

How to Pair with Trak Receiver

Important:

Before pairing, make sure the PushTrust button has not been pressed for at least 60 seconds.

- 1 Power on the Trak Receiver while holding the onboard button.
- 2 The LED will blink green when pairing mode is active. Release the button.
- 3 Wait 10 seconds while the receiver scans for nearby Trak Smart Fuel Tag.
- 4 Press the PushTrust button on the Trak Smart Fuel Tag.
- 5 The LED will turn solid green when pairing is completed successfully.
