

Strategic Initiative for SAP: Transforming Zurich's Job Portal Landscape

Sapport

Product Design · Zurich

🕒 3 months

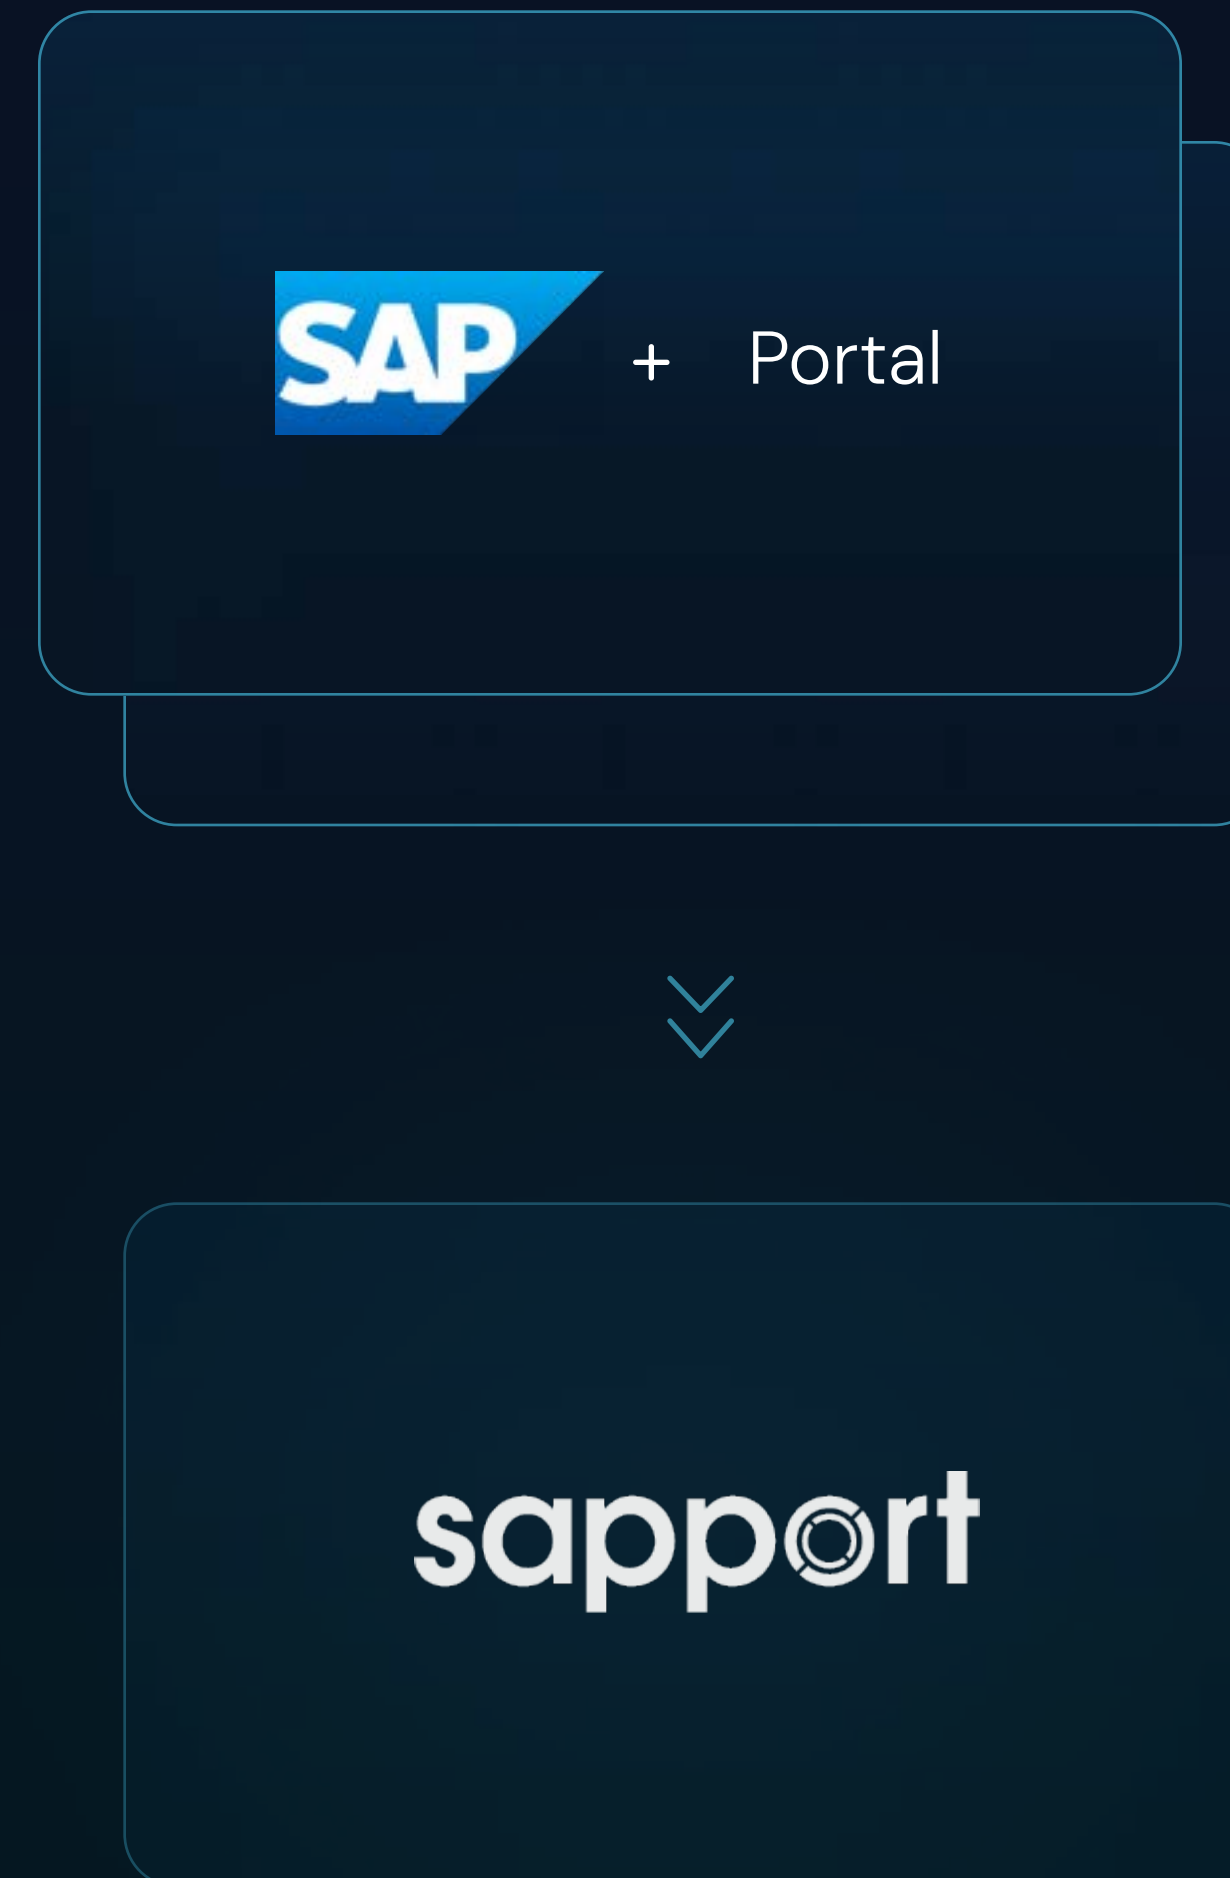

Overview

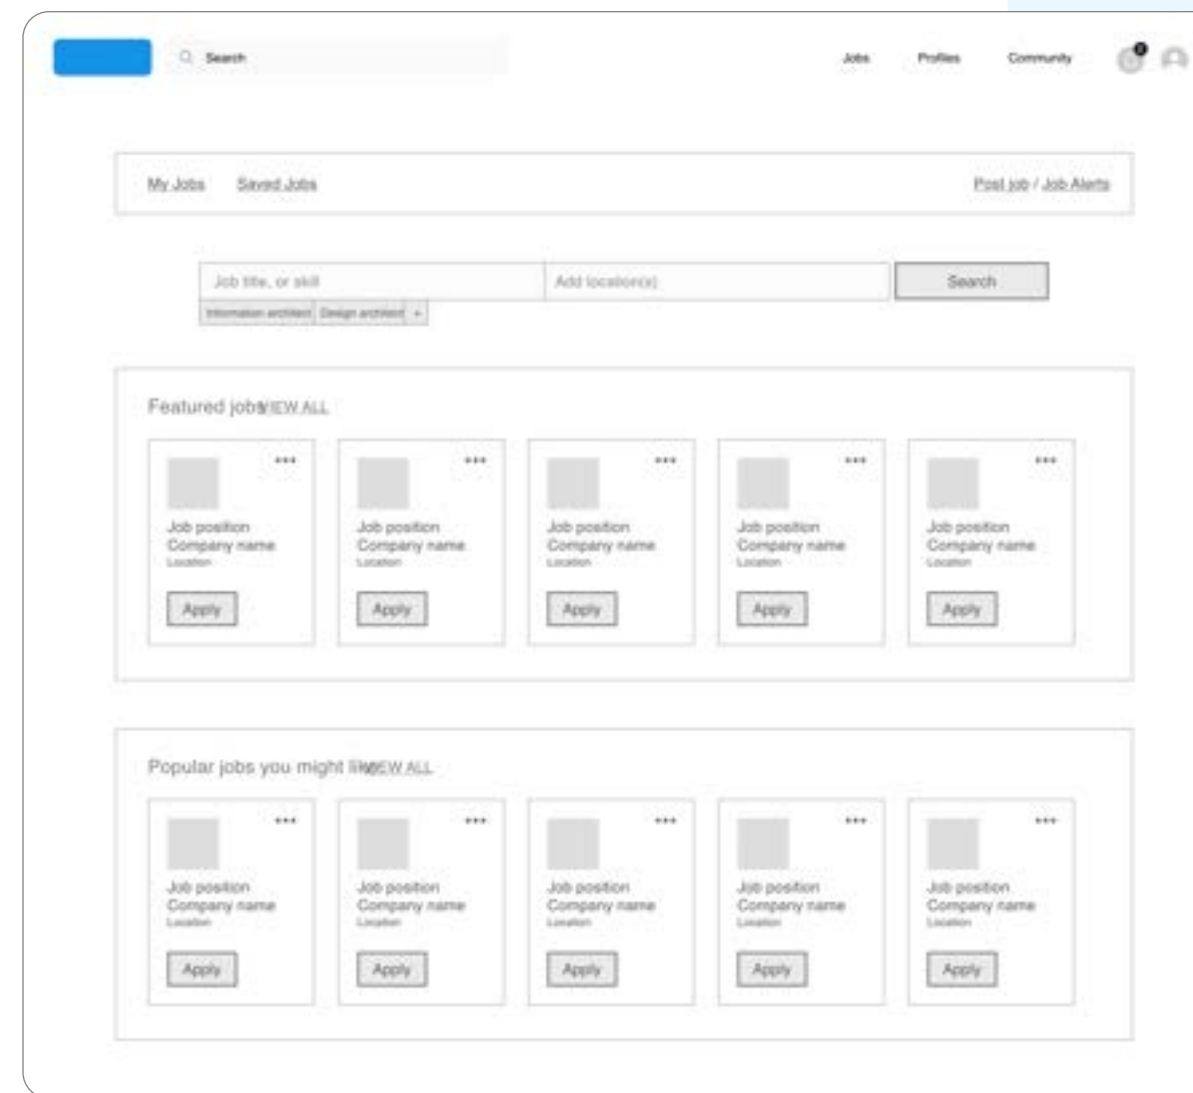

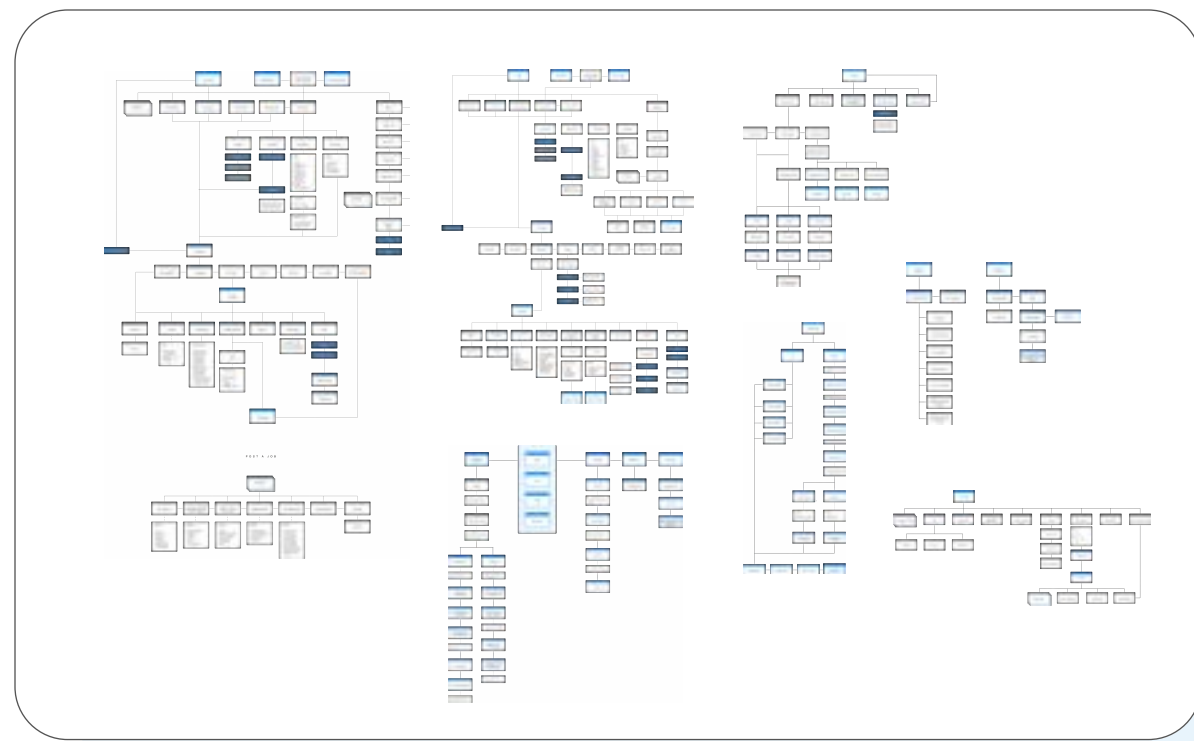

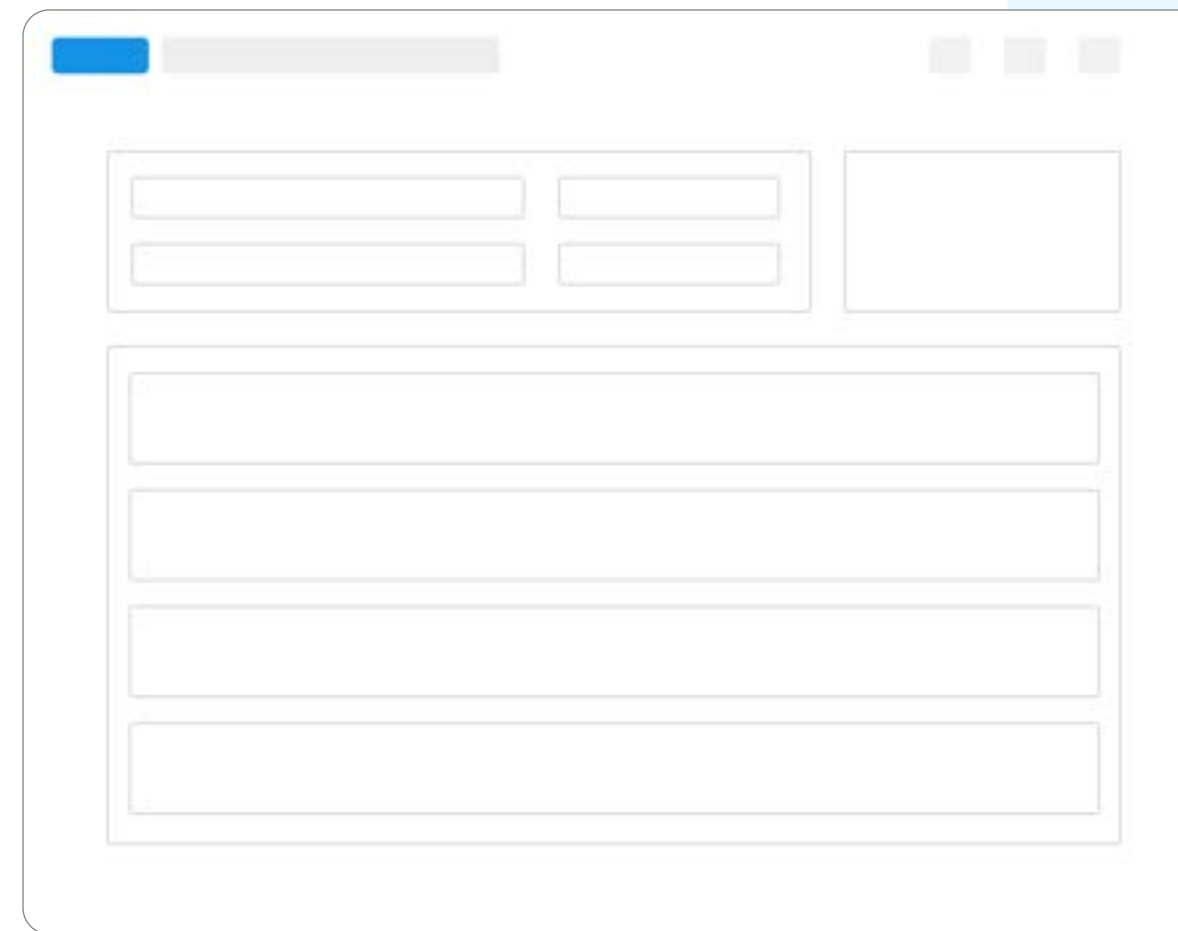

Designed a targeted job portal sub-brand for SAP with a strategic emphasis on features and user flows, geared for an efficient release of a lean Minimum Viable Product (MVP).
Developed a well-defined Information Architecture through component-based design, minimizing dependencies for a flexible transition from MVP to the final product.

- ⚡ Market Analysis & User Research
- ⚡ Brand Identity & Visual Design
- ⚡ High end information Architecture
- ⚡ Rapid Design & Prototyping

✓ Branding

Integrated a distinctive branding element into the job portal sub-brand for SAP, ensuring alignment with SAP's unique identity.

Design Journey

Converted business needs and user insights into a module-oriented information architecture, followed by the creation of wireframes.

Key Pointers

- Analyzed a specialized database focusing on job-seekers, hiring agencies, and freelancers, utilizing quantitative and statistical methods for a comprehensive understanding.
- Integrated insights from the database with contextual data provided by stakeholders, outlining crucial information flows.
- Developed task flows and organized them into a multi-layered information architecture, assigning business values to modules based on stakeholder validations and primary user testing.
- Produced an additional branding document to augment stakeholder pitches and enhance the overall project value.
