

## **Carbon Reduction Plan – Lucane Pharma**

Prepared in accordance with PPN 006

**Publication date:** 01/12/2025

**Reporting period:** 01/02/2024 – 31/01/2025

### **1. Supplier Details**

Supplier name: Lucane Pharma (trade name of Eurocept International B.V.), operating under Eurocept Pharmaceuticals Holding.

Reporting period: 01/02/2024 – 31/01/2025

### **2. Commitment to Achieving Net Zero**

Lucane Pharma formally commits to achieving Net Zero greenhouse gas emissions by 2050, in alignment with UK government and EU sustainability objectives.

### **3. Baseline Emissions Footprint**

The Lucane Pharma UK operation is a small part of Eurocept Pharmaceuticals Holding, the umbrella organization located and registered in the Netherlands and operating internationally. Lucane Pharma does not own or lease any UK facilities or fleet. All UK employees work from home. Therefore, the Scope 1 and 2 emissions are not applicable (N/A) under the TOTAL (tCO<sub>2</sub>e).

- Scope 1 emissions: 0 tCO<sub>2</sub>e
- Scope 2 emissions: 0 tCO<sub>2</sub>e
- Employees (UK FTE): 1.5

### **4. Current Emissions (Reporting Period)**

The intensity ratio(s) as well as the business metric(s) are detailed below. The intensity ratio is calculated based on total emissions (location based).

AN

| Category                                   | Reporting Year Emissions (tCO <sub>2</sub> e)<br>1/2/2024 – 31/1/2025 | Baseline Emissions (tCO <sub>2</sub> e)<br>01/02/2023 - 31/01/2024 | Notes                                                                                                                                            |
|--------------------------------------------|-----------------------------------------------------------------------|--------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| Upstream transportation and distribution   | 1.67                                                                  | 0.34                                                               | <i>Transportation and distribution impacts previously reported under downstream have been reclassified as upstream in this year's reporting.</i> |
| Waste generated in operations              | N/A                                                                   | N/A                                                                | <i>N/A since there are no operations controlled or owned by Lucane</i>                                                                           |
| Business travel                            | 2.20                                                                  | 5.33                                                               | <i>Impacted by long term leave, switch to electric vehicle according to company policy and less international travelling.</i>                    |
| Employee commuting                         | 0.46                                                                  | 0.51                                                               | <i>Emissions associated with hours worked from home</i>                                                                                          |
| Downstream transportation and distribution | 0.004                                                                 | 0.08                                                               |                                                                                                                                                  |
| <b>Total year emission</b>                 | <b>4.33</b>                                                           | <b>6.26</b>                                                        |                                                                                                                                                  |

Total reporting year emissions: 4.33 tCO<sub>2</sub>e

Total baseline emissions: 6.26 tCO<sub>2</sub>e

*Emission calculations performed by Amber® (Cardiff) – Certified Corporation.*

## 5. Carbon Intensity Metrics

| Business Metric         | Reporting Year          | Baseline Year           | Comments                   |
|-------------------------|-------------------------|-------------------------|----------------------------|
|                         | 01/02/2024 - 31/01/2025 | 01/02/2023 - 31/01/2024 |                            |
| Employees (FTE)         | 1.5                     | 1.5                     |                            |
| Product Shipped (Tonne) | 4.12                    | 0.52                    | New product launched in UK |

Intensity ratios:

| Carbon Emissions per Business Metric           | Reporting Year          | Baseline Year           |
|------------------------------------------------|-------------------------|-------------------------|
|                                                | 01/02/2024 – 31/01/2025 | 01/02/2023 - 31/01/2024 |
| Emission per Employee (tCO <sub>2</sub> e/FTE) | 2.89                    | 4.16                    |
| Emission per Tonne (tCO <sub>2</sub> e/Tonne)  | 1.05                    | 12.06                   |

## 6. Emissions Reduction Targets

- Net Zero by 2050, with a 20% reduction to be achieved by 2029.
- 20% emissions reduction by 2029 (target: 5tCO<sub>2</sub>e)

*Note: This year's business travel emissions show a slight distortion, primarily impacted by change to electric car, long term leave and decrease of international traveling.*

## 7. Carbon Reduction Projects & Sustainability Actions

*Summary: Recycling initiatives, ERA processes, solar panels, EV fleet focus, and sustainability criteria for new collaborations.*

Lucane Pharma is dedicated to expand its sustainability measures continuous in the UK, such as:

AN

- Encourage business traveling by train and reduce a number of short haul flights where possible.
- Decrease the fuel emissions through encouraging the use of electric or hybrid vehicles.

Future company-wide (*Eurocept International B.V. / Lucane Pharma's headquarter in Ankeveen, The Netherlands*) carbon footprint reduction initiatives, include, but not limited by the following areas:

- Continue to assess current operations and develop solutions to reduce carbon emissions both within the organisation and by working with external partners.
- Continue to demonstrate strong "tone at the top" on sustainability — the Board and Pharma Leadership Team (PLT) of Eurocept Pharmaceuticals Holding consistently lead by example, actively embodying sustainability principles and actions. Their commitment to Net Zero emissions is reflected in visible, ongoing efforts, including a continued reduction in electricity consumption and other impactful measures..
- Introduce a more sustainable way of traveling, consistently. Where possible, business travel will take place using trains instead of air travel. If multiple individuals have to go to the same external appointment, carpooling will be further encouraged, to contribute to the reduction of the emissions.
- Optimize the company's waste management: assess Eurocept Pharmaceuticals Holding's "waste partner", implement projects to lower the amount of waste and increase re-utilization of waste/ plastics.
- Where feasible, utilize/ select European contract manufacturing organizations (CMOs) to produce the medicinal products in Europe.
- Continue to utilize Eurocept Pharmaceuticals Holding's local production facility in the Netherlands to minimize waste (driven by minimalization of transportation, better usage of secondary packaging materials etc.).

## 8. Implemented Carbon Reduction Projects

*Summary: examples include transport partnership improvements, EU-based manufacturing, Packaging optimization, heat pump installations, encouraging rail travel, reducing short-haul flights, EV/hybrid promotion, logistics partner selection for CO<sub>2</sub> efficiency, employee awareness programmes, waste optimization, and improved packaging strategies.*

- Decrease the fuel emissions through encouraging the use of electric or hybrid vehicles. Company's car lease policy is updated, to further transition to electric and hybrid cars (for company car lease-eligible employees) and encourage the use of bikes and e-bikes (for employees that live inside of a radius of 15 km of the office/ warehouse). Stimulate all other employees (not eligible for a company car lease) to follow the same principles. This policy resulted in a switch to an electric car for the employee in the UK.

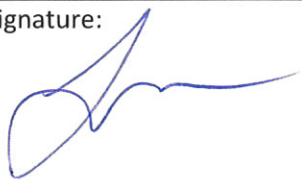

*Ad*

- Optimize the company's waste management: assess Eurocept Pharmaceuticals Holding's "waste partner" and implement. Eurocept Pharmaceutical Holding has installed an air-conditioning heat pump system (heat pump and adiabatic cooling system) in the warehouse in Hilversum. This further optimizes climate conditions for medicine storage and reduces CO2 emissions (through gas-free heating).
- Implement business traveling by train and reduce a number of short haul flights where possible.
- Our transport partner, VTS, is actively pursuing sustainability objectives with a strong focus on CO<sub>2</sub> reduction and fleet modernization, including electrification and a predominantly Euro-6 compliant fleet.
- Reduce the use of electricity combined with introducing of the solar panels (150) on the roof area, and in line with local rules and regulations.

## 9. Declaration and Sign-Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated reporting standards. Emissions follow the GHG Protocol Corporate Standard and Scope 3 Standard. Scope 1 and 2 were reported per SECR requirements. This CRP has been reviewed and approved by the Board of Directors of Lucane Pharma, part of Eurocept Pharmaceuticals Holding B.V.

**Signed on behalf of the Supplier:**
