About Us

Advance Industrial Solutions;

With 2 locations and an expert staff of 30 people, it serves as a technological solution partner that provides added value to its business partners in both simple commercial work and comprehensive projects in the field of industrial automation.

Mission and Vision

Advance Industrial Solutions provides services with a pioneering, innovative and customer-focused approach in the field of industrial automation. It creates a difference in the sector with its expert staff and technological infrastructure, and provides added value at every point where a solution is needed.

Our Mission:

To provide high added value, innovative and reliable solutions to our domestic and international business partners in the field of industrial automation, just in time and in the most appropriate way.

Our Vision:

To be a pioneer company that closely follows innovations in its sector, adds value to its customers, uses technology effectively and achieves what cannot be done in Türkiye and the world. We achieve this as a brand that is sensitive to the environment and people, and has established trust and continuity-based relationships with its business partners.

Our Business Lines and Subsidiaries

Industrial Equipment Supply

- Automation Equipment
- Servo and Asynchronous Motors / Drivers
- Serial Bus, Industrial Communication Remote I/Os
- Displays, HMIs and IPCs
- Sensors and Cameras
- Pneumatic Equipment, Grippers and Vacuum
- Process Control Equipment and Valves
- Safety Equipment & ATEX Explosion-Proof

Electrical and Pneumatic Control Panels Cabinets

Automation Software

- PLC Machine Automation
- Servo Motion / Servo Cam Systems
- Plant Software SCADA

Turnkey Robotic Systems Installation

- Palletizing and Depalletizing Applications
- Packaging and Assembly Applications
- Robotic Systems in ATEX / Explosion-Proof Area
- Mobile Robotics (AMR)

Industrial Electronics BUS I/Os R&D and Production

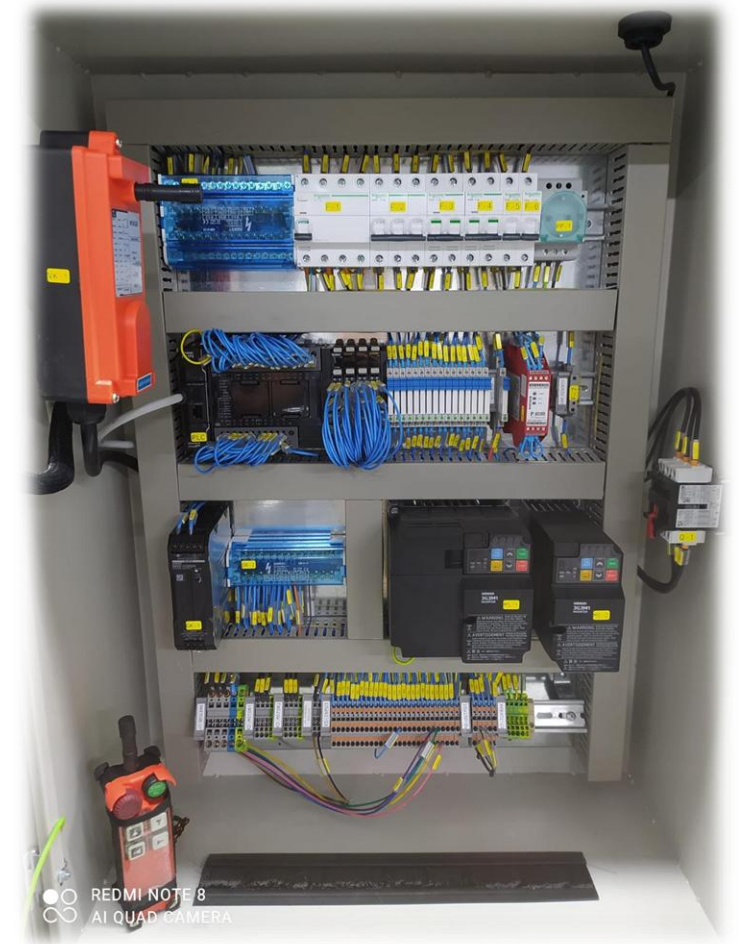

Industrial Equipment Supply

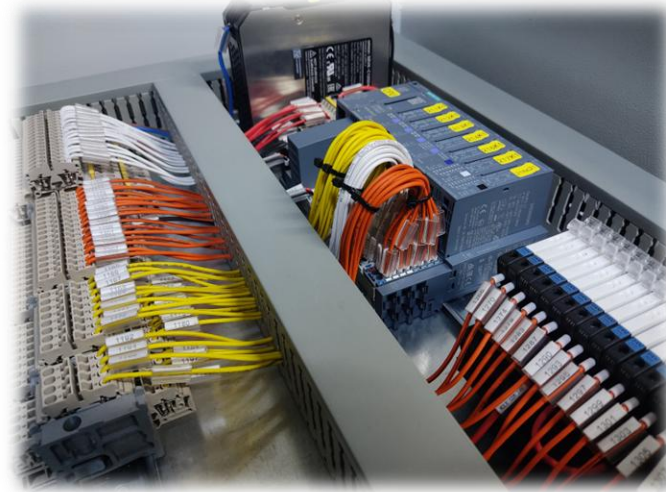

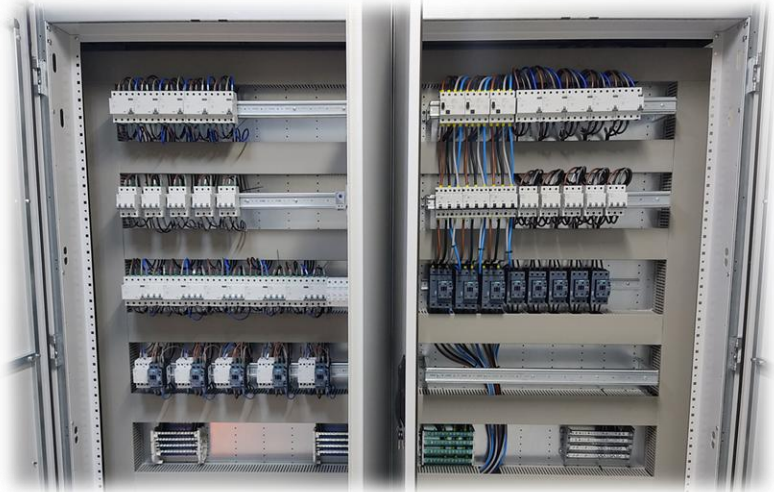

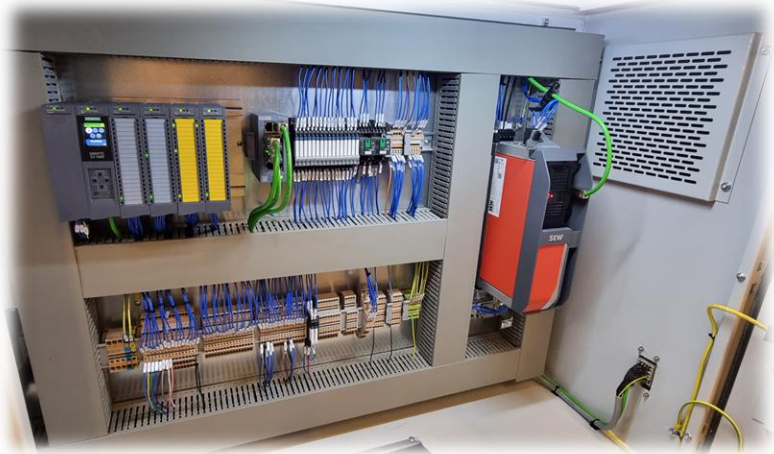

Our Brands, Partnerships and Business Based Brands We Supply

Electrical and Control Panels Cabinets

Electrical and Control Panels Cabinets

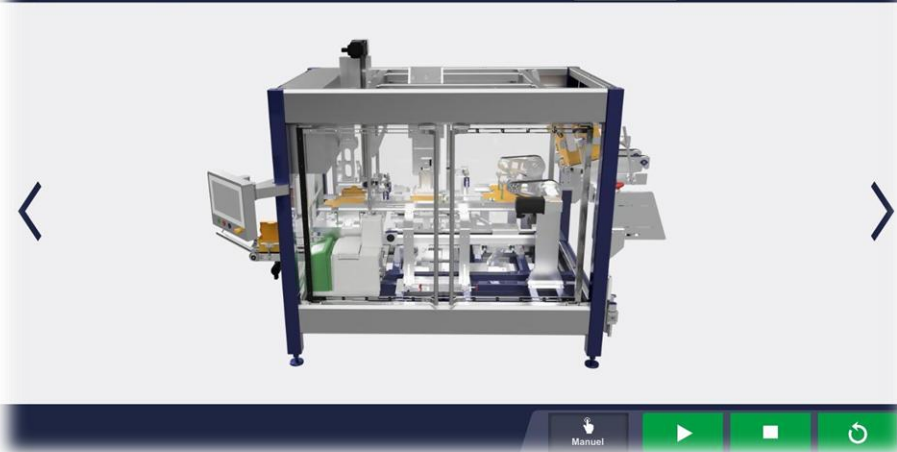

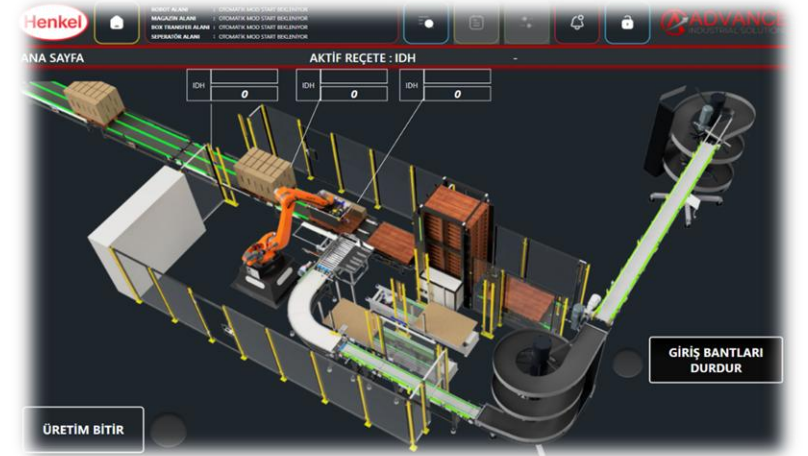

Servo Motors, Motion and ServoCam Software Development

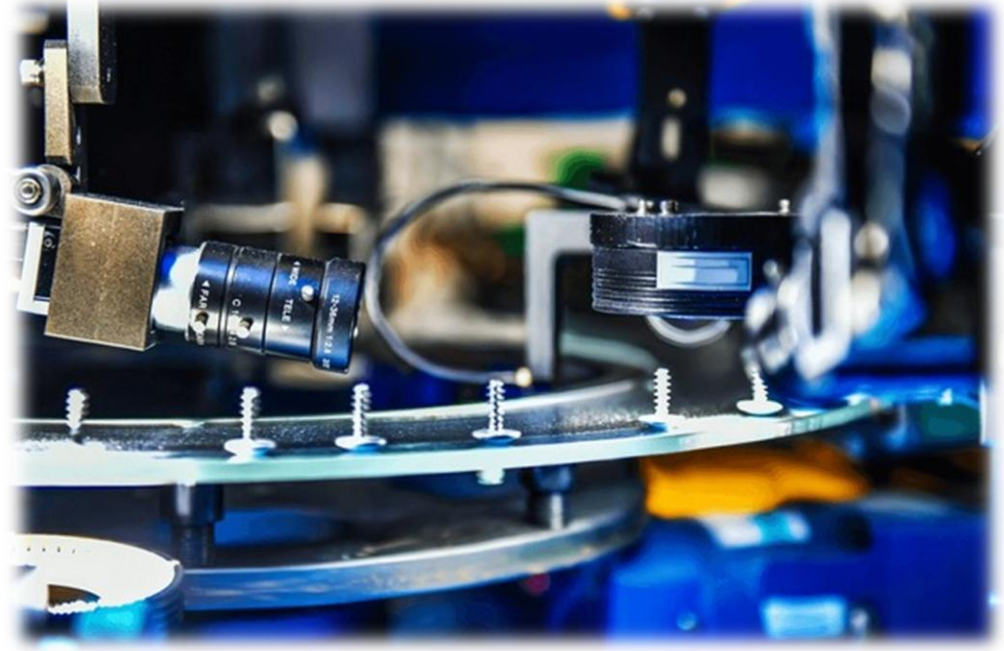

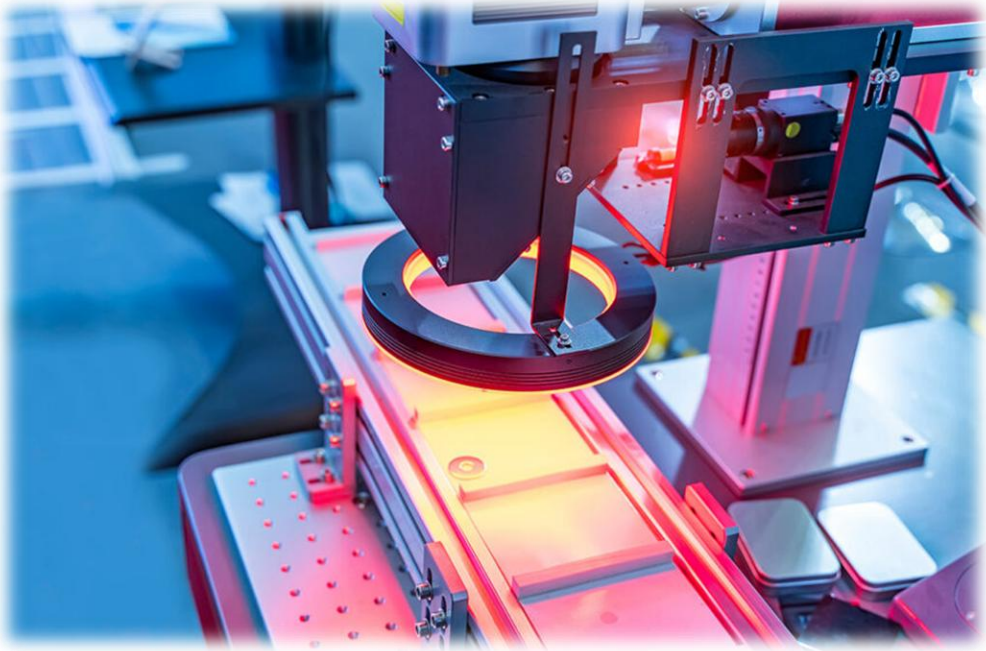

Machine Automation and PLC Software

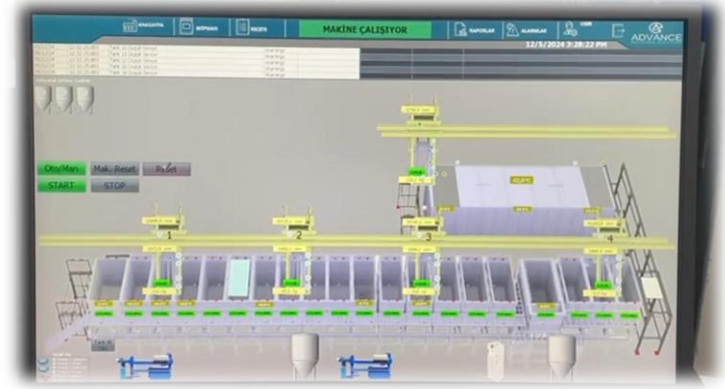

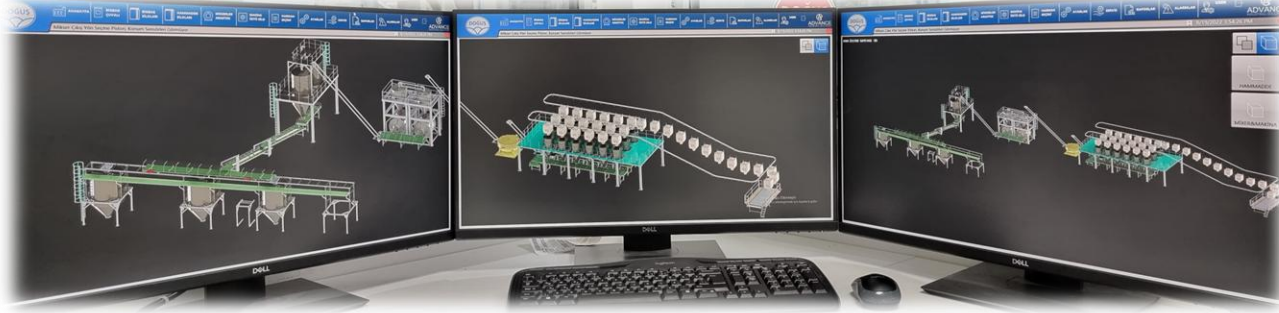

HMI Interface and Render Supported Visualization

Industrial Cameras – Quality Control and Robotic Applications

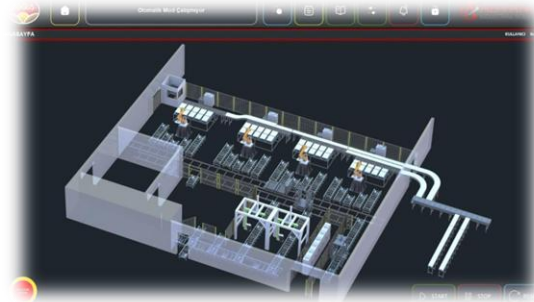

Facility and Plant Software, SCADA and Render Supported Interfaces

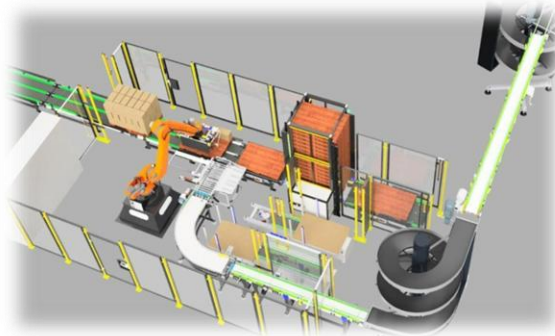

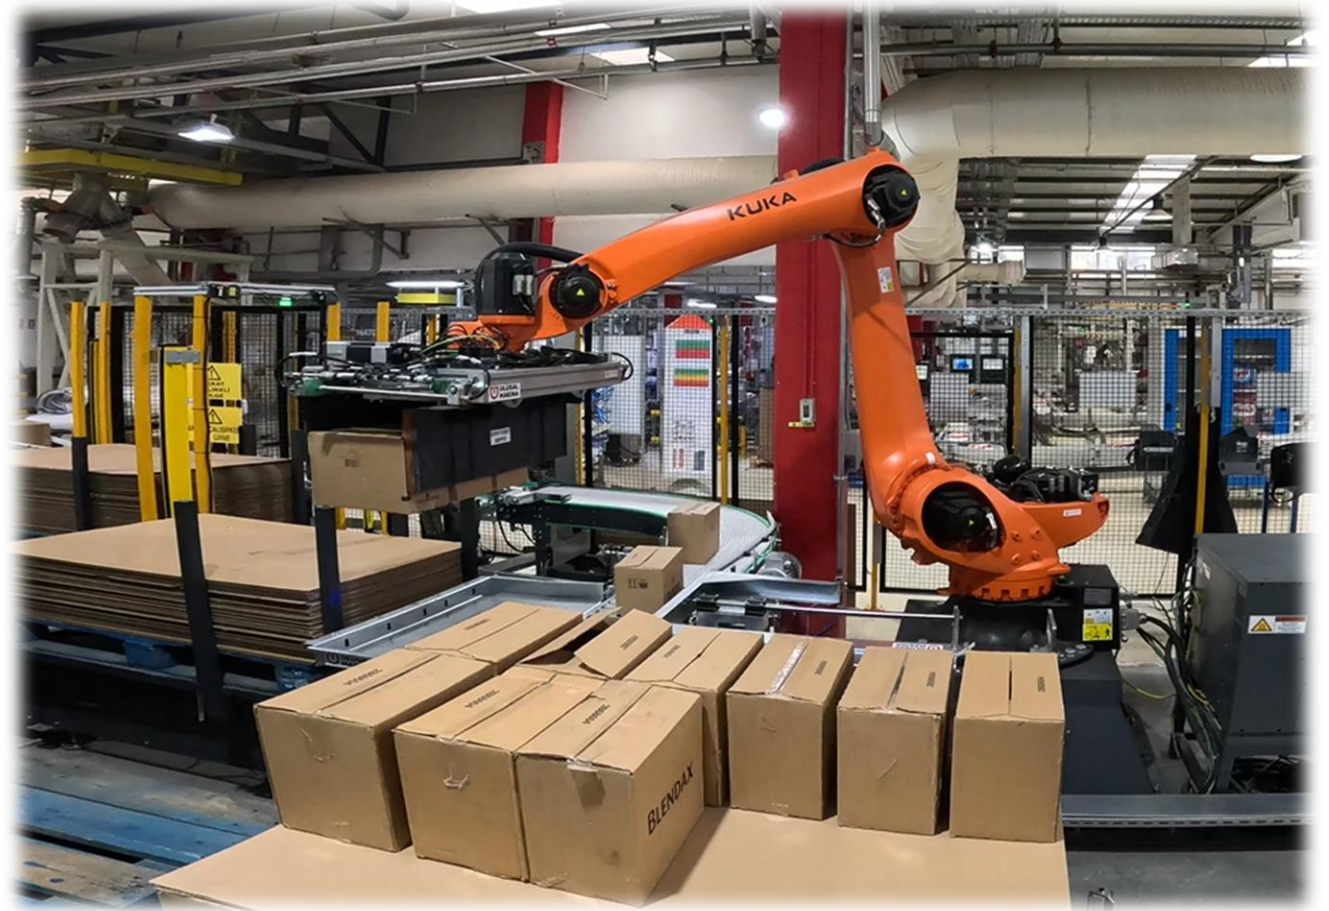

Fluid / Process Control and SCADA

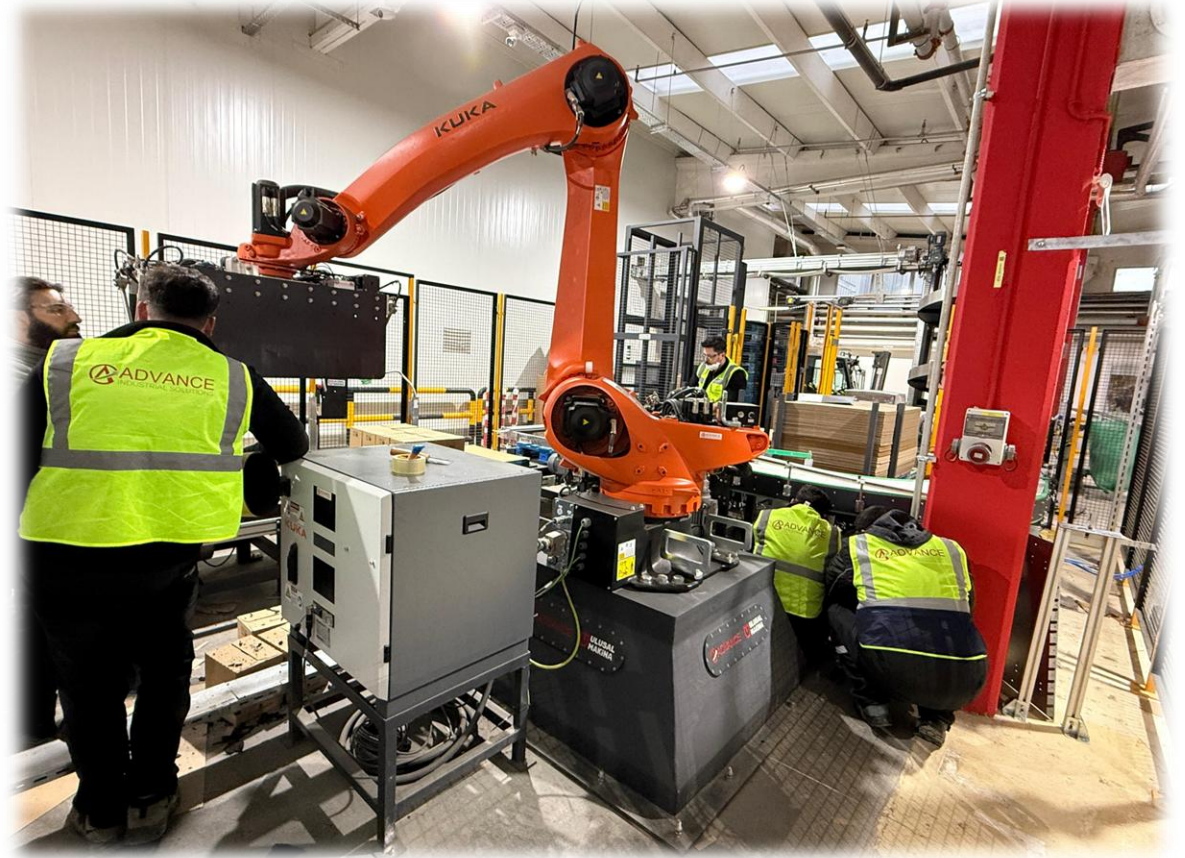

Turnkey Robotic Systems

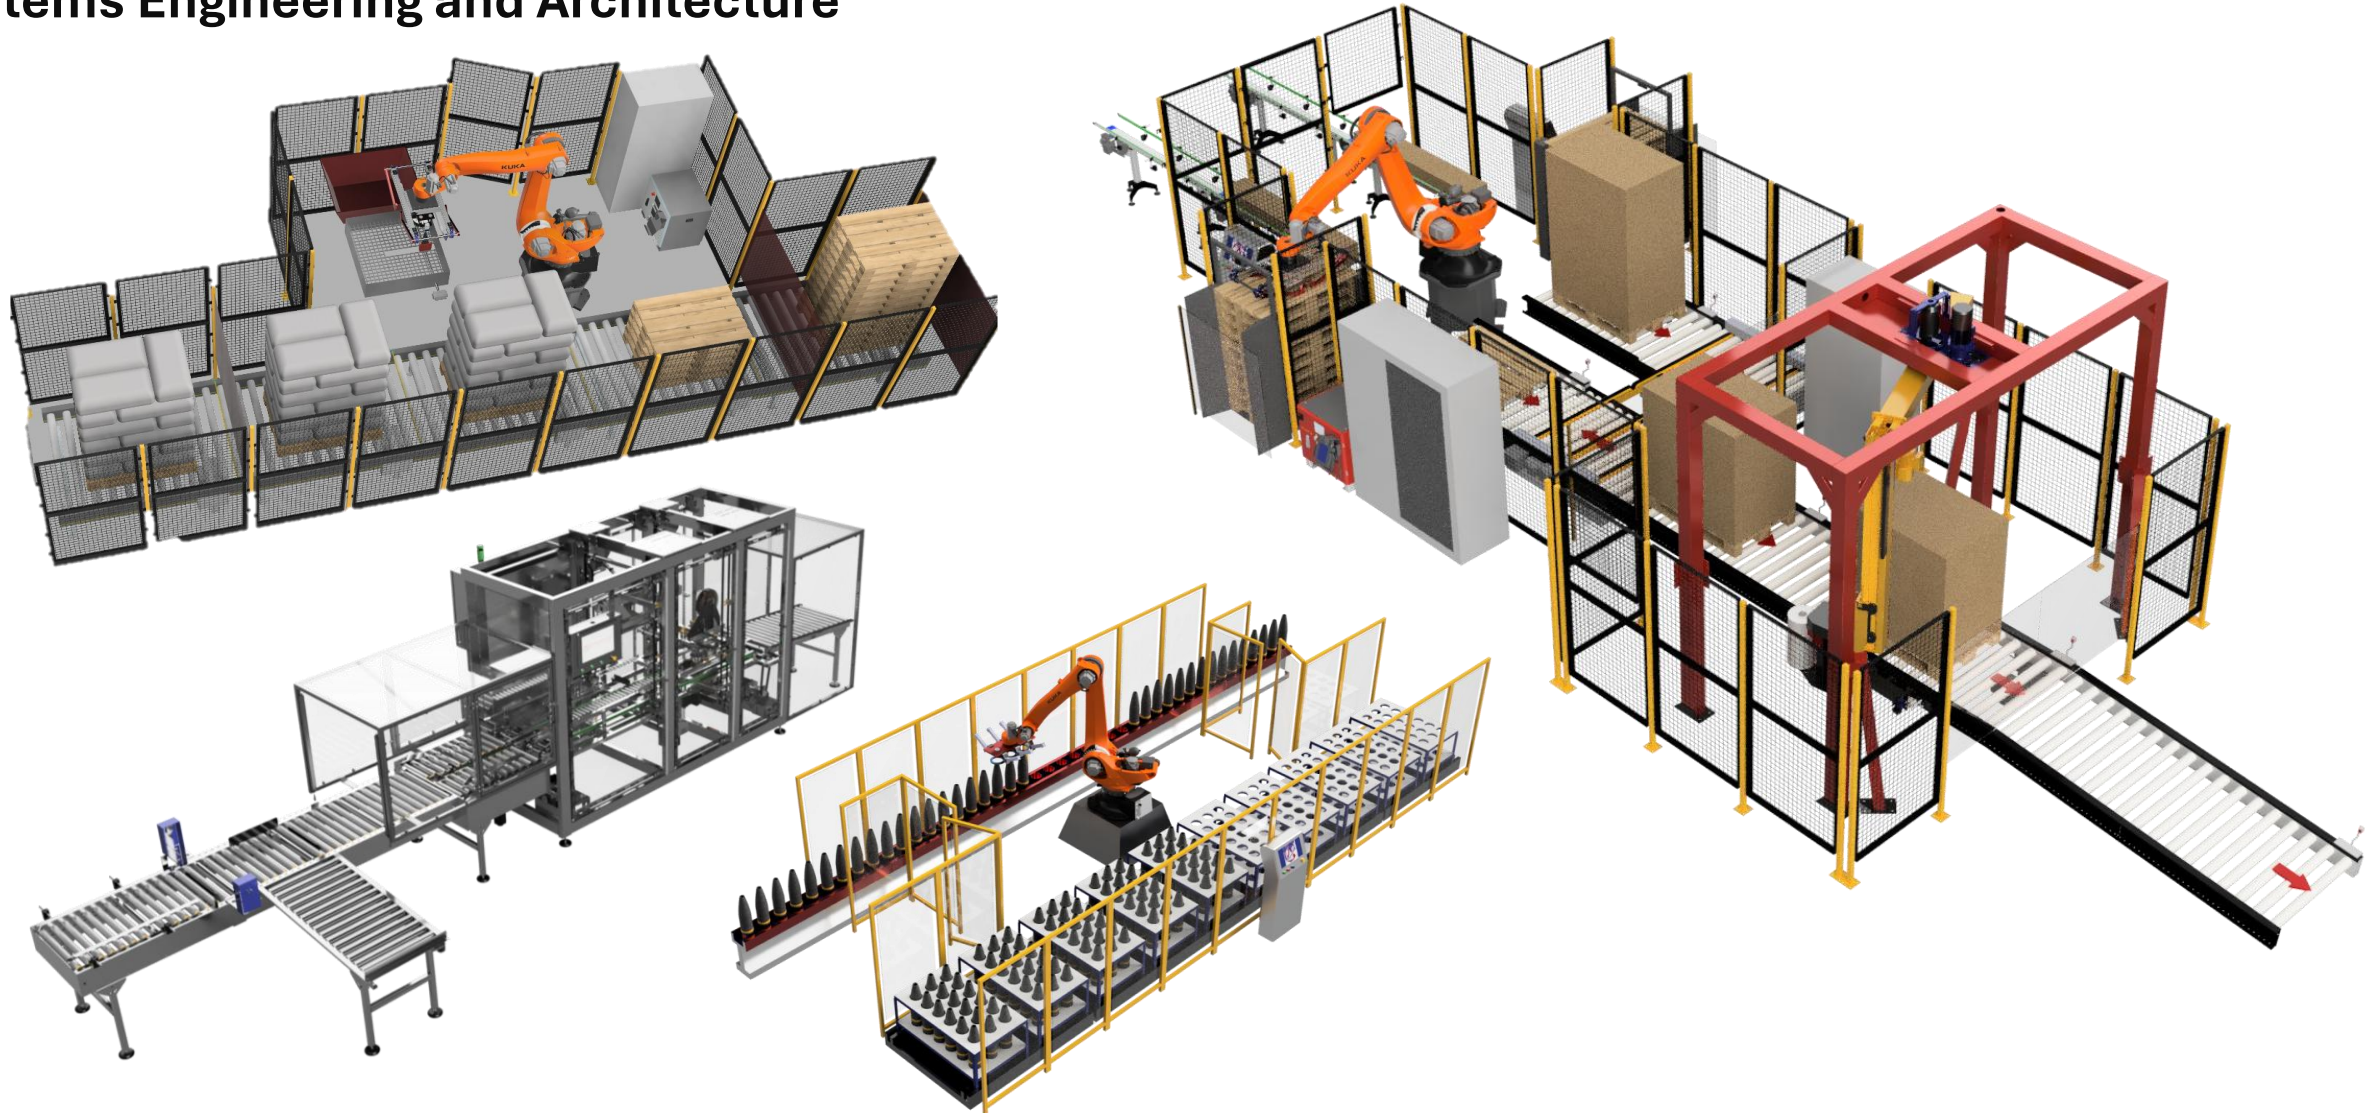

Turnkey Robotic Systems

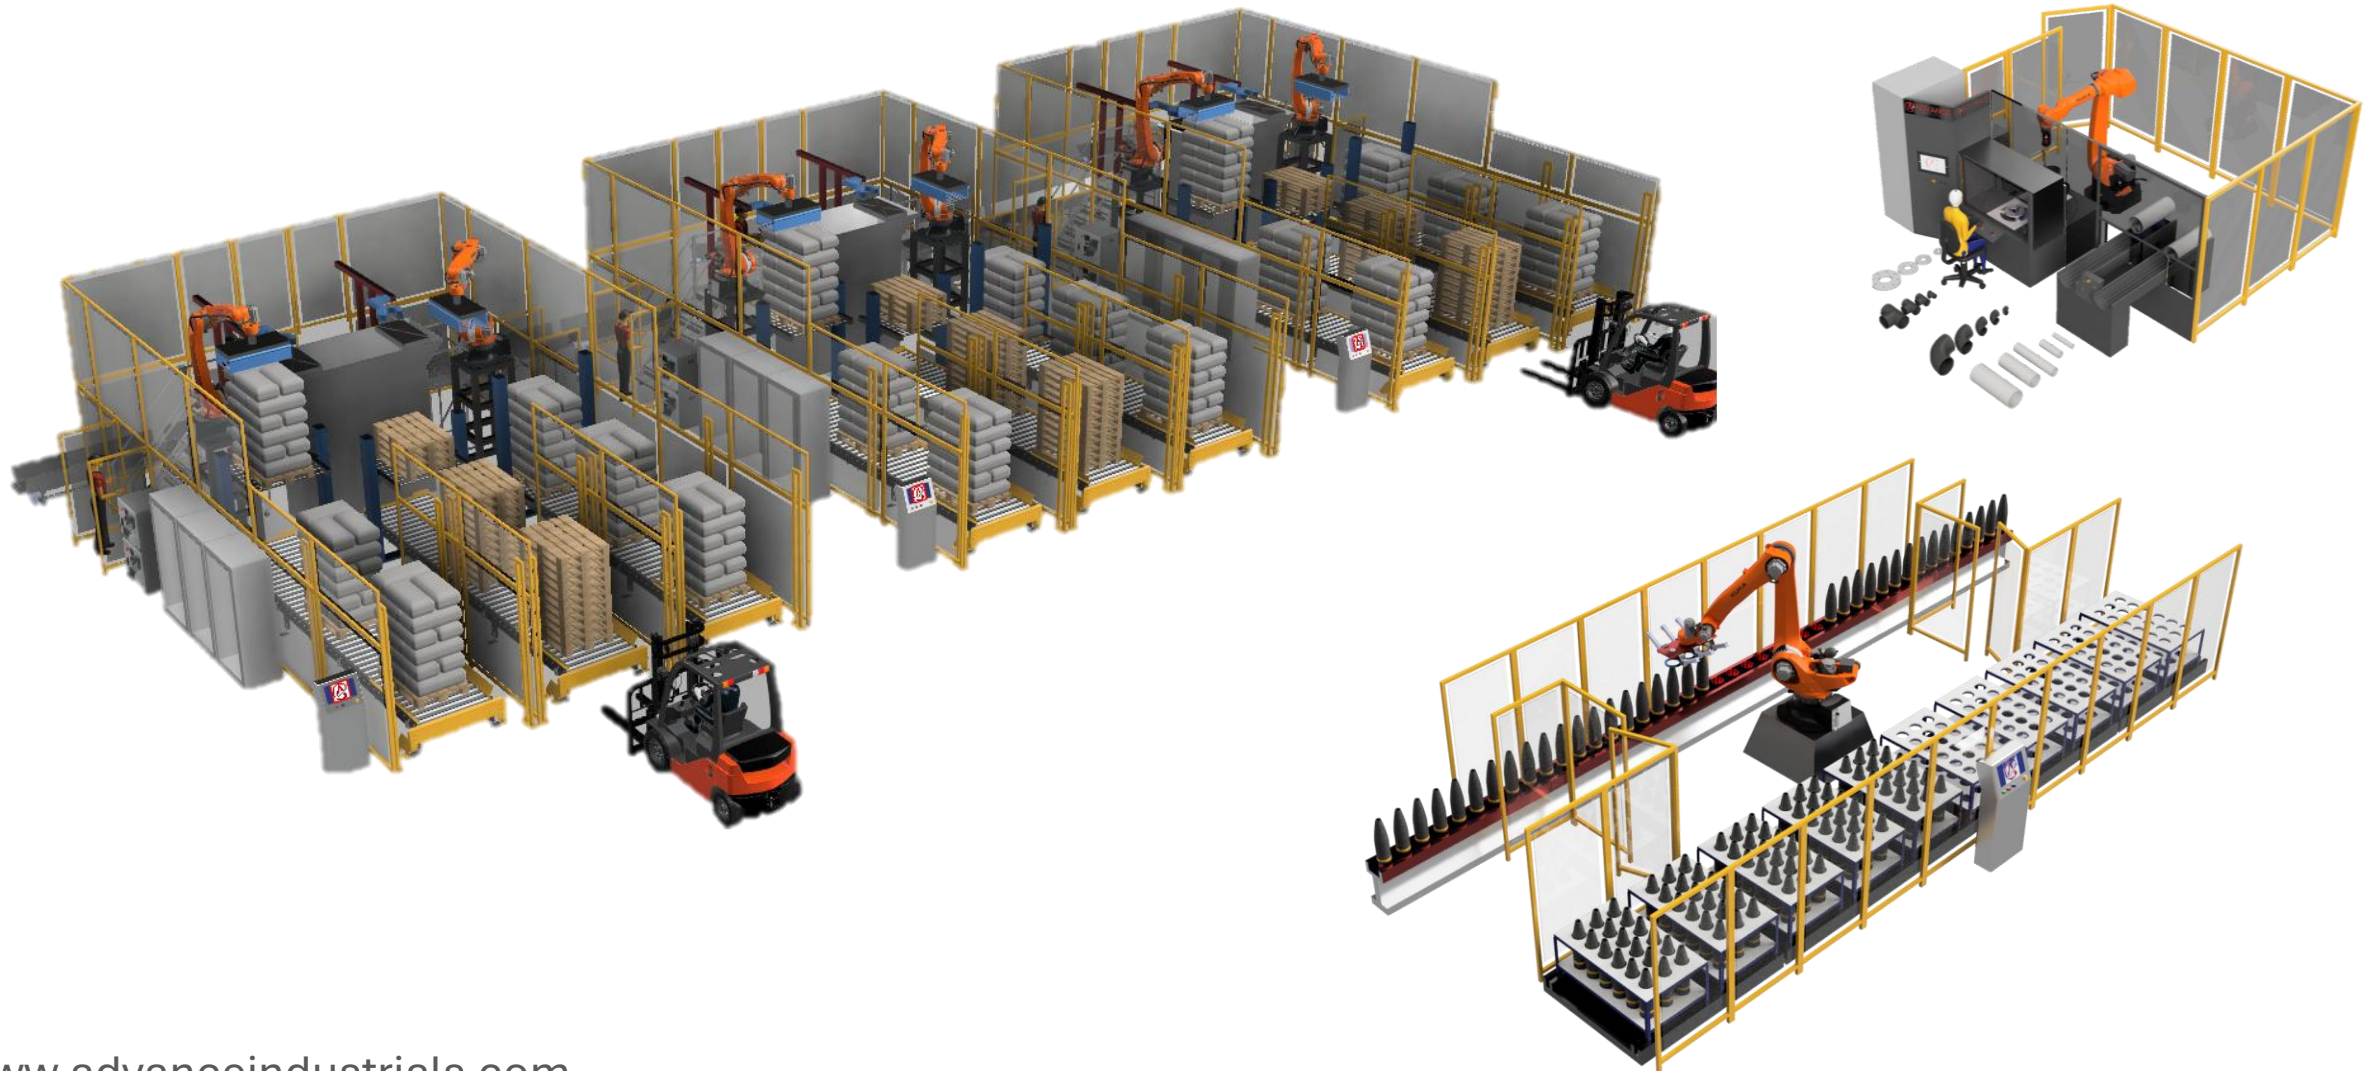

Excellent Engineering, After Sales Support and Warranty

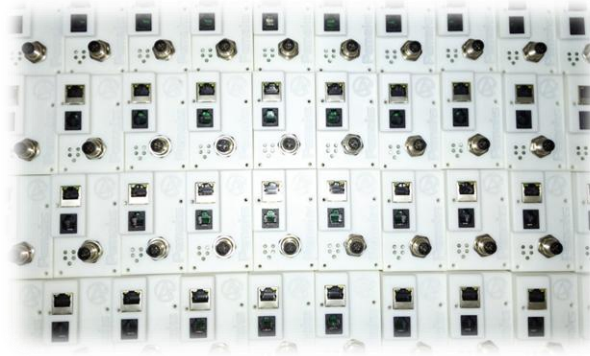

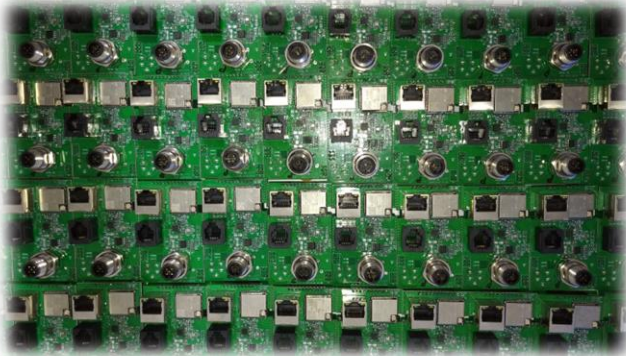

Systems Engineering and Architecture

Systems Engineering and Architecture

Industrial Electronics BUS IOs R&D and Production

Advance Electronics

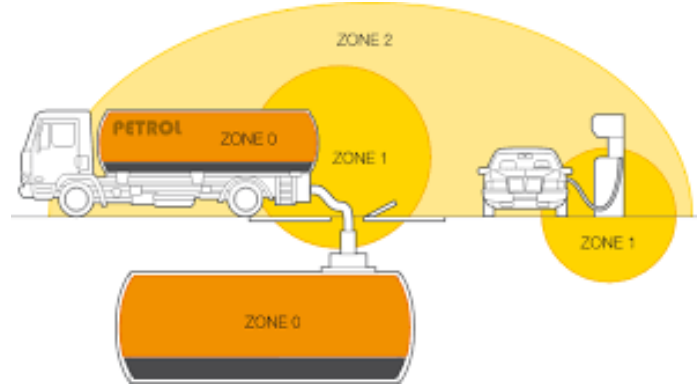

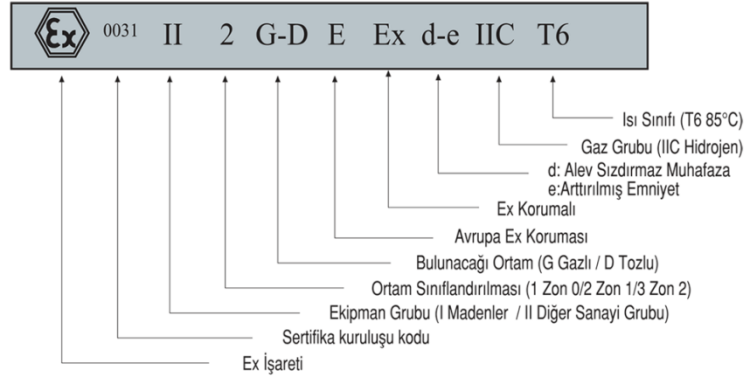

Established in 2022 for Remote IO R&D and Production with industrial communication standards, Advance Electronics (AE) Works to be a local solution for industrial connection electronics that can be imported in Türkiye.

Modbus RTU & Modbus TCP/IP
CanOpen & CanBus completed
Working on EtherCat ve Profinet protocols.

**AE Technology is a member of
EtherCat Technology Group.**

Ex-proof ATEX Expertise

Product Labeling and Serial / EXP Date Printing Systems
