

In the ED, the note is the encounter.

Your note has to communicate your medical decision-making to the next clinician, capture quality measures, and hold up to case management and revenue cycle review.

Sayvant was built by emergency medicine physicians to:

Complete your note during the case

Sayvant follows you from initial assessment to order interpretation and medical decision-making, so your notes are drafted when you're ready to dispo: HPIs, PEs, and MDMs that clearly explain your reasoning, with robust differentials and medical-necessity for admissions.

Catch what matters in the moment

As the case unfolds, Sayvant validates diagnoses and decision-making against clinical evidence and guideline definitions (ACEP, BMJ) to flag gaps such as missing timestamps, interpretations, and risk scores, while the patient is still in the room.

Reflect the complexity of every encounter

Sayvant ensures your note is documented in alignment with reimbursement criteria to support appropriate charge capture: CPT capture for E/M, critical care, ACP, and procedures, with real-time admission advisory to validate medical necessity.

RESULTS

Sayvant reduces clinician cognitive load and compliance risk while decreasing waiting room and turnaround times for patients.

▲3.7%

Professional-fee charges per encounter

▼9.5%

Time to provider (TTP)

▼4.1%

Turnaround time to admission (TAT-A)

▼1.8%

Turnaround time to discharge (TAT-D)

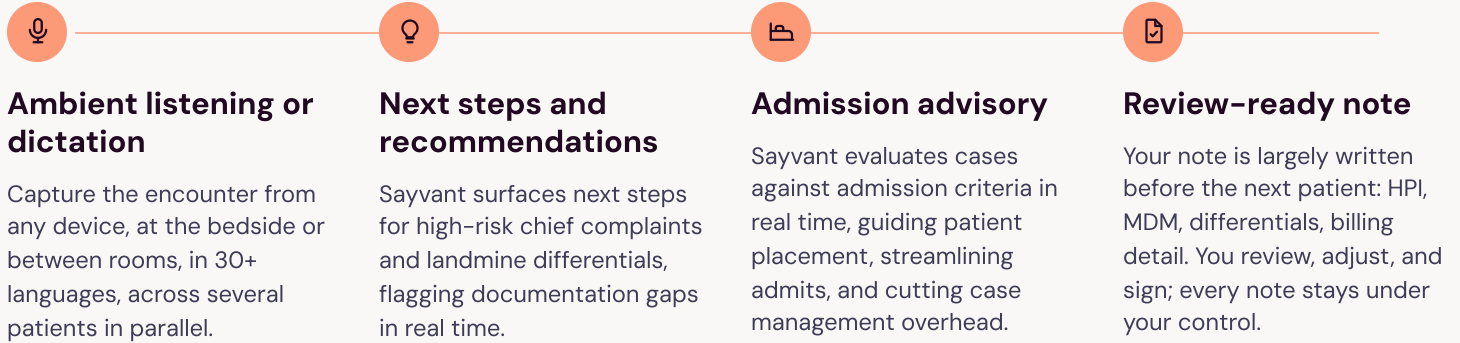

Statistically significant across 50 EDs and 250,000+ encounters · $p < 0.001$

“

My anxiety level is almost at a zero. Going back to my desktop and my HPI is sitting there waiting for me was this aha moment.

Dusty Anderson, MD · Systems Medical Director, Bon Secours Mercy Health

From encounter to signed chart, before the next patient.

POWERED BY

Sayvant Quality System

A physician-validated, per-note scoring standard, built with board-certified emergency physicians, that grades every chart against the clinical, quality, and financial expectations of the care delivered.

Sites

Grounded in evidence-based decision support

Sayvant partners with trusted sources like ACEP and BMJ, so the right next step is in front of you while you're still at the bedside.

Sayvant delivers a high quality service that improves chart quality at a fraction of the cost. We're pleased to recommend Sayvant to our affiliated groups.

Mark Reiter, MD · CEO, AAEM-PG

Great care deserves a chart that proves it.
