

NATIVE PLANT LANDSCAPING

NATIVE PLANT LANDSCAPING NATIVE PLANT LANDSCAPING

Tick the box when completed

CRITERIA

- Use plants native to the local region.
- Suitable for various soil types and sunlight conditions.

BENEFITS

- Supports local wildlife.
- Reduces water usage and maintenance.
- Increases resilience to local pests and diseases.

CHALLENGES

- Initial selection of appropriate native plants.
- Potential higher upfront costs for native plant species.

SEASONALITY

- Best planted in spring or fall for optimal root establishment.

INSTALLATION

- Minimal once established; occasional watering, mulching, and weeding.

MAINTENANCE

- Minimal once established; occasional watering, mulching, and weeding.

COST

- Moderate initial investment with low long-term maintenance costs.
