

Your project deserves it.

WIWA ELAN M-Series

WWW.WIWA.COM

Electrifying, robust, flexible, groundbreaking

You have a project that demands precision, mobility and reliability at the same time? That's where the new, electrically powered WIWA ELAN M comes into play.

The compact high-performance device is optimally suited for smaller construction sites and painting companies, but also for industrial coatings, and comes with unbeatable flexibility and a robust design.

The electric motor is brushless and has high torque and a very long service life. Thanks to the particularly large material passages and valves, even the application of higher-viscosity materials is no problem.

The **WIWA ELAN M** has an electronic pressure control system that regulates the motor speed and ensures a constant spraying pressure. This makes airless spraying possible even in low pressure ranges and reduces overspray.

No plastic, low maintenance, the usual high WIWA quality.

Electrical performance that inspires!

Materials

- Fire protection materials
- Filling compounds
- Sealants
- Dispersions
- Paints and varnishes

Areas of application

Civil engineering

Fire protection

Building protection

Insulation

Steel Construction

General Industry

Marine Industry

User friendly control

Practical storage box

Technical data	M40	M65
Output per cycle (cm³)	40	65
Max. output (l/min/gal)	8 / 2,1	11 / 2,9
Max. operating pressure (bar/psi)	250 / 3626	250 / 3626
Voltage (V)	230 V, 1p+N, 50/60 Hz	400 V, 3p, 50/60 Hz
Power (kW)	2,2	4,0
Suction	DAS	DAS
Equipment	F	F
Weight (kg/lbs)	72,5 / 160	75 / 165
Order No. (RS)	0671628	0671629

i RS = rust and acid resistant F = cart DAS = direct suction
All models are equipped with a high-pressure filter and a pressure gauge as standard.

- Simple operation
- Durable piston design
- Environmentally conscious and energy efficient
