

INSPECTION TABLES LINE

Catalog of Inspection Tables

Heavy-duty frames for preparing, cutting and inspecting pieces — from incoming flow to the sewing line.

WHO WE ARE

Over 41 years building the industry's workstation.

Estamac manufactures its own steel frames and tops, with in-house engineering from start to finish — no middlemen, no outsourced quality.

In-house manufacturing

Steel frames and tops produced in-house, from design to finish.

For dealers and apparel makers

Solutions for sewing machine dealers, apparel makers and industrial companies.

Productivity and ergonomics

Frames designed for the operator's daily work and the pace of production.

Consistency and durability

Consistent quality batch after batch, built to last on the production line.

CATEGORY

Inspection Tables

Carbon steel frames for the workstations before and after sewing — preparing pieces and cutting fabric and materials.

RECOMMENDED FOR

Apparel makers and dealers that need support stations to prepare pieces before sewing or to cut and handle fabric and materials.

BENEFITS

Carbon steel frame, professional finish and resistance to continuous use — reducing rework and keeping production moving.

The right workstation before and after sewing.

Which table is yours

LM Preparation Table

Sits between cutting and sewing — a surface to sort, check, mark and organize fabric pieces before the line.

Cutting Table

Heavy-duty truss frame for cutting, inspecting and handling fabric and materials, standard or with a lower shelf.

Each product page shows dimensions, available configurations and a QR code for the full technical drawing online.

LM Preparation Table

Organizing pieces before the sewing line

A key piece in the apparel production flow: it sits between cutting and sewing, giving a surface to sort, check, mark and organize fabric pieces. Good preparation reduces rework and keeps production moving.

26.8–34.6 in

ADJUSTABLE HEIGHT
