## Shredder-granulator Combo / GCV Series

## Shredder-granulator Combo GCV Series

Shrerdder-granulator Combo GCV series machine is a set of shredding and granulating integrated processing equipment, widely used in a variety of plastic materials. The upper space of the equipment is set as the shredding area, which adopts the structure of closely arranged small-blade- rotor-shaft, and is equipped with the forced feeding mechanism of the space is provided with a crushing area, and the structure of the rotor shaft and the feeding mode can be determined according to different materials, characteristics and output of the crushed objects. The shredded and crushed materials do not need any conveying equipments. The machine has more compact structure, using less footprint, which has an outstanding cost performance.

## **Applications**

plastic rubber lumps / plates / scrap / frames / pipes, PET bottles, etc

Shreddino Scre

Crushing Screen

Shredding Universal Fixed Rotor Knives
