# Beamhook manual assembly instruction:

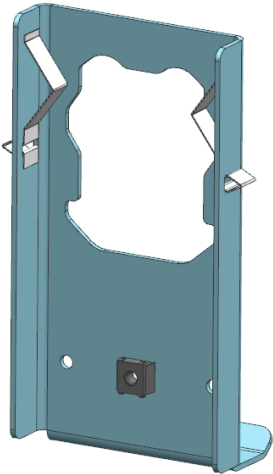

|   |                                                                                     |                                                                                      |
|---|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| 1 | Find spring and element like below:                                                 |                                                                                      |
|   |    |   |
| 2 | Insert spring into slot by equal press force, repeat on second side:                |                                                                                      |
|   |   |   |
| 3 | Find elements like below:                                                           |                                                                                      |
|   |  |  |

|   |                                                                                                |  |
|---|------------------------------------------------------------------------------------------------|--|
| 4 | Assembly from point 2 join together with element from point 3 on demand position of slot holes |  |
|   |              |  |
| 5 | Find element like below:                                                                       |  |
|   |              |  |
| 6 | Element from point 5 insert to assembly from point 4. Find right position                      |  |
|   |             |  |

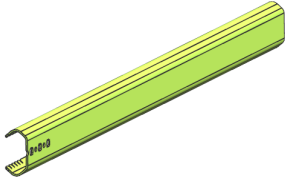

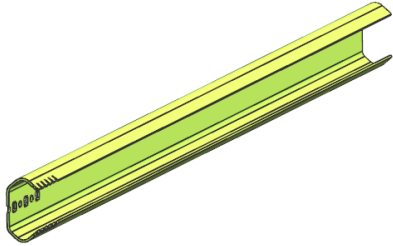

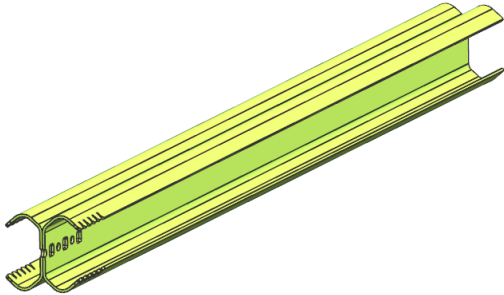

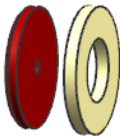

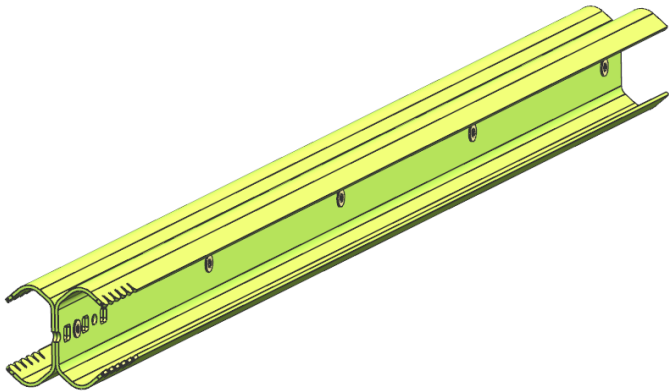

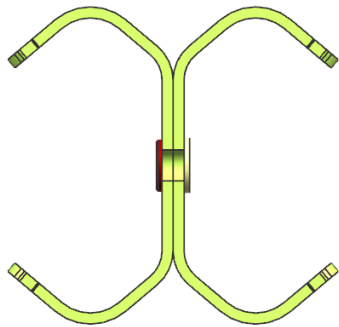

|   |                                                                                     |                                                                                      |
|---|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| 7 | <p>Use rubber band to lock element from five together with all rest elements:</p>   |    |
|   |   |                                                                                      |
| 8 | <p>Final assembly looks like that:</p>                                              |                                                                                      |
|   |  |  |

# Railhook manual assembly instruction:

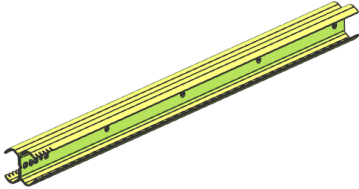

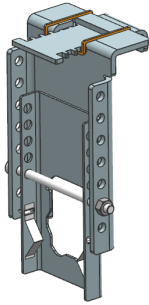

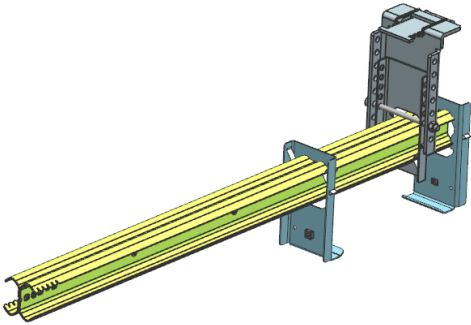

|   |                                                                                     |                                                                                     |
|---|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| 1 | Find spring and element like below:                                                 |                                                                                     |
|   |    |  |
| 2 | Insert spring into slot by equal press force, repeat on second side:                |                                                                                     |
|   |   |  |
| 3 | Find element like below:                                                            |                                                                                     |
|   |  |                                                                                     |

|   |                                                                                   |  |
|---|-----------------------------------------------------------------------------------|--|
| 4 | Assembly from point 2 join together with element from point 3                     |  |
|   |  |  |

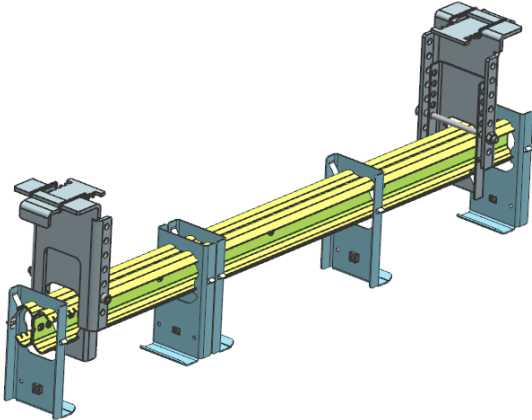

# Crossbeam manual assembly instruction:

|   |                                                                                     |                                                                                       |
|---|-------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| 1 | Find rails (2 Pcs)                                                                  |                                                                                       |
|   |    |     |
| 2 | Place them back to back close to each other:                                        |                                                                                       |
|   |   |                                                                                       |
| 3 | Find rivets and washers (5 of each)                                                 |                                                                                       |
|   |  |                                                                                       |
| 4 | Assembly from point 2 join together with element from point 3                       |                                                                                       |
|   |  |  |

# Crossbeam manual assembly instruction:

|   |                                                                                            |                                                                                      |
|---|--------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| 1 | Find crossbeam assy + railhook and beamhook                                                |   |
|   |          |  |
| 2 | Place railhook and beamhook on right angle to crossbeam and lock by pressing into position |                                                                                      |
|   |         |                                                                                      |

|   |                                                                                   |  |
|---|-----------------------------------------------------------------------------------|--|
| 3 | Repeat until all beamhooks and railhooks are in position                          |  |
|   |  |  |
