

SOAPIE Progress Note

The comprehensive nursing format. Adds Intervention and Evaluation to SOAP, so the note closes the loop on what you did and whether it worked.

Patient / MRN	
Date & time of entry	Date _____ · time _____ : _____ · late entry? Y / N
Unit / room · shift	Unit _____ · room _____ · shift _____

S Subjective

What the patient reports, in their words where useful

O Objective

Vitals · assessment findings · measurable data

Vitals	T _____ · HR _____ · RR _____ · BP _____ · SpO2 _____ · pain _____ / 10
Assessment findings	
Labs / monitoring	

A Assessment

Nursing assessment or problem, not a medical diagnosis

SOAPIE Progress Note

Continued. The plan, what you actually did, whether it worked, and the attestation that closes the note.

P Plan

Planned nursing actions and goals

I Intervention

What you actually did, with times

E Evaluation

Did it work · patient response · next step

6 Escalation

If the response was inadequate

Provider notified

Name _____ · time _____ : _____ · orders received Y / N

7 Attestation

Signature

Nurse signature _____ · name and credentials _____ · date and time signed _____ · co-signature if required _____

Before you sign. Date, time, and patient identifier on every entry. Chart what you observed and what you did, not conclusions you cannot support. A **late entry** carries the current date and time, is labelled as a late entry, and is signed. To correct an error, draw a **single line** through it so it stays readable, then date and initial the correction. Never erase, overwrite, or obscure an original entry. Sign with your name and credentials per your facility and state policy.

A template still means you write the note. Sully's AI Scribe captures the session and writes it into your EHR, the AI Coder submits the coded claim, and the AI Receptionist books the follow-up, on one integration across Epic, Cerner, Meditech, and Athenahealth.
