

Your business. Your vision.

Transform the way you see, manage, and control your business.
A new level of clarity, efficiency, and insight—right at your fingertips.

Load new vision of your business.

In today's fast-moving business world, clarity, speed, and control define success. Visionary is not just a tool—it's a complete digital experience, a new way to see and manage your business.

Visionary is a unified frontend that brings together all your critical business data from ERP, CORE Banking, CRM, DMS, SPV, PSD2, invoicing, analytics, and more into one seamless interface.

Visionary is more than a product. It's a mindset.

It's built for leaders who demand control, who see the bigger picture, and who take action with absolute clarity. It's the difference between reacting and leading.

Everything in One Place

No more switching between apps. Visionary connects banking, invoices, reports, and approvals into a single, clear view. The Overview Board gives you exactly what you need, when you need it.

Decide and Act Instantly

Data is only useful when you can act on it. Approve payments, track balances, and manage operations in real time. Smart automations help you focus on what matters.

Work Without Friction

Forget manual updates and lost information. Visionary syncs everything seamlessly, keeping your workflows structured and efficient.

A Premium, Intuitive Experience

Minimalist. Fast. Built for decision-makers. Visionary is designed for clarity, so you always stay in control.

Designed for the Future.

Powered by ELO.

Visionary is built on a strong foundation.

Powered by ELO, a leader in Enterprise Content Management (ECM), Visionary ensures a secure, scalable, and proven backend that integrates seamlessly with ERP, CORE Banking, CRM, and SPV.

We Don't Replace. We Enhance.

Visionary connects directly to your existing infrastructure, keeping documents, transactions, and approvals flowing effortlessly.

How We Use Technology.

- ✓ Structured Workflows – Data moves where it's needed, instantly.
- ✓ Smart Automation – Repetitive tasks, handled seamlessly.
- ✓ Advanced Search & Indexing – Find any document, approval, or transaction in seconds.

A New Way to Work.

More than organizing information—Visionary makes it actionable, intuitive, and effortless.

How It Works

Seamless Data Integration

Visionary connects directly to your business systems: ERP, CORE Banking, CRM, DMS, SPV, PSD2. Everything stays in sync, with real-time updates and no manual effort.

Smart Processing & Automation

Data flows through ELO's secure backend, where it's structured, indexed, and processed:

Automated workflows

Approvals, transactions, and document management happen instantly.

AI-powered search

Find any document or data point in seconds.

Real-time insights

Always up to date, always accessible.

Designed for Action

Visionary turns data into decisions. Customize your Overview Board, interact instantly with widgets, and stay connected seamlessly across mobile and web.

Effortless. Automated. Always in Control.

Redefine business management **We create the Visionary.**

Seamless banking, automated workflows, smart notifications, and a fully connected ecosystem—built for the way business should work.

Integrate. Automate. Control.

Visionary.

Design that redefines business interaction.

More than a look. It's the essence of how Visionary works.

Our design is not just about aesthetics. It's about creating a premium experience that transforms the way you interact with your business. Every feature, integration, and tool in Visionary follows this principle.

Clear, intuitive, and seamless.

Fast, fluid, and built for action.

Modular, adaptive, and personalized to your needs.

Visionary is designed to feel effortless - because business should move as fast as you do.

Experience. Personalize. Elevate.

Widgets. Shape your vision.

Visionary widgets redefine how businesses access and structure critical information. Fully customizable, they provide real-time insights and actions in a single, structured view—tailored to every company's needs.

Smart, modular, and actionable.

Widgets are the building blocks of Visionary, transforming complex data into a clear, dynamic, and interactive experience. Instead of navigating multiple systems, Visionary brings everything together in a fully customizable Overview Board, where every widget serves a purpose.

How Visionary Widgets Work:

Fully Customizable Layout

- Arrange and resize widgets to create a personalized dashboard that reflects your priorities.
- Add, remove, or adjust widgets based on what you need to track or manage.

Live Data, Always Up-to-Date

- Widgets pull real-time data from banking, invoicing, SPV, and enterprise systems—so you always see the latest information.
- No manual refresh needed—your Overview Board stays synced with your business.

Actionable Insights

- Visionary isn't just about viewing data—it's about using it instantly.
- Approve invoices, check balances, monitor cash flow, and manage documents directly from widgets, without opening separate apps.

Smart Automation & Notifications

- Visionary highlights what's important with alerts, smart recommendations, and automated workflows inside widgets.
- Stay ahead with reminders for approvals, due payments, or critical updates.

Seamless Integration with Your Business Systems

- Each widget connects to ERP, CORE Banking, CRM, SPV, and more, keeping everything in sync.
- Widgets work together, allowing information to flow effortlessly across different areas of your business.

A New Standard for Business Interaction.

Visionary Widgets are designed to give you control, clarity, and efficiency, all in one place. No more wasted time searching for information, switching between apps, or dealing with outdated data.

With modular flexibility, real-time intelligence, and seamless execution, Visionary redefines how you interact with your business. Every decision, every action, every insight—faster, smarter, and exactly when you need it.

[**See More. Know More. Do More.**](#)

One view. Total control.

Visionary connects all your business accounts in one place, providing real-time visibility over balances, transactions, and cash flow. Stay informed and make financial decisions effortlessly.

Banking Integration.

All your accounts. One view.

Managing business finances shouldn't mean switching between banking platforms. Visionary seamlessly integrates with your bank accounts, giving you a unified, real-time financial overview—right where you need it.

How Visionary Banking Works:

All Your Bank Accounts in One Place

- Instantly connect multiple business accounts across different banks.
- See real-time balances, transactions, and cash flow without logging into multiple banking apps.

Seamless PSD2 Integration

- Secure, direct connections to your bank, ensuring instant data synchronization.
- Compliance with PSD2 standards for secure financial data management.

Smart Financial Insights

- Track cash flow, monitor expenses, and get automated financial summaries.
- Identify trends, anomalies, and upcoming payments before they impact your business.

Fast and Secure Transactions

- Approve and initiate payments directly from Visionary.
- Get real-time payment status updates, so you're always informed.

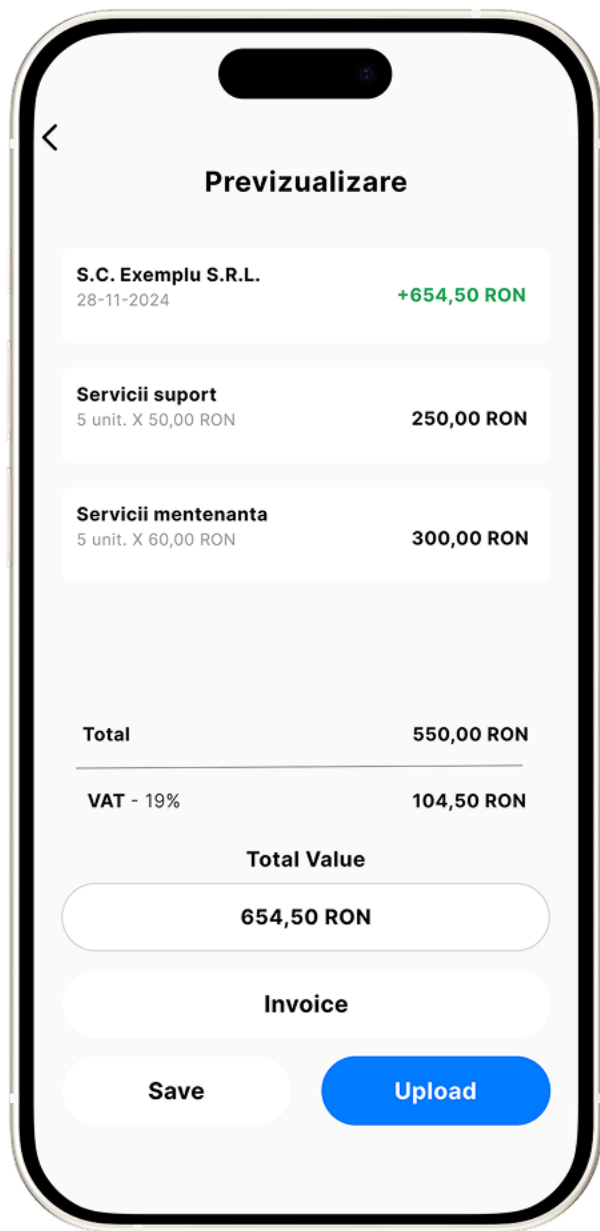

Integrated with Your Business Tools

- Banking data syncs with invoices, SPV records, and financial reports for a complete business overview.
- Easily match transactions with invoices and automate reconciliation.

A Smarter Way to Manage Finances.

With real-time banking data, instant approvals, and seamless integrations, Visionary makes financial management effortless. Know where your business stands—at all times.

One View. Total Control.

Your invoices. Always in sync.

Automatically retrieve invoices and tax documents from SPV, keeping everything structured, accessible, and up to date—without manual effort.

Invoice management

Automate, track and control your invoices.

Dealing with invoices and tax documents shouldn't be a hassle. Visionary connects directly to SPV, ensuring all your financial records are instantly accessible, structured, and automated. Say goodbye to manual downloads and scattered documents—everything you need is in one place, ready for action.

How Visionary SPV Integration Works:

Automatic Invoice Retrieval

- Visionary connects directly to SPV, retrieving issued and received invoices in real time.
- No need to log in manually or download documents—your invoices are always up to date and stored securely.
- Automatic synchronization ensures that every invoice is captured the moment it's available.

Real-Time Tax & Financial Overview

- All your invoices are organized in one structured dashboard, eliminating the need to search through multiple systems.
- Track outstanding payments, due dates, and tax obligations instantly.
- Keep a clear view of financial records, VAT reports, and regulatory documents, ensuring compliance without effort.

Approval, Verification & Compliance

- Approve, dispute, or verify invoices directly within Visionary—without switching between platforms.
- Ensure compliance by keeping all financial records structured and always accessible.
- Audit-ready document storage—always find the invoice you need, when you need it.

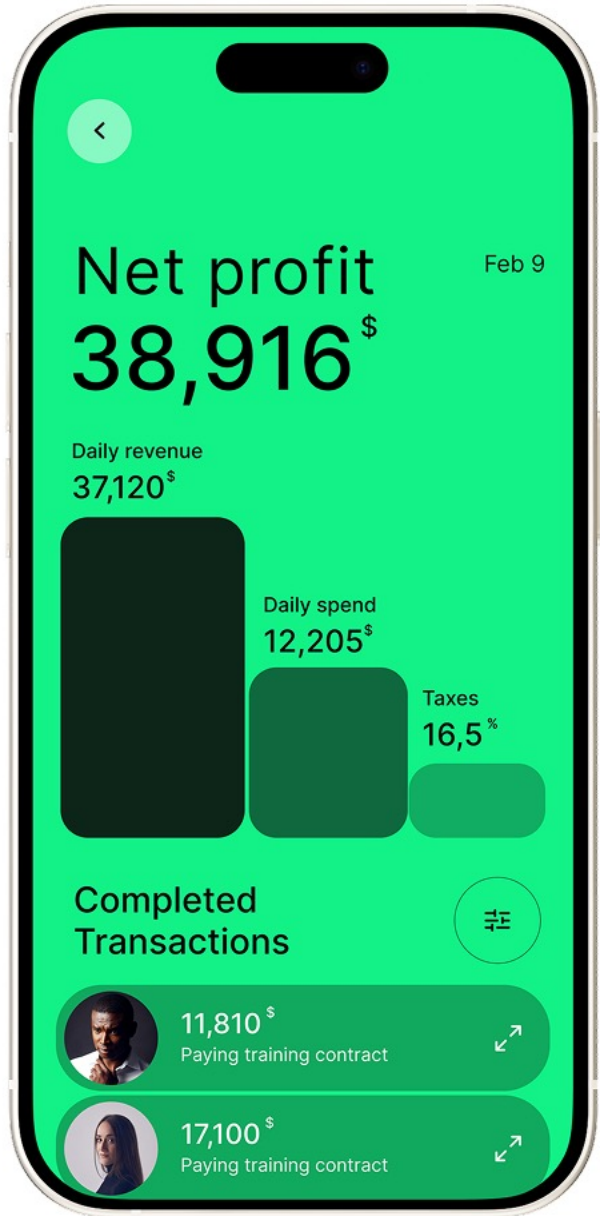

Seamless Integration with Banking & Accounting

- Match invoices with payments, bank transactions, and cash flow automatically.
- Reduce manual reconciliation by syncing financial data directly with your accounting system.
- Get a full financial picture by linking invoices with bank statements, tax records, and financial reports.

A Smarter, More Efficient Way to Handle Invoices.

With real-time SPV access, automated invoice tracking, and seamless financial integration, Visionary eliminates the complexity of invoice management. You see everything, act instantly, and stay in control.

No More Manual Work. No Delays.

Approve & Pay. Track.

Seamlessly match invoices with payments, approve transactions, and process payments directly within Visionary, all in one integrated workflow.

Invoice Pay

Connect invoices with payments, seamlessly.

Managing invoices and payments shouldn't be separate processes. Visionary bridges the gap between invoicing and banking, allowing you to track, approve, and pay invoices in one seamless workflow.

How Visionary Invoice Pay Works:

Instant Invoice-to-Payment Matching

- Every invoice retrieved from SPV is automatically matched with corresponding bank transactions.
- No more searching or manual reconciliation—Visionary links invoices and payments in real time.

Approve & Pay Directly from Visionary

- Review, approve, and schedule payments without switching between banking and invoicing platforms.
- Pre-filled payment details ensure accuracy, eliminating manual errors.
- Payment status updates instantly—know when an invoice is paid, pending, or overdue.

Smart Payment Automation

- Set up automatic payment workflows for recurring invoices or preferred suppliers.
- Get notified when a payment is due or an invoice needs approval.
- Avoid delays and penalties with scheduled and priority payments.

Seamless Integration with Banking & Accounting

- Payments are securely processed via direct PSD2-compliant banking integrations.
- Every payment is logged, categorized, and linked to financial reports and cash flow dashboards.
- Keep a clear audit trail, ensuring all invoices and payments are always accounted for.

A Smarter, More Efficient Way to Handle Payments.

With real-time invoice matching, automated approvals, and seamless banking integration, Visionary eliminates manual processing, reduces errors, and gives you total financial clarity.

Approve. Pay. Track. Done.

Sign & Approve. Done.

Legally compliant, secure, and effortless—sign and approve documents instantly, without switching between platforms.

Digital signature.

Secure, fast and legally compliant.

Approving and signing documents shouldn't be a slow or complicated process. Visionary integrates secure digital signatures, allowing you to sign, approve, and validate documents directly within the platform—quickly, securely, and with full legal compliance.

How Visionary Digital Signature Works:

Sign Documents Instantly

- Approve and sign invoices, contracts, and approvals directly within Visionary—no need to print, scan, or email.
- Legally compliant digital signatures ensure documents are valid and enforceable.

Secure & Verified Signatures

- Visionary supports qualified digital signatures (QES) for maximum security and legal recognition.
- Documents are encrypted and timestamped, ensuring authenticity and compliance with industry regulations.

Streamlined Approval Workflows

- Signatures are integrated into approval processes, reducing delays and manual follow-ups.
- Automatic notifications ensure that documents move from approval to signature to execution without friction.

Seamless Integration with Business Operations

- Signed documents are instantly stored in your SPV, DMS, or ERP for easy access.
- Signature status updates are reflected in real time—track which documents are signed, pending, or awaiting approval.

A Smarter, More Secure Way to Sign.

With secure, legally recognized digital signatures, real-time tracking, and automated workflows, Visionary makes signing documents as easy as a click. No delays, no paperwork—just instant approvals and total security.

Sign. Approve. Done.

All your files. Perfectly organized.

Automatically collect documents from integrations or upload manually, with smart categorization and instant access from anywhere.

Upload & Storage

Keeping track of important documents shouldn't be a challenge. Visionary centralizes all your business documents—whether they come from integrations or manual uploads—so you always have structured, secure, and instant access to everything.

How Visionary Document Management Works:

Seamless Integration with SPV, Banking & Business Systems

- Documents from SPV, banking transactions, invoices, contracts, and approvals are automatically retrieved and stored in a structured format.
- No need to download and re-upload—everything syncs in real time.

Manual Uploads, Smart Organization

- Easily upload, categorize, and tag documents manually.
- AI-powered indexing ensures that files are automatically classified and easy to retrieve.

Instant Search & Access

- Advanced search and filtering let you find any document in seconds.
- Access files from anywhere, on any device, with a secure, cloud-based storage system.

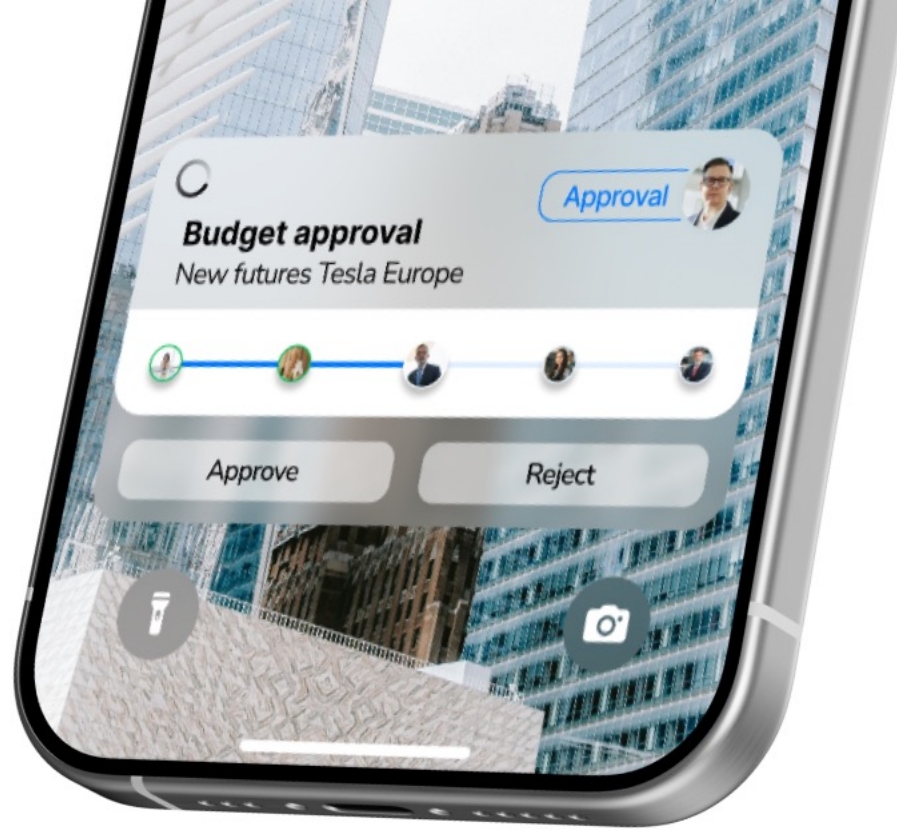

Secure, Compliant, and Always Up to Date

- Documents are encrypted, timestamped, and stored securely to meet legal and compliance requirements.
- Automatic versioning ensures that you always work with the latest document, while preserving historical records.

One Place for Everything That Matters.

With automated document retrieval, smart uploads, and instant access, Visionary eliminates lost files, manual tracking, and disorganized storage. Your documents, structured and ready when you need them.

Upload. Store. Access. Done.

Notifications. Stay in control.

Visionary Notifications keep you connected to what matters most.
Delivering real-time insights, seamless actions, and effortless decision-making.

Stay ahead. Act instantly.

Notifications in Visionary are more than just alerts—they are smart triggers that keep you informed, help you act faster, and ensure nothing important gets overlooked. Every notification is designed to be relevant, actionable, and perfectly integrated into your workflow.

How Visionary Notifications Work:

Real-Time Alerts, No Delays

- Get instant updates on transactions, approvals, invoices, and key business events.
- Notifications are synced across mobile and web, so you're always connected.

Smart & Contextual

- Visionary doesn't just notify—you get intelligent insights tailored to your role.
- Alerts are prioritized based on urgency, helping you focus on what truly matters.

Actionable from Anywhere

- Approve payments, review reports, or respond to requests directly from the notification panel.
- No need to open multiple apps—everything happens in one place.

Customizable & Adaptive

- Choose what notifications you receive and how—push notifications, email alerts, or in-app updates.
- Notifications adjust dynamically based on your activity and preferences.

Seamless Business Integration

- Notifications pull data from banking, invoicing, SPV, and enterprise tools, ensuring all critical updates reach you instantly.
- Every interaction is logged and structured, keeping your workflow organized.

A New Standard for Business Awareness.

Visionary Notifications keep you in control, eliminating blind spots and unnecessary delays. Whether it's an urgent approval, an incoming payment, or a workflow update, you'll know exactly when to act.

With real-time intelligence, smart prioritization, and instant execution, Visionary ensures you never miss a step. Decide faster, move smarter, and stay ahead—always.

Stay Informed. Stay in Control.

Visionary. **A new way to see your business.**

Transform the way you manage, track, and act on critical business data. With real-time insights, intuitive design, and seamless automation, Visionary gives you complete control—exactly when you need it.

Clear. Smart. Effortless.

Visionary.

A new way to see your business.
