Aluminium Railing Systems
Alüminyum Korkuluk Sistemleri

Timeless Design

ALURA Systems connects international projects with aluminium solutions manufactured in Türkiye. We support customers from product selection and technical discussions through to quotation, production coordination and delivery.

Our manufacturing partner brings experience dating back to 1988 in aluminium accessories and architectural systems. With integrated capabilities in extrusion, surface finishing and accessory manufacturing, we offer coordinated solutions for standard systems and custom project requirements.

We work closely with customers to understand their specifications, select suitable products and finishes, and maintain clear communication throughout the process.

Our Product Range

- Aluminium Extrusion Profiles
- Frameless Glass Railing Systems
- Sliding & Folding Glass Systems
- Fixed Veranda / Winter Garden Systems
- Vertical Sliding Guillotine Systems
- Rolling Roof Systems
- PVC Pergola Systems
- Garden Fence & Gate Systems
- Retractable Glass / Windbreaker Systems
- Glass Canopy Systems
- Aluminium Railing Systems

Customer satisfaction, superior service, and uncompromising product quality are the core principles of Alura Systems. More than 85% of our production is exported, reflecting the trust placed in our brand worldwide.

From the very first day, we have continuously invested in product development, innovation, and advanced manufacturing, striving to exceed expectations and provide the best solutions in the aluminium systems industry.

alurasystems.com

Timeless Design in Aluminum Railing Systems

Aluminum railing and balustrade systems are not merely safety components of a building; they are essential architectural elements that define the character of a structure, enhance its aesthetic value, and represent quality and prestige over time. With this perspective, our aluminum railing systems are developed and manufactured according to premium standards at every stage - from profile design and accessory details to surface quality and coating performance.

At the core of our design and production philosophy lies the use of high-strength aluminum alloys, precise dimensional tolerances, and a clear focus on long-term durability. All profile geometries are specifically engineered with structural performance, ease of installation, and architectural harmony in mind. Our systems offer a wide product range that integrates seamlessly with both contemporary and classic architectural designs.

Full Control Over Profile & Accessory Manufacturing

All aluminum profiles and connection accessories used in our railing systems are designed and manufactured within our own production facilities. This full in-house control ensures:

- Complete system integrity
- Perfect compatibility between profiles and accessories
- Perfect color matching between profiles and accessories

Unlimited Color Options & Outstanding Coating Quality

Our products can be coated in all RAL colors, meeting the specific requirements of architectural projects and design concepts. Electrostatic powder coating is applied to achieve:

- Uniform and flawless surface texture
- High UV resistance
- Maximum corrosion protection
- Long-term color stability without fading or surface degradation

Whether matte, gloss, or special surface finishes are required, every coating reflects our premium quality approach and attention to detail.

Premium Quality - uncompromising Standards

Quality is not an option in our production process; it is a fundamental principle. Every profile and accessory undergoes strict inspection prior to delivery, ensuring dimensional accuracy, surface excellence, and installation compatibility. As a result, our railing systems maintain their original appearance and performance for years in:

- Residential projects
- Commercial buildings
- Hotels, residences, and luxury villas
- Balconies, staircases, terraces, and gallery areas

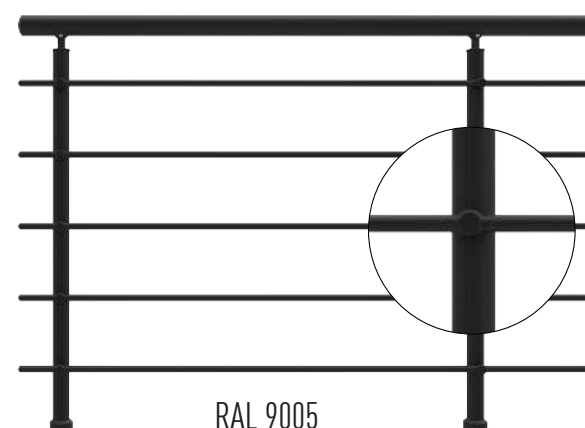

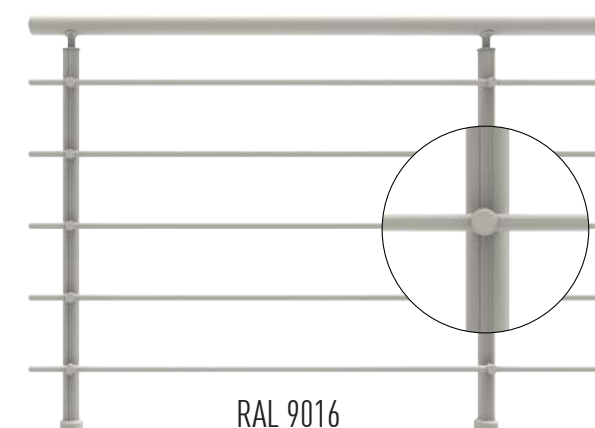

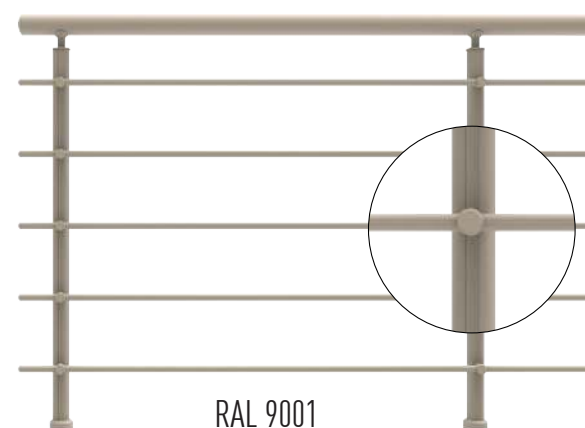

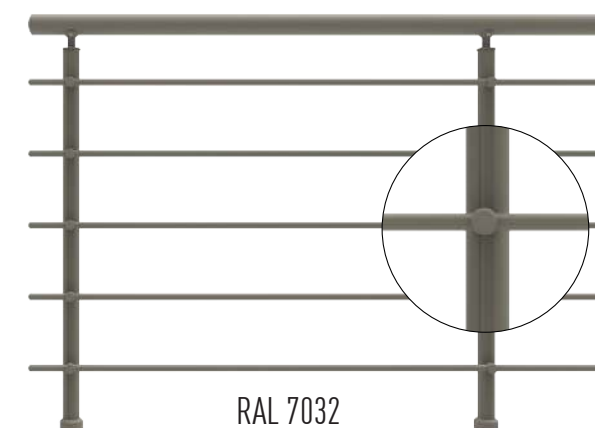

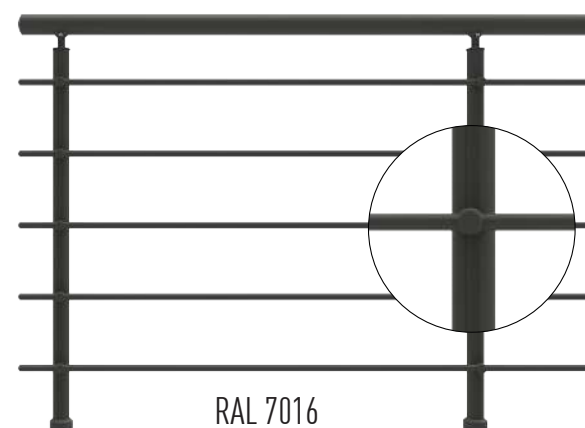

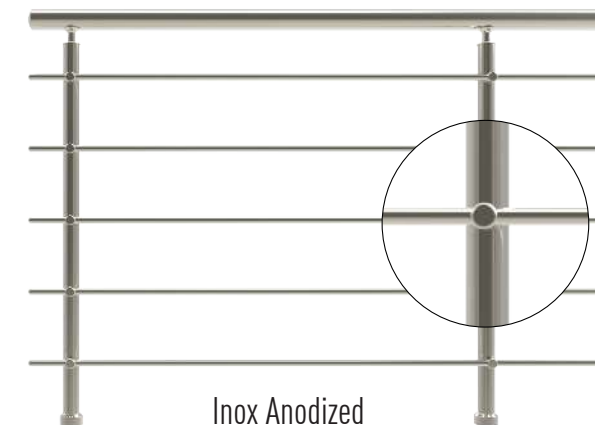

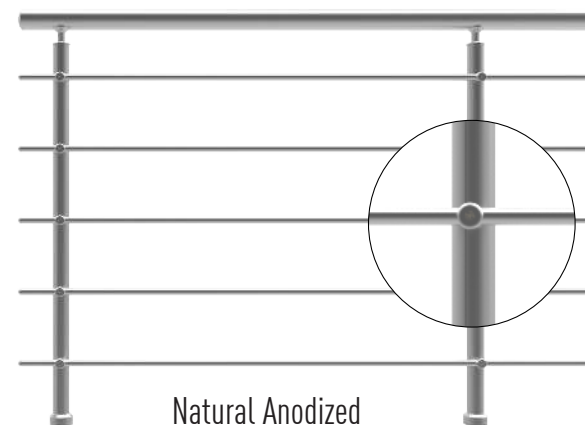

A Benchmark in the Market

Our aluminum railing systems stand out not only for their technical excellence but also for their smooth installation, superior surface quality, and long-term durability. What truly differentiates our products is the seamless integration of design, manufacturing, and quality control under a single, consistent philosophy.

For us, quality must be experienced throughout the entire project - not just on the production line. Every system we deliver adds safety, elegance, and prestige to the spaces it becomes part of.

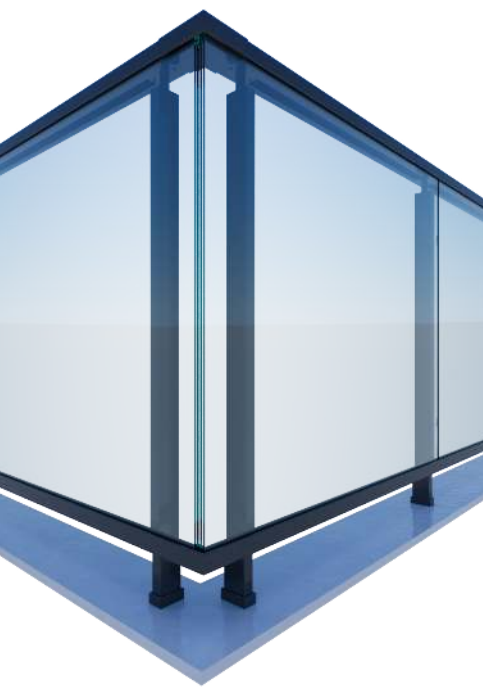

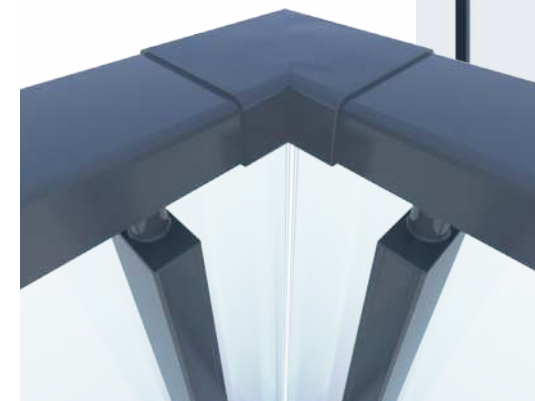

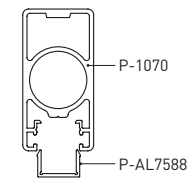

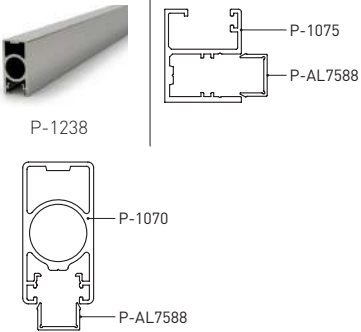

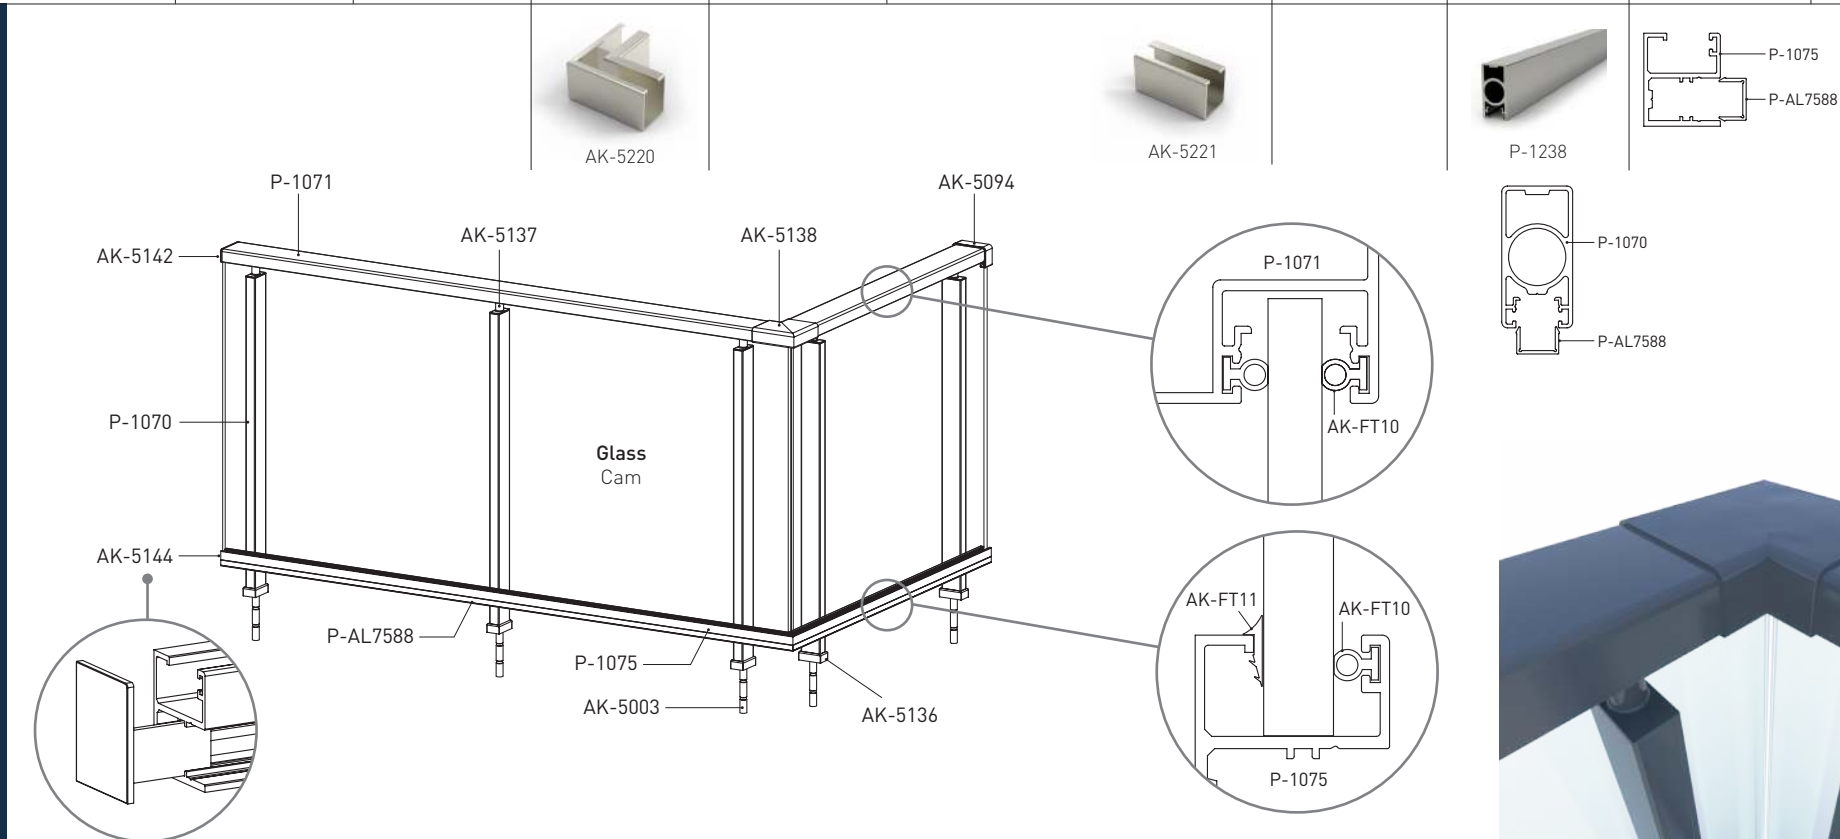

Versatility in Design

Available in various models and colors, Railing Systems adapt easily to different architectural needs. Choose between different models and customize with finishes like anodized matte or powder-coated black and other trend colors for a seamless fit into any project.
