Blatt -

MEMORABLE MOMENTS

This book is dedicated to Ann who shared with me most of the moments captured in these pictures, and who, after over thirty years, still can smile at me in the morning when we have coffee together.

INTRODUCTION

This volume is my second photo collection appearing in a book format. The first one was a pictorial autobiography, appropriately entitled "My First Eighty Years." It describes various stages of my life from early childhood, through the high-school and college years, immigration, graduate school, professional career, and retirement. While it introduces my family, friends, girlfriends, wives, children, colleagues, clients and customers, by definition, I was the central character in the book.

This volume is a collection of photographs which are not about me, but about certain moments in life when the outside world screamed out to me: "This is an unusual event (or place or face), please take a picture right now, so you always will be able to remember this moment."

I used three criteria to select a picture for this book. First was the "story" which had to be interesting and meaningful to me. The second criterion was the composition of the picture, i.e., how well it tells the story. Finally, the third consideration was the photographic quality of the picture, although in some instances it was compromised, when the story was important but the quality of the available photo representing the event was less than desirable; i.e., this volume is not presented as a collection of artistic photos, rather as a collection of interesting experiences.

Like the first book, this one is prepared primarily for my own enjoyment; however, again I intend to share it with members of my immediate family and also with some dear friends.
