geyser gecko

HOMEOWNER GUIDE

Cut Your Geyser Bill by 50–90%

Heating water is the single biggest electricity cost in most South African homes. Here's how the Geyser Gecko brings that cost down, without replacing your geyser.

A Typical 4-Person Household

Before	After Geyser Gecko	Saved per year
R1,200 / month	R180 / month	R12,240

Illustrative example based on average South African household usage at R4.50/kWh. Your actual savings depend on household size, geyser size, and location.

Why It's Safe and Simple

Works with your existing geyser	No new geyser, no replacement tank. The Gecko retrofits onto what you already have.
No plumbing work	Purely electrical installation. Your pipes and tank stay exactly as they are.
SANS XA compliant	Every installer is certified, and every install meets South African safety standards.
Never run out of hot water	Automatic grid backup means solar tops you up — it never leaves you stranded.

Common Questions

Do I need a new geyser? No — the Gecko retrofits onto your existing electrical geyser.

How long does installation take? 3–5 hours with a certified installer.

What happens on a cloudy day? The Gecko blends in grid power automatically — you never run out of hot water.
