

ABOUT US

Every year **Formula Student team Delft** takes on the challenge of creating an electrical race car from scratch, teaching our engineers through hands-on experience.

For us **education** and **teamwork** is as important as winning, that's why we bring a "mobile workshop" to competitions to assist other teams with tools and resources fostering a **collaborative environment**.

"TO WIN **FSG** WITH A WELL-INTEGRATED CAR, THAT FINISHES ALL EVENTS, BUILT BY **ONE UNITED TEAM**."

VALUES

At Formula Student Team Delft, we are constantly pushing the boundaries of **innovation** in **sustainable** engineering. As a leading team in the Formula Student competitions, we have demonstrated our commitment to **excellence**, setting world records and developing cutting-edge technologies. Furthermore demonstrated by our alumni, who have ended up at **top companies** and are represented at every F1 team except Haas.

WE OFFER

PUBLICITY

We offer publicity in form of logo branding and social media exposure. Let your product be seen by professionals and future engineers in your field!

EVENTS

You can have our car at your stand or displayed at your company and even drive the car yourself.

COLLABORATION AND RECRUITMENT

You get access to a pool of motivated and talented engineers through recruitment events and adverts or company visits.

Winning FSG, the most prestigious academic motorsport competition in the world, does not come without the necessary financial support. Assembling the best structure, ordering and testing our parts and analysing data requires a lot of funding. With the help of our **generous partners**, we are able to perform at the highest level each year.

Creating a safe space for students to learn, **work together**, and take pride in their achievements is at the core of our mission. Beyond Delft, Formula Student fosters **global friendships**, and **learning** from other teams around the world.
