Typical Lead Time	Confirmed per order

SPECIFICATION

HS Code	0709.99
Packaging	2.5–5kg pre-packed cartons; vacuum packs within mixed stir-fry lines
Certifications	GlobalGAP, BRC
Typical Export Markets	EU, regional

OVERVIEW

Baby corn is harvested young — typically 45 to 60 days after planting, when ears are just 5 to 10cm long and 8 to 16mm in diameter at the base — from Kenya's western and northern Rift Valley growing belt. It's hand-picked to hit that narrow maturity window, since a few days' delay changes the texture buyers expect.

Pricing is available on request and confirmed against current availability and order quantity. Request a quote for this product at riftsoil.com.
