

LogiCole

INNOVATIVE | INTEGRATED | INTELLIGENT

HOW LOGICOLE BRINGS VALUE TO THE WARFIGHTER

LogiCole unifies supply chain, asset management, and assemblage readiness into one platform by eliminating uncertainty, accelerating decisions, and ensuring warfighters are equipped, supported, and ready wherever the mission takes them.

MVC1

CUSTOMER ORDERING AND INVENTORY MANAGEMENT

Authoritative Data

- Uses curated, referential, and authoritative data sources
- Impact:** One trusted source of meaningful data to improve readiness and accuracy

Standardization

- Established common business processes, business names, and organized data values
- Impact:** Faster logistics. More reliability

Inventory Visibility

- Product identification associated to DOD, industry, and global trade identifiers to create an Enterprise Product Identifier (EPI)
- Impact:** Right supplies. Right Place. Right Time.

MVC2

ASSET MANAGEMENT AND MAINTENANCE

Centralized Asset Control

- One system for all equipment (facilities and medical equipment)
 - Accessible asset location, maintenance plans, and asset conditions
- Impact:** Clear readiness posture

Maintenance Traceability

- Full service + parts history
- Impact:** Reliable equipment. Faster issue response.

Data-Driven Decisions

- Dashboards; Operational reports and Adhoc
 - Reporting and analytics
- Impact:** Faster leadership decisions

MVC3

ASSEMBLAGE MANAGEMENT

Allowance Management

- Real-time updates & alerts
- Impact:** Always aligned to mission requirements

Smart Replenishment

- Identifies excess, enables transfers, and allows budgetary forecasting
- Impact:** Saves time, money, and resources

Assemblage Visibility

- One view across all locations
- Impact:** Timely identification for mission response
