EXPERIENCE

Oxy — UX Designer | Phoenix, AZ | Aug 2023 – Present

Clients: Seros Wealth Partners, Morrison Nordmann, Big Money Retirement, Compass Rose, GoDocs, Camp Catanese, Kicbac, Basata, Apromore, The Indianapolis Foundation, OneArizona, CALA Alliance, Empower Project

- Lead designer across client engagements, owning projects from research and information architecture through brand direction and high-fidelity design, with several sites shipped to production.
- Build and maintain design systems — component libraries, design tokens, and documentation — so patterns stay consistent and hand off cleanly to engineering.
- Run competitive and comparative research to frame the problem before design begins, turning findings into user flows, sitemaps, and testable prototypes.
- Present work directly to clients, incorporate feedback in an agile cycle, and support developers through handoff with annotations and walkthrough recordings.
- Apply AI-assisted workflows — prompt-driven prototyping and agent tooling — to explore more directions early and shorten the path to reviewable design.

Oxy — UX Design Intern | Phoenix, AZ | May 2023 – Aug 2023

- Delivered an end-to-end design project supporting a Series A raise — competitive research, branding, moodboards, user flows, wireframes, and high-fidelity prototypes — reaching a projected 70% of the potential events market.

Hack For LA — UX Design Co-Lead (volunteer) | Los Angeles, CA | Aug 2022 – Present

- Audit and maintain the design system for Expunge Assist, a tool helping people clear their criminal records, and build mobile wireframes and flows.
- Manage a design team of four, coordinating with research, content, engineering, and product on task flow and handoff in GitHub.

GameOVA — UX Designer (designathon) | Remote | Oct 2022

- Prototyped a social platform with a cooperation score to discourage toxic behavior in gaming communities.
- Won Best Overall among 38 teams; raised task success rate 66.7% through user testing.

Savviest — UX Designer (contractor) | Remote | Mar 2022 – Apr 2022

- Audited and redesigned the resume and experience flows for an AI job-search platform, improving information architecture and first-time clarity through usability testing.

EDUCATION

Carnegie Mellon University | Pittsburgh, PA

M.S. and B.S. in Mechanical Engineering • Minor in Design, CMU School of Design

Springboard | UX/UI Design Certification, 700+ hours • 2022

SKILLS AND SOFTWARE

Design: Product Design, UX/UI Design, Design Systems, Brand and Visual Design, Information Architecture, Wireframing, Prototyping

Research: User Research, Research Synthesis, Usability Testing, Heuristic Analysis, Competitive and Comparative Analysis, Accessibility

Tools: Figma, FigJam, Framer, Adobe Creative Suite, Miro, Maze, Asana, Notion, Slack

AI: AI-assisted design workflows, prompt engineering, MCP and agent tooling

Languages: English (Native), Mandarin (Fluent)
