Experience

Product Designer - ESW Dublin, Ireland (Remote - Limerick)

Aug 2019 - Present (5 yrs 8 months)

After finishing my degree I joined ESW as a junior designer and have since been promoted to a mid-level role. Over my nearly 6 years with the company I have worked across many diverse scrum teams creating user interfaces and conducting research but also working directly with our clients and sales team.

I have run discovery workshops and conducted walkthroughs of our user flows and experiences with our clients to ensure they have a solution they are happy with and that will keep their users coming back.

Day-to-day, I work alongside the rest of our Product Design team, collaborating on internal projects, performing design QA, contributing to our design system and I have taken up some admin responsibilities within the team.

UX Design Intern - SAP Dublin, Ireland

May 2017 - Jan 2018 (9 months)

As part of my Bachelor's Degree I worked at SAP in Citywest Dublin as a UX Intern for a period of 9 months. This involved working in a large, international team on a main product along with various side projects. Some of my contributions included user interface design, conducting user interviews, research and coding.

Freelance Designer & Photographer

Oct 2017 - Aug 2019 (2 yrs)

During and after my degree I took on freelance jobs in design creating posters, branding, logos etc for businesses in the Clare/Limerick area. I also took on independent photography jobs in my free time, including headshots and gigs.
