

Caracol Table Lamp

ABOUT

Reinventing what it means to be shell-like is our *Caracol Table Lamp*. Named after its snail-inspired form, the lamp is hand-carved from solid hardwood. Texture created from the carving process overlaps the timber's grain, resulting in a 'hatched' effect throughout.

A long stem made of unlacquered brass lifts any accompanying lampshade, providing added height and defining the lamp's silhouette. Paired with brass fittings that will patina with use.

Lampshade not included.
