1 BALLGAME

Where prediction markets meets lottery

BALLGAME.COM

BALLGAME is the world's first free-to-play sports lottery, bringing together real-time sports prediction markets, a token-based in-game rewards system, and a provably fair on-chain lottery in a single product.

The platform lets sports fans test their instincts, compete, and win real rewards with no deposits. They make simple YES/NO picks, earn Coins for correct predictions, convert them into Tickets, and enter weekly lottery draws.

By combining sports fandom, social gameplay, BUZZ markets inspired by global trends, and Web3-level transparency, BALLGAME is defining a new category at the intersection of sports entertainment, prediction games, and lotteries.

5 SSG

Smarter Widgets for Smarter Betting

SSG Modules are **sports widgets that display data in a user-friendly manner**. We created **in-play widgets** for soccer and **pre-play widgets** for basketball, American football, hockey, and baseball. Additionally, we developed numerous **widgets for horse racing**, such as odds comparison and live race audio broadcasting.

All these features were available on various platforms and **could be integrated into any website**. We also built an entire library of React components that can be utilized in other betting products.
