

**CAN YOUR
PALLETIZING
DELIVER UNDER
PRESSURE?**

ROBOTIC PALLETIZING WITHOUT COMPROMISE

PROBLEM: Multiple SKUs and lines slow palletizing.

OUR SOLUTION: High-speed systems handle multiple SKUs simultaneously, keeping production efficient.

PROBLEM: Keeping up with fast production is labor intensive.

OUR SOLUTION: Fully automated systems deliver precision and speed to meet your output demands.

PROBLEM: Difficulty stacking display cases or irregular products.

OUR SOLUTION: Nelson Integrated specializes in display cases, bulk bags, and difficult-to-pick products

COULD YOUR PALLETIZING PROCESS BE MORE EFFICIENT IN A **WASHDOWN AREA?**

Separating palletizing from washdown zones can cause delays and increase handling risks. Nelson Integrated offers seamless automated palletizing integration into washdown environments.

ELIMINATE DOUBLE HANDLING

Automated palletizing in washdown zones minimizes touchpoints.

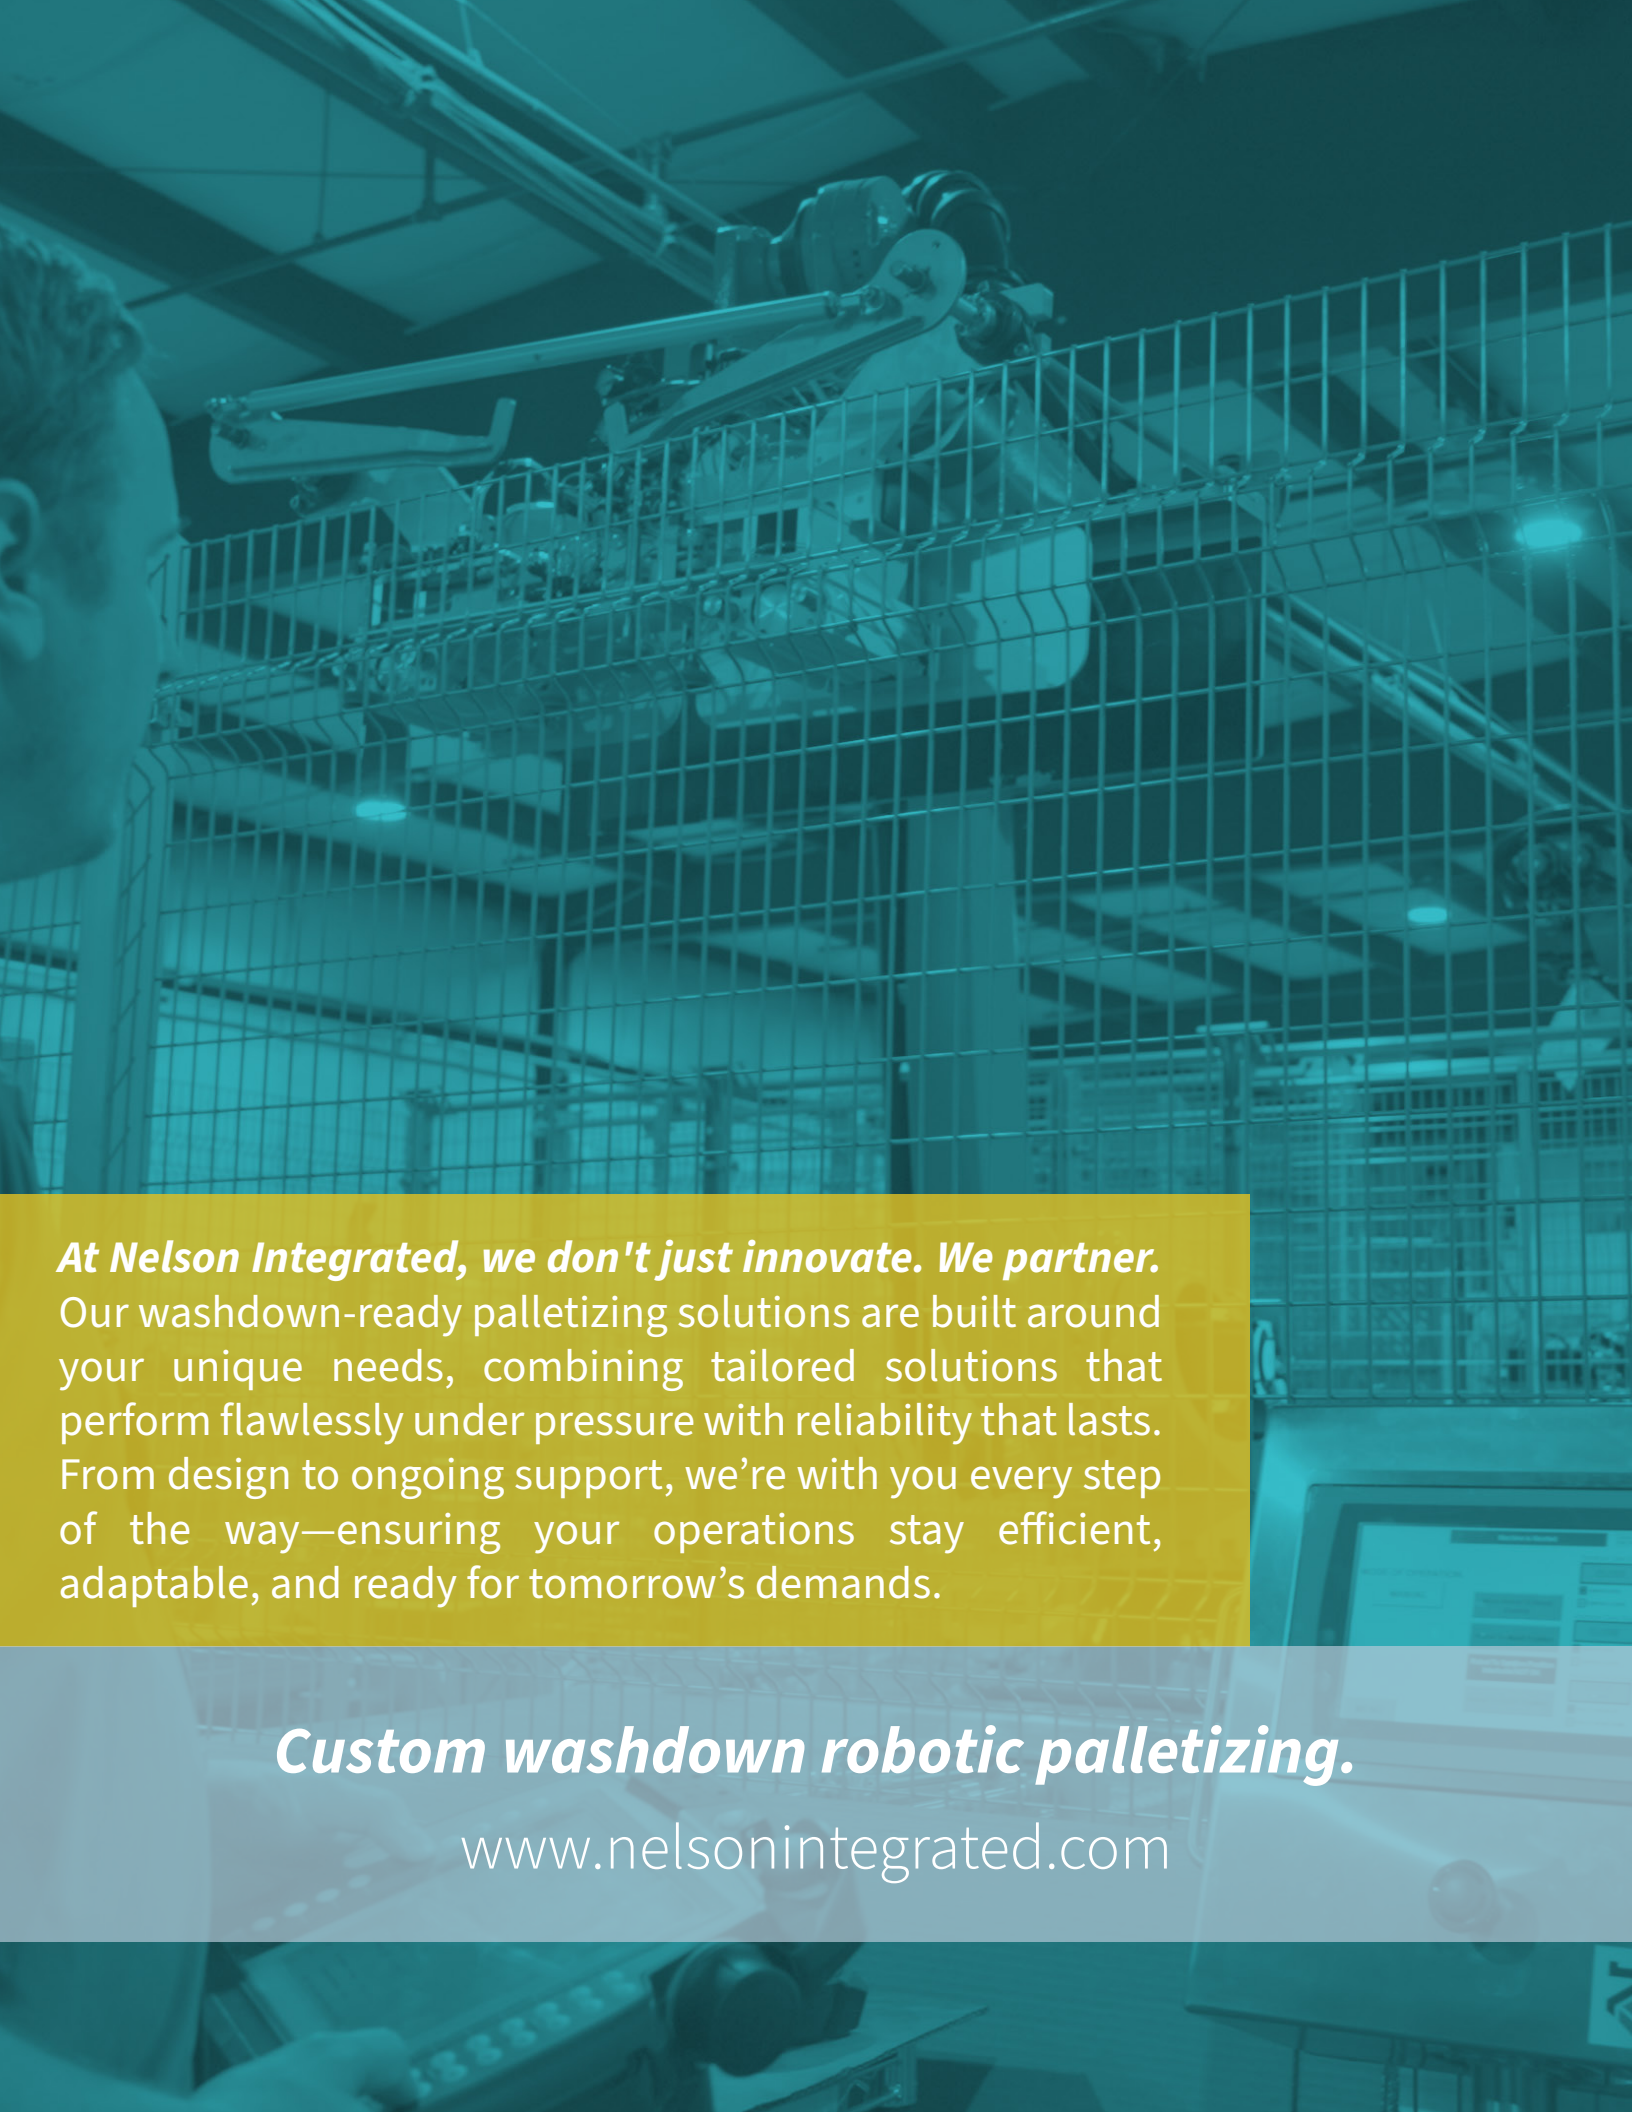

ENGINEERED FOR WASHDOWN

Stainless steel construction and IP69K-rated components stand up to rigorous cleaning.

REDUCE CLEANING TIME

Washdown-ready automation speeds up sanitation, keeping production on schedule.

At Nelson Integrated, we don't just innovate. We partner.

Our washdown-ready palletizing solutions are built around your unique needs, combining tailored solutions that perform flawlessly under pressure with reliability that lasts. From design to ongoing support, we're with you every step of the way—ensuring your operations stay efficient, adaptable, and ready for tomorrow's demands.

Custom washdown robotic palletizing.
