Project Highlight

TransitFlow Mobility App

A transport intelligence platform that helps commuters plan smarter journeys, track public transport in real time, and arrive on schedule.

Responsibilities:

- UX research
- Product strategy
- UX design
- Information Architecture
- Wireframing
- UI Design
- Design System
- Prototyping

Achievements:

Designed an end-to-end commuter experience that combines real-time transit tracking, route planning, and predictive commute intelligence to reduce travel uncertainty and improve on-time arrivals.

Proposal Nest Professional Proposal Mobile App

A proposal-writing platform that connects users with vetted writers while providing transparent pricing, project tracking, revision management, and admin-moderated communication in one centralized workspace.

Responsibilities:

- Product Discovery
- User Research
- UX Design
- Product Strategy
- UI Design

Achievements:

Designed a structured workflow that enables users to submit briefs, track progress, manage revisions, and collaborate with vetted writers in one platform, reducing uncertainty and workflow
