PROFESSIONAL SUMMARY

Motivated Web Developer with 3+ months of hands-on Shopify internship experience and a strong foundation in frontend technologies. Proficient in building and optimising e-commerce and business websites using Shopify (Liquid), WordPress, HTML, CSS, JavaScript, React JS, and Tailwind CSS. Experienced in theme customisation, UI/UX improvements, responsive design, and website speed optimisation. Independently developed and delivered business websites for real clients. Currently expanding into backend development while continuously sharpening skills in modern web technologies.

WORK EXPERIENCE

Shopify Developer Intern – Millennial Labs, Chennai

Jan 2026 – Apr 2026

- Developed and customised healthcare, wellness, and e-commerce Shopify websites using Shopify Liquid, HTML, and CSS.
- Revamped a healthcare and wellness e-commerce website by improving UI design, colour hierarchy, responsiveness, and product presentation, resulting in a more engaging user experience.
- Built custom product-page sections with bespoke code to enhance visual appearance and usability.
- Conducted website audits covering UI fixes, responsiveness improvements, and basic speed optimisation for multiple client projects.
- Collaborated with the team on real-time client deliverables, ensuring quality and on-time completion.

PROJECTS

WordPress Business Websites

- Designed and maintained responsive WordPress websites for business clients – Global Placement Center, Hydronikos, and Trueline Management Services.
- Implemented layout fixes, responsive design improvements, and performance optimisation using Elementor and custom CSS.
- Managed site deployment and maintenance via cPanel.

Live Demo: globalplacementcenter.com | truelinemanagement.com | hydronikos.com

Shopify E-commerce Website – Geosvasth

- Customised Shopify storefront, product pages, and collections for the Geosvasth brand.
- Improved overall user experience with optimised layouts, better navigation, and responsive design enhancements.

Live Demo: dhanus.framer.website/projects/e-commerce-website

Trending Movies

- Built a responsive movie discovery application using React.js and Vite, integrating the TMDB API to display trending and popular movies.
- Implemented real-time movie search with dynamic API requests for an interactive user experience.

- Developed a Favorites feature using Context API and Local Storage to persist user preferences across sessions.
- Configured React Router for seamless client-side navigation between application pages.
- Deployed the application on Vercel with secure API key management using environment variables.

Live Demo: <https://trending-movies-sd.vercel.app/>

Chrome Extension Toolkit

- Developed a developer support Chrome extension using JavaScript with features for responsive testing and basic SEO analysis.
- Published and documented the project on GitHub.
