7	Free-arm Cover*
8	Machine Support

Hardware Kit			
a	8		Wood screws
b	10		Hex bolts
c	10		Hex nuts
d	20		Washers

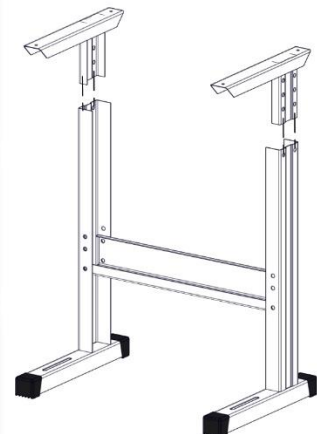

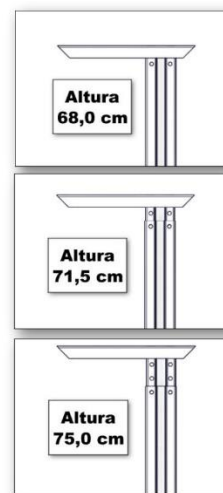

2. Product assembly

To assemble this product you will need:

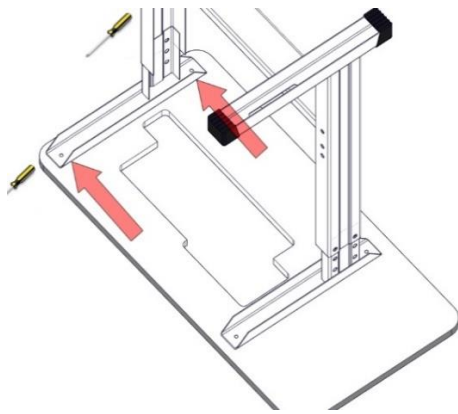

- 1 x Phillips screwdriver;
- 2 x open-end wrenches, ½" or 13 mm;

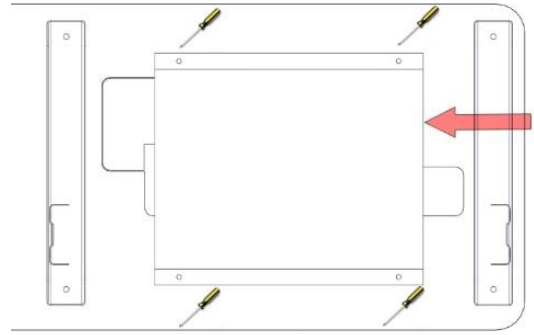

1. Bolt Crossbar 1 to columns 2 and 3 using the bolts, washers and hex nuts (kit items b, c, d); you will need the open-end wrenches for this step.

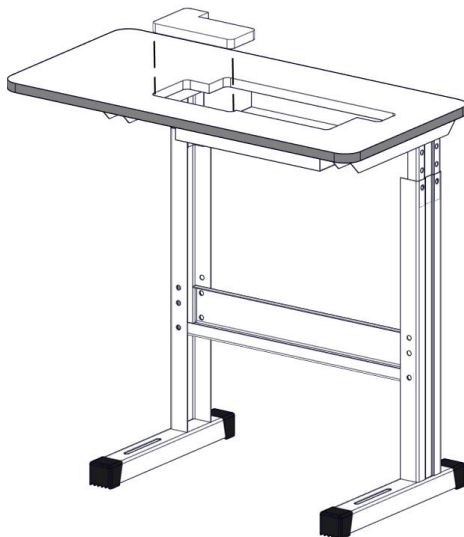

2. As in step 1, bolt the brackets at the desired height.

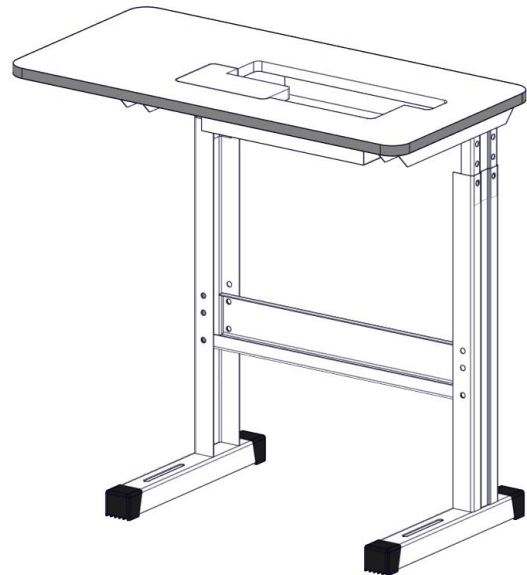

3. Screw the table top onto the fixed columns using 4 wood screws “a”. Note the position of the feet at the right end, which centers the machine opening between the table legs.

4. Screw the machine support to the top with 4 wood screws “a”. Align the support with the right end of the opening, leaving the area for the machine's power socket and on/off switch exposed.

5. Fit your sewing machine together with the free-arm cover.

6. Your table is ready to use.
