BARE METAL MEETS CLOUD

Google Cloud Is GameFabric's Preferred Cloud Partner

All-In-One Cloud

Offloaded Cloud Management
Predictable Billing
Built on GKE & Agones

Effortless Global Scale

Ultra Low-Latency
Elastic Infrastructure
Handle Any Player Spike

Automatic Scaling

GAME SERVERS

FOR

EVERY NEED

FOR ANY GAME TYPE

Session-Based & Long-Lived

From shooters to survival
and everything in between.

EVOLVING GAME WORLDS

Local Persistence

Persistent data
Local disk behavior
Seamless migrations
Endless play

LIVE STATE MANAGEMENT

Snapshot Persistence

Point-in-time saves
Runtime capture
No downtime
Fast state restoration

CLOUD-NATIVE ARCHITECTURE

LINUX CONTAINERIZATION

SIDECAR CONTAINERS

AGONES

KUBERNETES

UNBREAKABLE

GAME SERVER PROTECTION

STEELSHIELD™

Purpose-Built DDoS Protection for Gaming

One-of-a-kind DDoS protection for **UDP & TCP** game network protocols. SteelShield protects some of gaming's most popular titles worldwide.

Your Players Will Never Know You're Under Attack

Direct Network Stack Integration

Patented, custom defensive procedure uniquely tailored for UDP & TCP game traffic

Proof-of-Identity

Only verified traffic reaches your server. *No* malicious traffic makes it through

Instant Mitigation

Competitors react, SteelShield works instantly

Reputation Guard

Protect your brand, prevent churn, and avoid financial losses
