

Gautam Sujith

UI / UX Designer · Design Systems · Data Visualisation · Interactive Interfaces
(+353) 089 201 3259 · gautams.design@gmail.com · Dublin, Ireland

PROFILE

Product designer with 3+ years of experience translating complex, data-heavy systems into clear, intuitive interfaces — across mobile, web, and real-time operational tools. Skilled at owning end-to-end design: from user research and information architecture through to polished UI and scalable design systems. Particularly adept at reducing cognitive load in analytics-driven interfaces, a skill directly applicable to live-operations tooling. Currently completing an MSc in Interaction & Experience Design at University of Limerick (graduating 2026), with a strong portfolio of shipped products and cross-functional collaboration with engineering teams.

EXPERIENCE

UX / Product Designer

Aug 2023 – Jul 2025

Value at Void / Udon · Kochi, India

- Led end-to-end design across 18 client projects — 5 managed independently from discovery through delivery — spanning research, IA, wireframing, and high-fidelity UI.
- Designed a custom 3D data visualisation system for real-time performance tracking across multiple outdoor venues, balancing information density with legibility — directly comparable to Demonware's live-ops dashboards.
- Simplified complex logistics and operational data for a 3PL company into a coherent UI, combining 2D/3D visual storytelling with functional UX — demonstrating ability to translate engineering-heavy requirements into usable interfaces.
- Redesigned a major acquisition company's digital ecosystem: a flagship site and 30 subsidiary micro-sites, establishing a unified design system with consistent components, accessibility standards, and brand language.
- Set creative direction across multiple projects, aligning visual language with product strategy; contributed to hiring by reviewing portfolios and interviewing design candidates.

Product Design Intern

Oct 2022 – Apr 2023

Spoke Design Labs · Kochi, India

- Delivered end-to-end design for SimplifySaaS — UX research, wireframing, and high-fidelity UI — shipping a product used by real clients.
- Conducted UX audits using Hotjar and Google Analytics, translating behavioural data into targeted design improvements; directly informed A/B testing decisions.
- Redesigned three websites, leading each from competitive analysis and user personas through to sitemaps, user flows, and final UI.
- Produced detailed case studies and 3D design assets — demonstrating strong documentation and communication skills essential for cross-team design work.

Design Intern

Sep 2021 – Dec 2021

Trustgrid.AI · Kochi, India

- Wireframed and built high-fidelity designs for the TrustGrid mobile app, from initial concepts through to production-ready screens.
- Researched dashboard and mobile UI kits to establish design direction; produced brand assets including logo redesigns and marketing collateral.

SKILLS & TOOLS

Design Tools

Figma, Adobe XD, Framer — primary tools for UI, prototyping, and design systems

3D & Motion

Blender, Cinema 4D, Spline 3D, Keyshot, D5, TouchDesigner

UX Methods

User research & interviews, usability testing, UX audits, A/B testing, competitor analysis, journey mapping, IA, wireframing

Data Visualisation	Custom dashboard design, real-time data display, 3D data systems, Hotjar, Google Analytics, SEMrush
Design Systems	Component libraries, responsive design, accessibility standards, brand identity, consistent visual language
Front-End	HTML, CSS (working knowledge) — comfortable collaborating with engineers and reviewing implementation fidelity
Workflow	Agile, Trello, Hive, cross-functional collaboration with product & engineering teams
AI & Emerging	AI-assisted prototyping tools, Spline 3D for interactive web experiences

EDUCATION

Masters in Interaction & Experience Design <i>University of Limerick, Ireland</i>	2025 – 2026 (current)
Bachelor of Design <i>PES University, Bangalore</i>	2018 – 2022
Foundations of UX Design <i>Google / Coursera</i>	Sep 2022
Fundamentals of Digital Marketing <i>Google Digital Garage</i>	Jul 2021
