

What to include in a quote request

Information that lets a supplier respond with a complete proposal.

Product and quantity

Model or family, quantity, and whether spares are required.

Duty or service data

For pumps: flow, head, fluid, temperature, NPSH available. For valves: size, pressure class, fluid and temperature.

Site and standards

Location, ambient conditions, electrical supply, applicable standards and documentation requirements.

Delivery

Required delivery date, Incoterms and commissioning needs.

Prepared for the Pressora demonstration template.
