

BITNORDEX

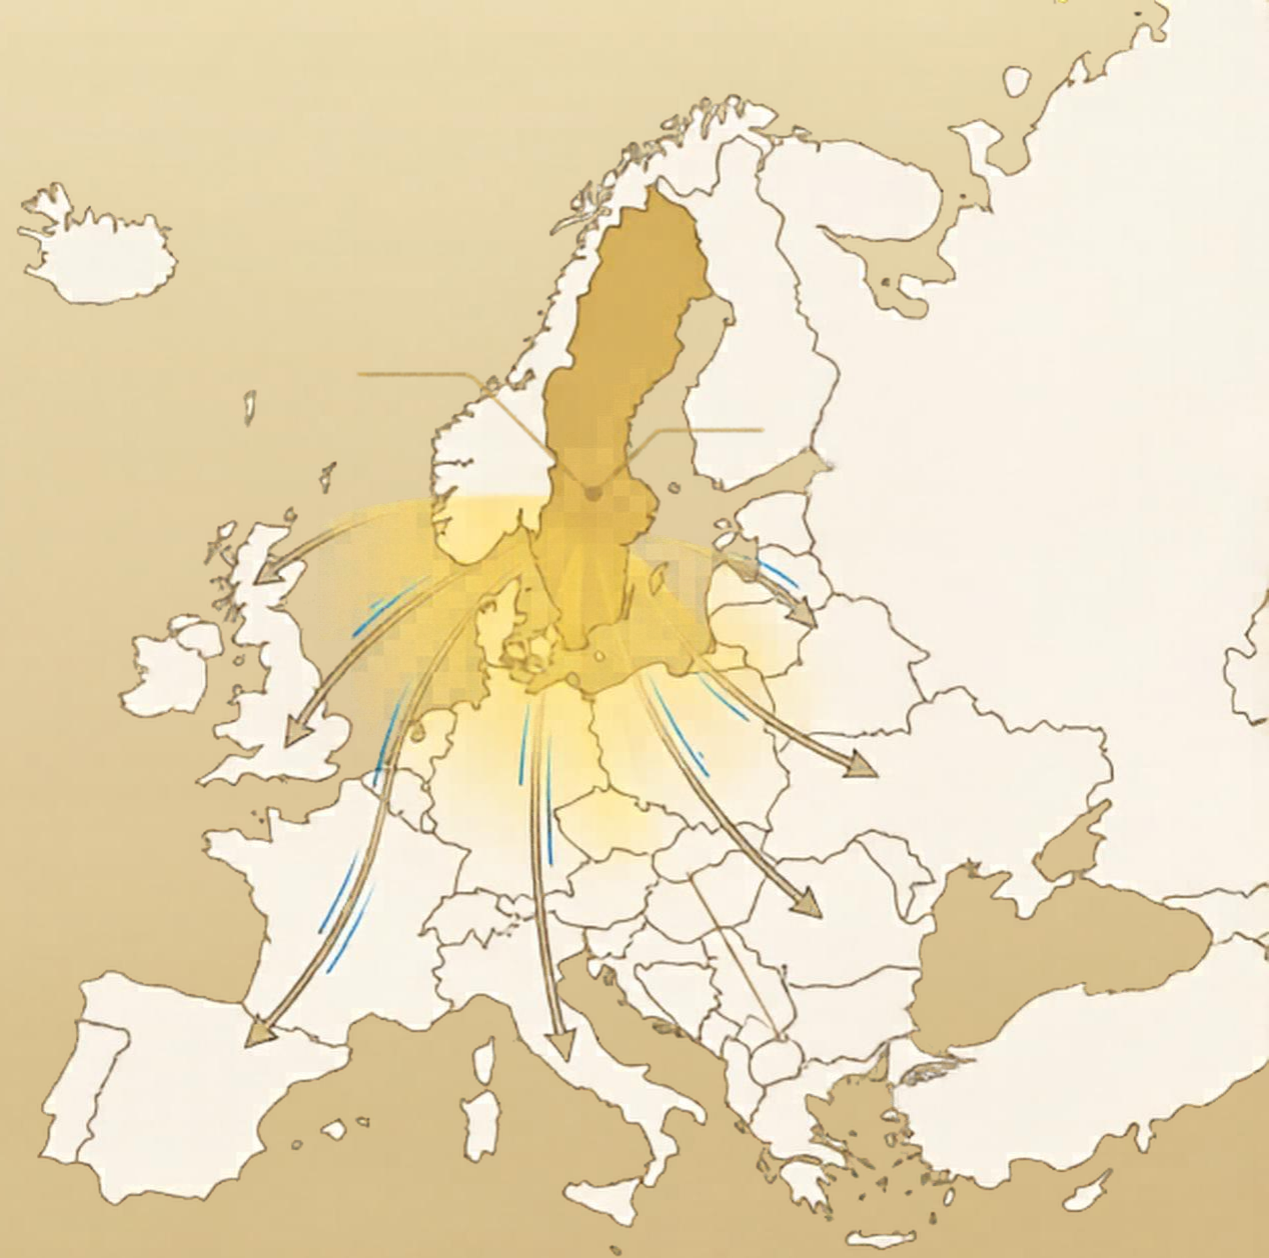

**A European Crypto-Asset Trading
Platform Preparing for **MiCA** Compliance**

**Institutional-grade trading infrastructure, fiat
rails, and utility token launched from Sweden.**

Europe's regulated crypto opportunity

MiCA is transforming Europe into a unified regulated crypto market.

A major opportunity is emerging for compliant exchanges that combine trading infrastructure, fiat rails, custody, and institutional connectivity.

MiCA
harmonisation

Compliance-driven
consolidation

Institutional
demand

Regulated
infrastructure gap

A Fragmented and Low-Trust Market

Crypto users still face friction across regulation, fiat access, trust, institutional infrastructure, and user experience

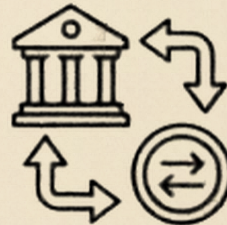

Regulatory Fragmentation

National regimes created uneven standards and market uncertainty.

Trust Deficit

Offshore exchange failures increased demand for regulated venues

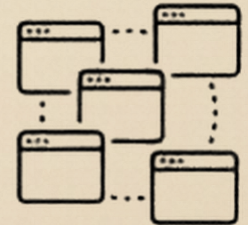

Fiat Friction

SEPA, SWIFT, and stablecoin settlement remain operational bottlenecks

Institutional Access Gap

Institutions need compliant venues with FIX-API connectivity and custody

Fragmented UX

Users still rely on multiple apps for trading, wallets, fiat, and reporting

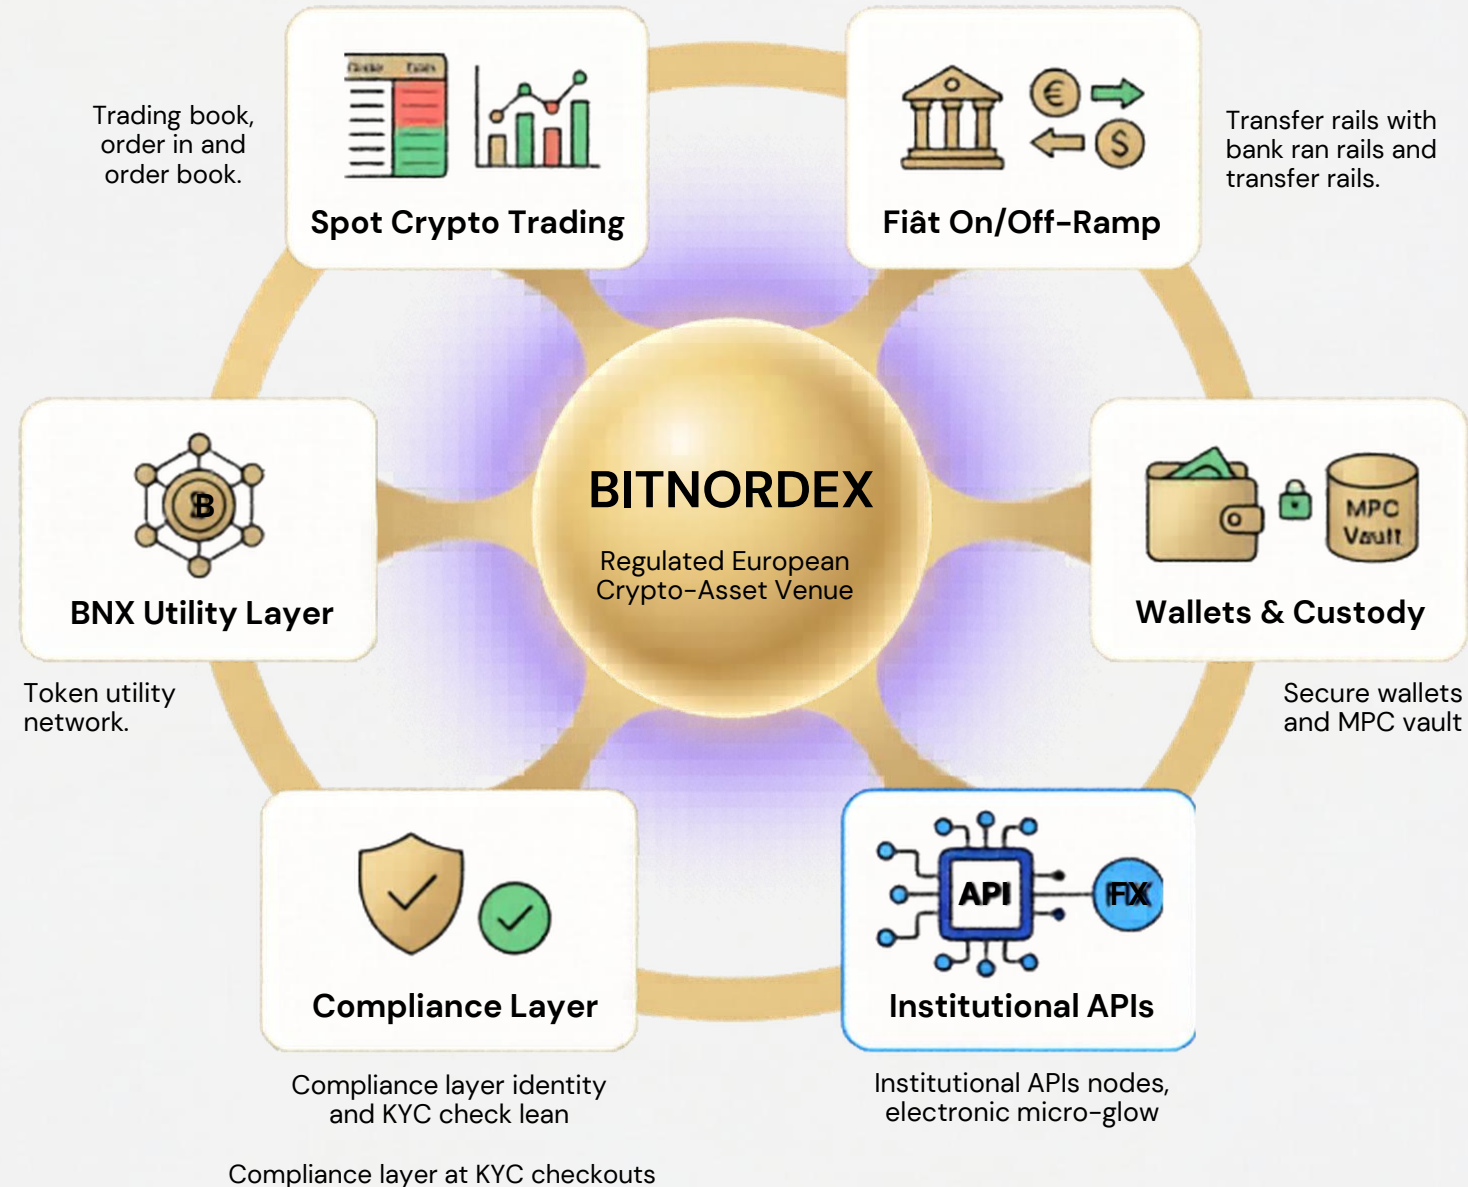

Result: high friction, weak trust, and fragmented user experience

One Regulated Venue. One Unified Crypto-Finance Experience.

Bitnordex consolidates

- trading,
- fiat access,
- custody,
- institutional connectivity,
- compliance,
- token utility

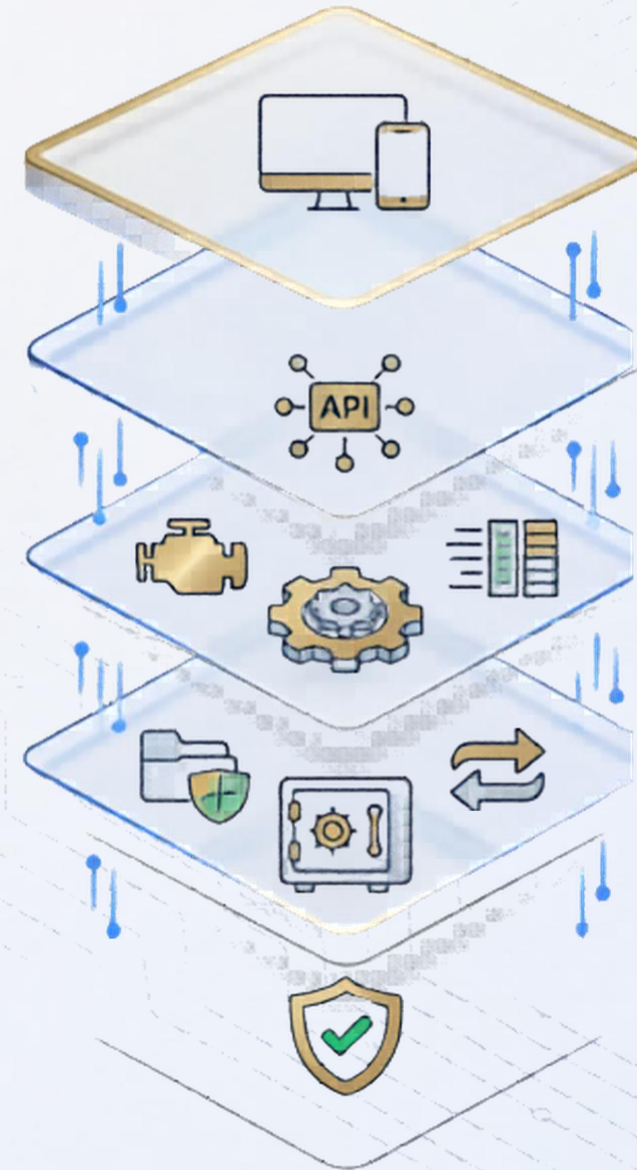

into one regulated European platform.

Institutional-Grade Product Stack

Bitnordex is built as a complete trading platform for retail, professional, and institutional users.

Built for retail accessibility and institutional execution.

Interface

Web platform, mobile interface, professional terminal

Connectivity

FIX API, REST API, WebSocket API

Trading Engine

High-performance matching engine, market data, order management

Settlement & Custody

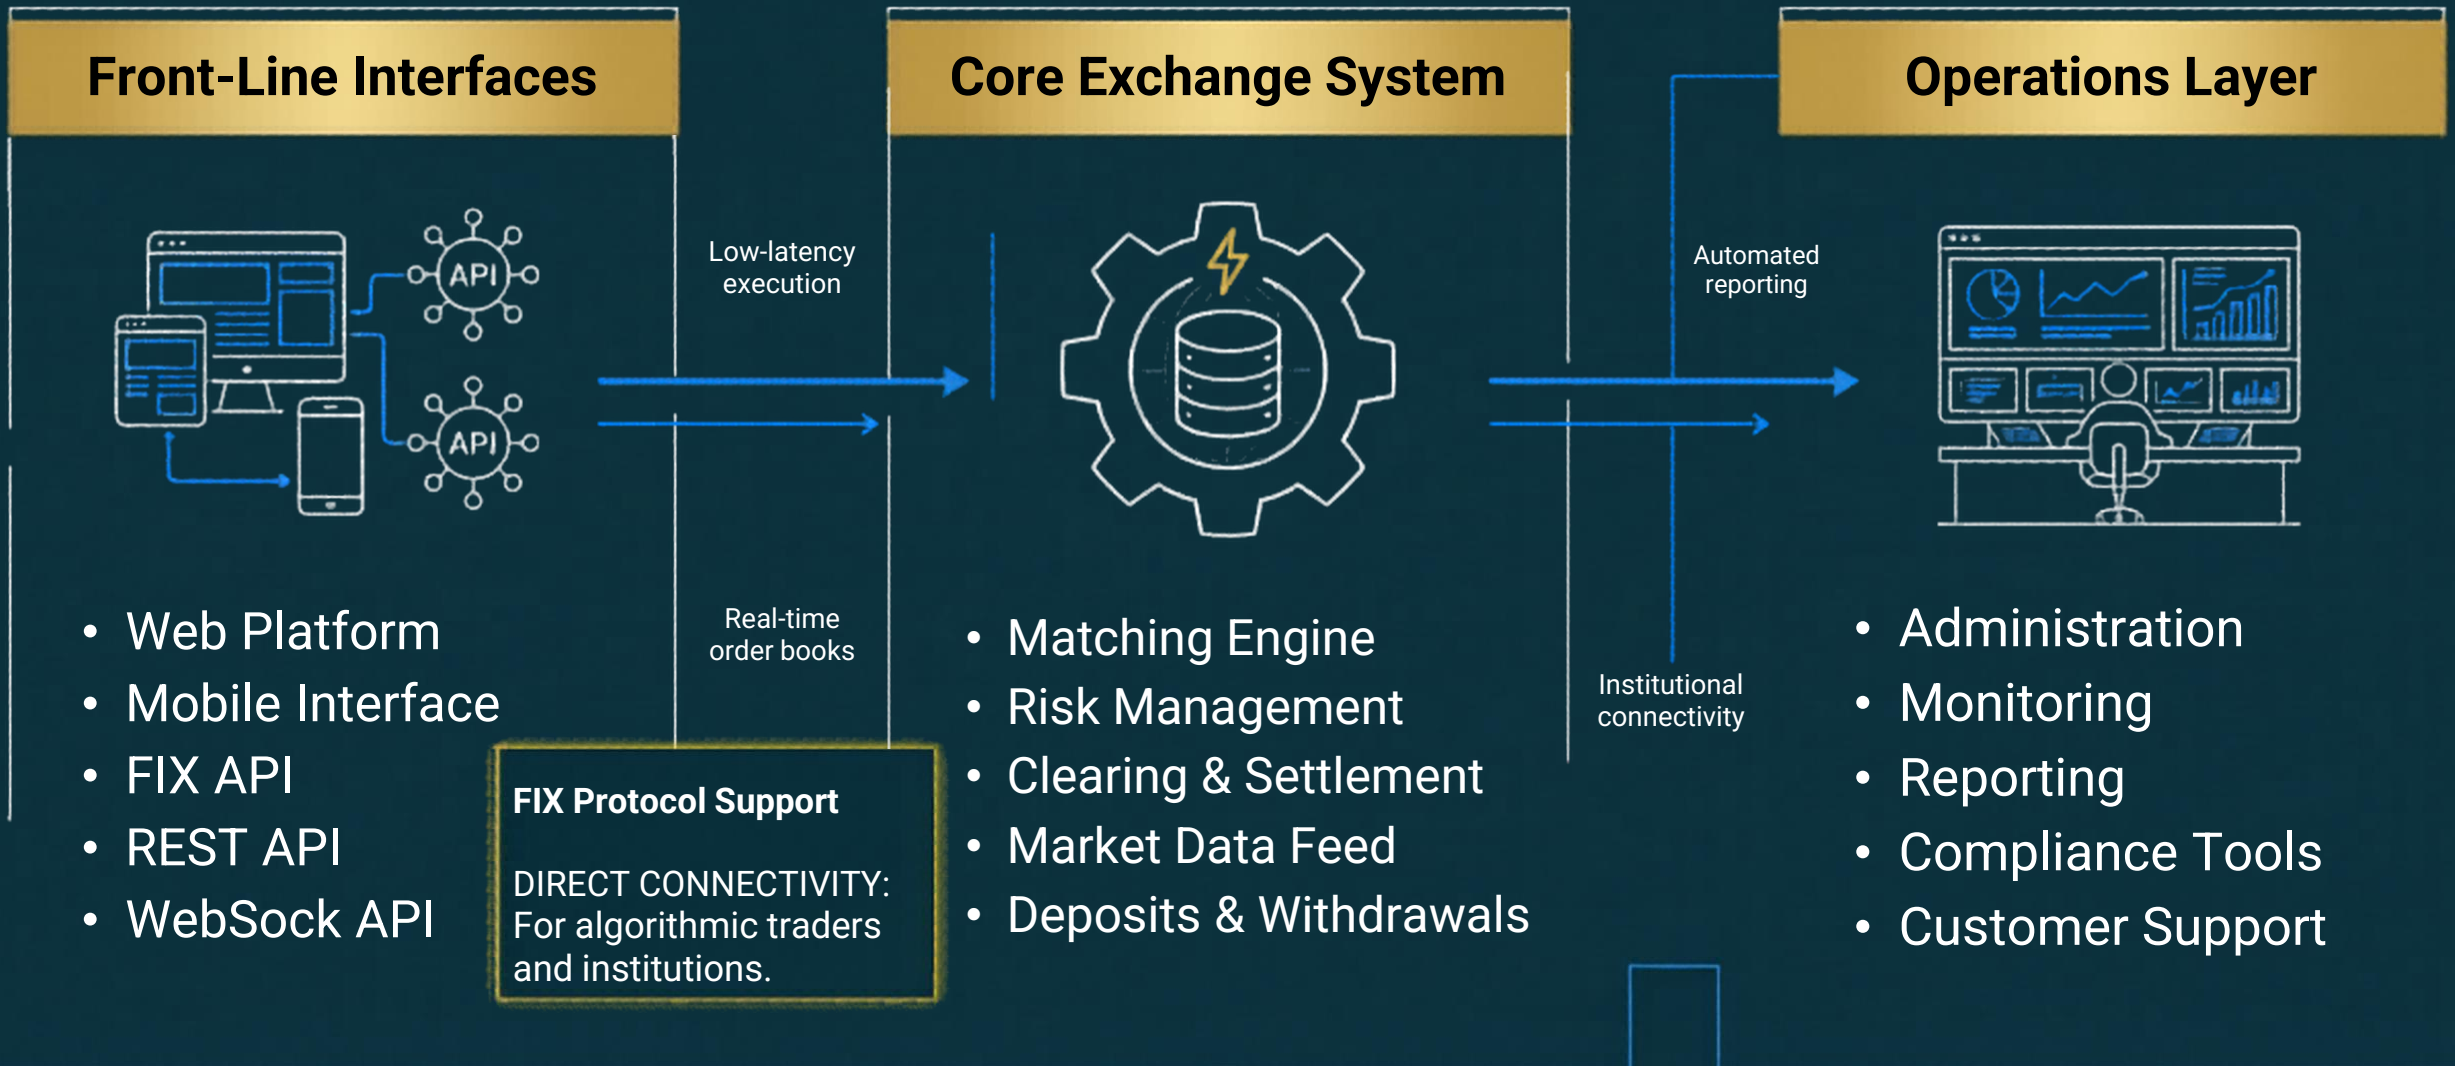

Fiat rails, custodial wallets, MPC, cold storage

Compliance

KYC, AML, sanctions screening, transaction monitoring

Built for Professional and Algorithmic Trading

Bitnordex supports institutional-grade trading connectivity through FIX, REST, WebSock, real-time market data, and core risk infrastructure.

Positioned for the MiCA Era

Bitnordex is aligning its operations with the European regulatory framework for crypto-asset service providers.

BNX Utility Layer

BNX is the native ERC-20 utility token designed to support platform usage, loyalty, and ecosystem participation.

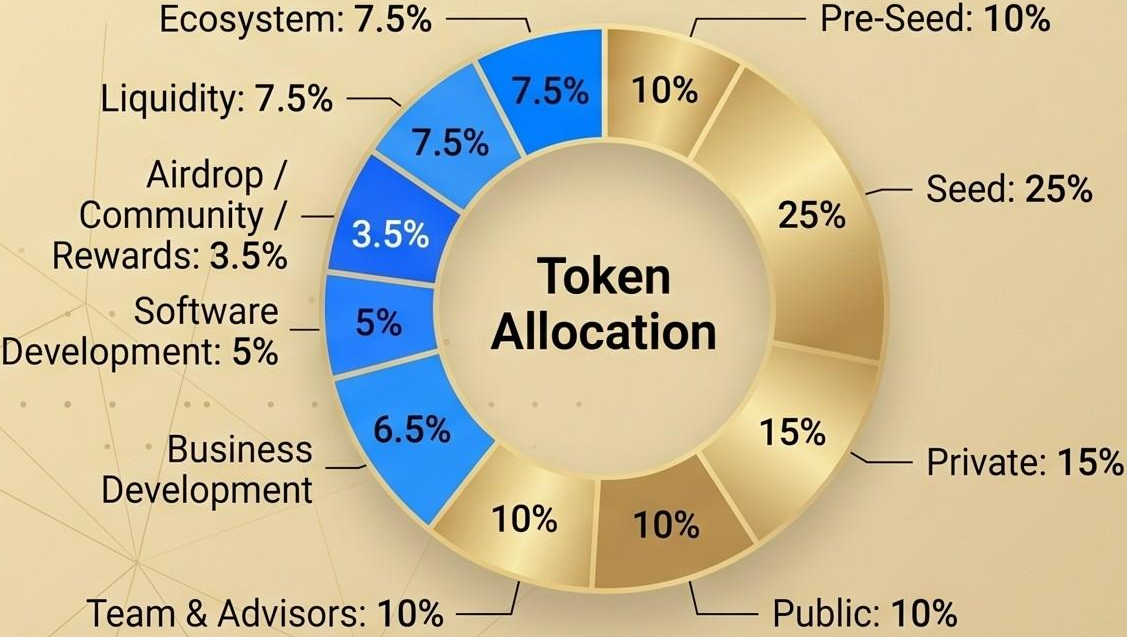

BNX is a utility token, not a security or investment product.

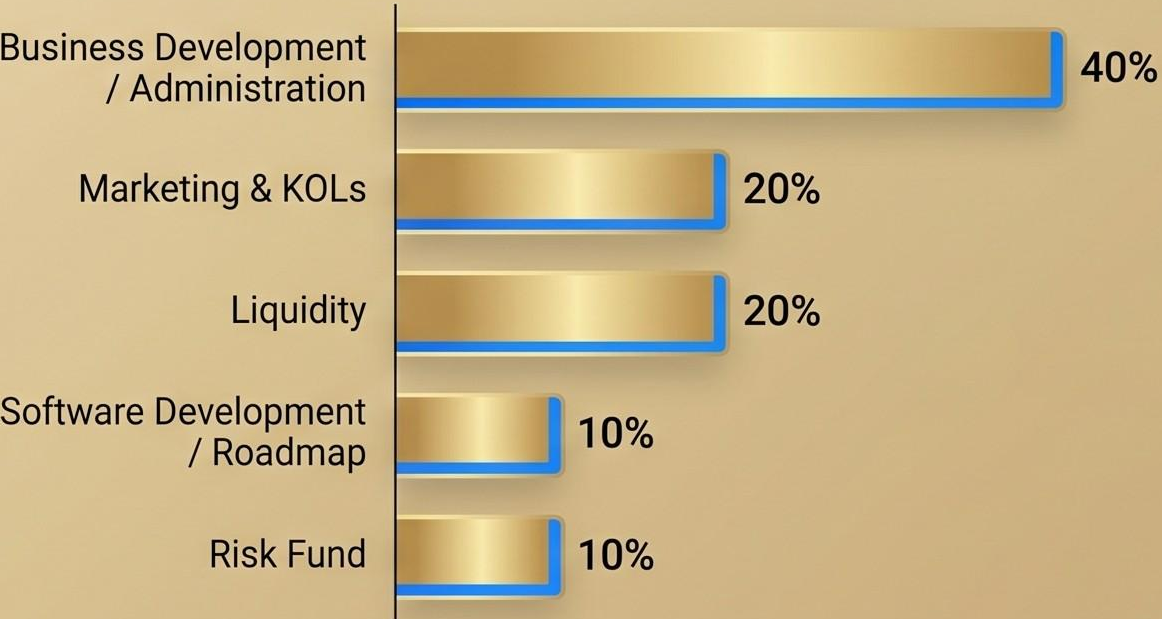

BNX Token Metrics

 Total Supply	 Public Sale Price	 Initial Market Cap	 Amount to be Raised	 Fully Diluted Market Cap
200,000,000 BNX	€0.05	€425,000	€3,800,000	€10,000,000

Token Allocation

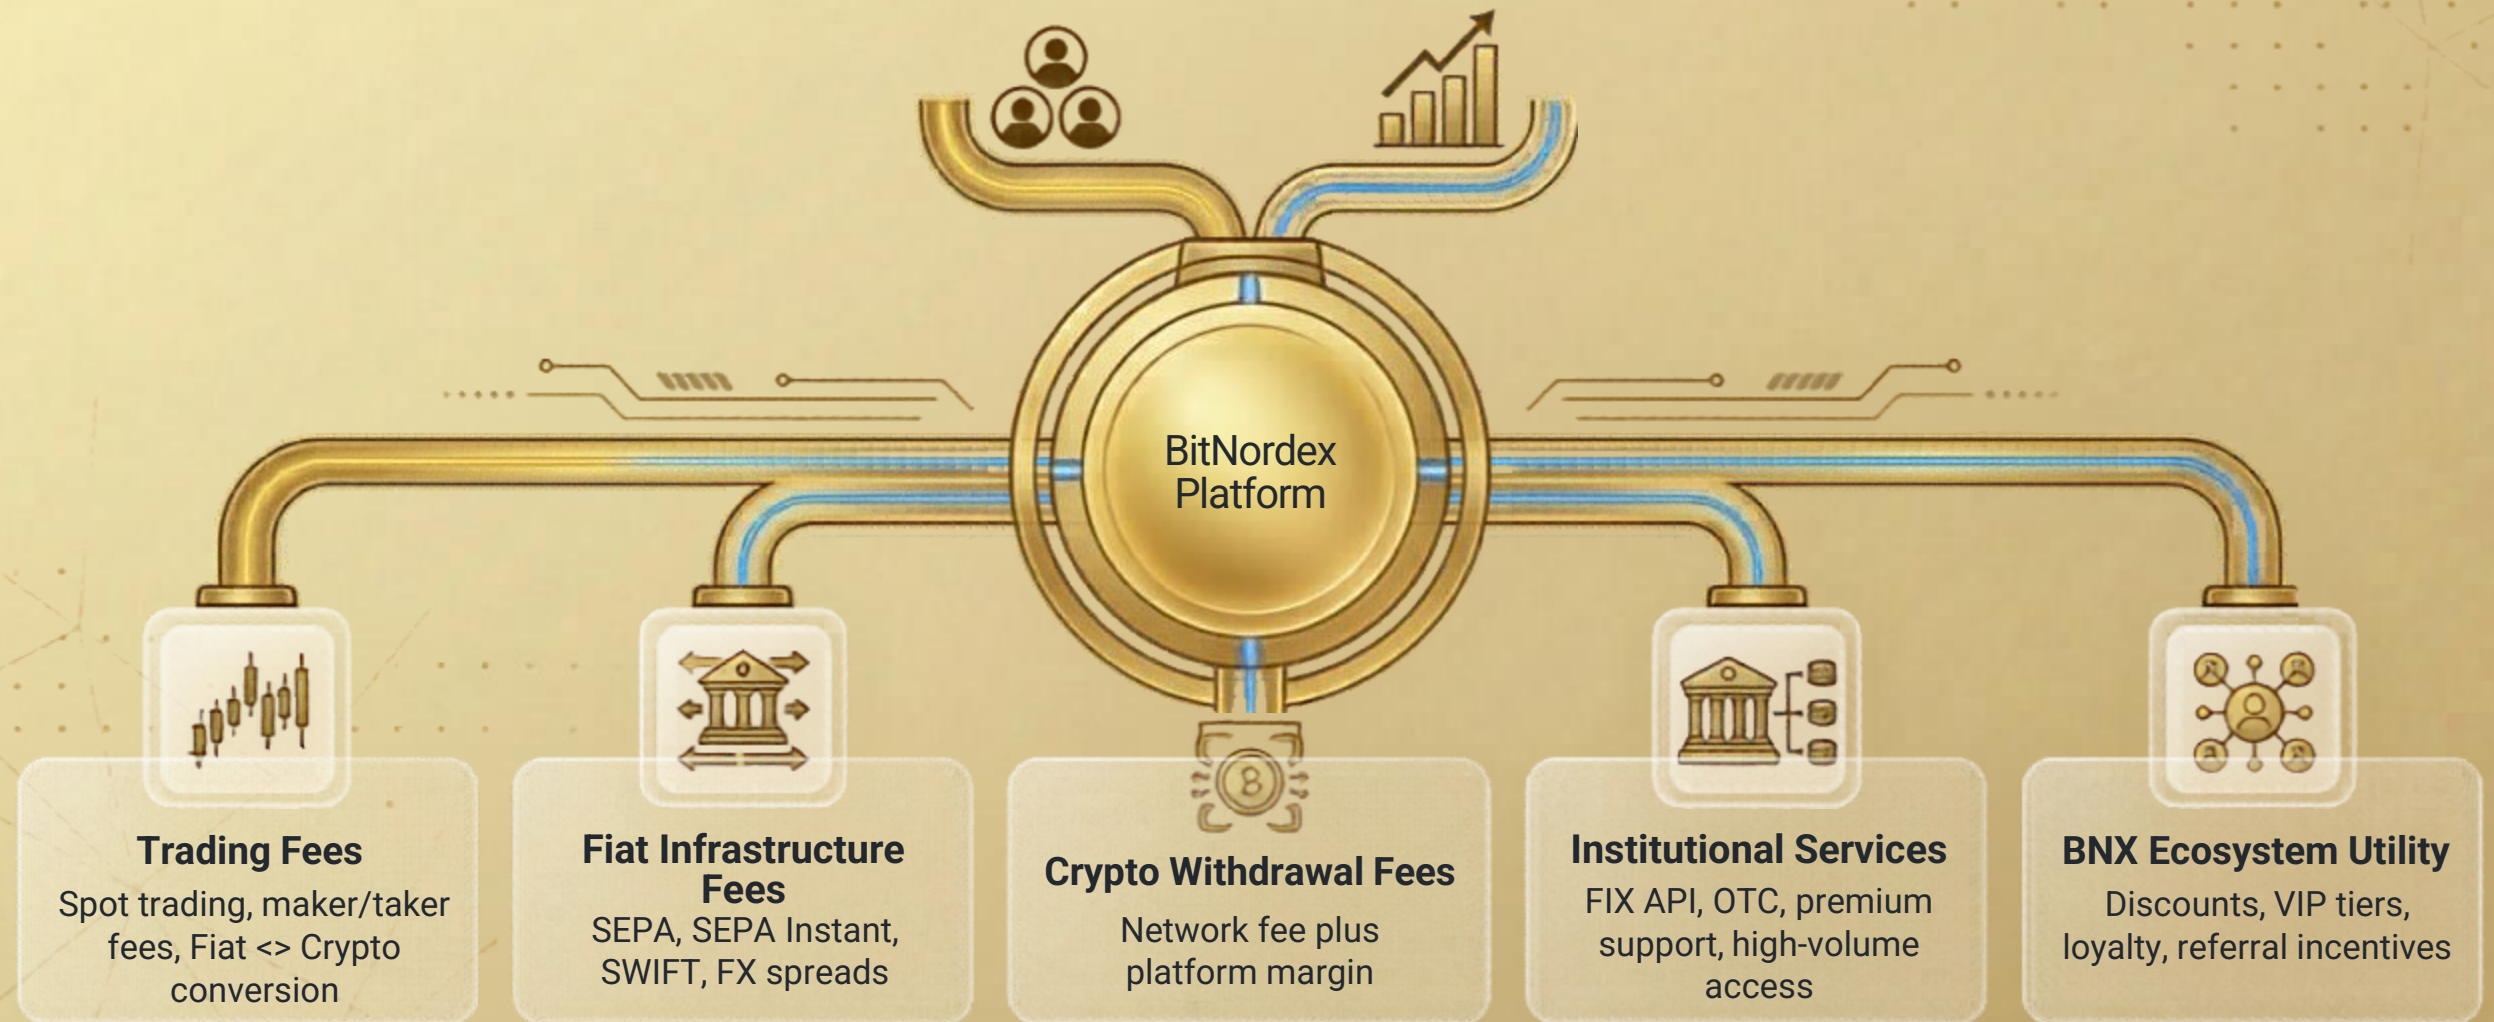

Use of Proceeds

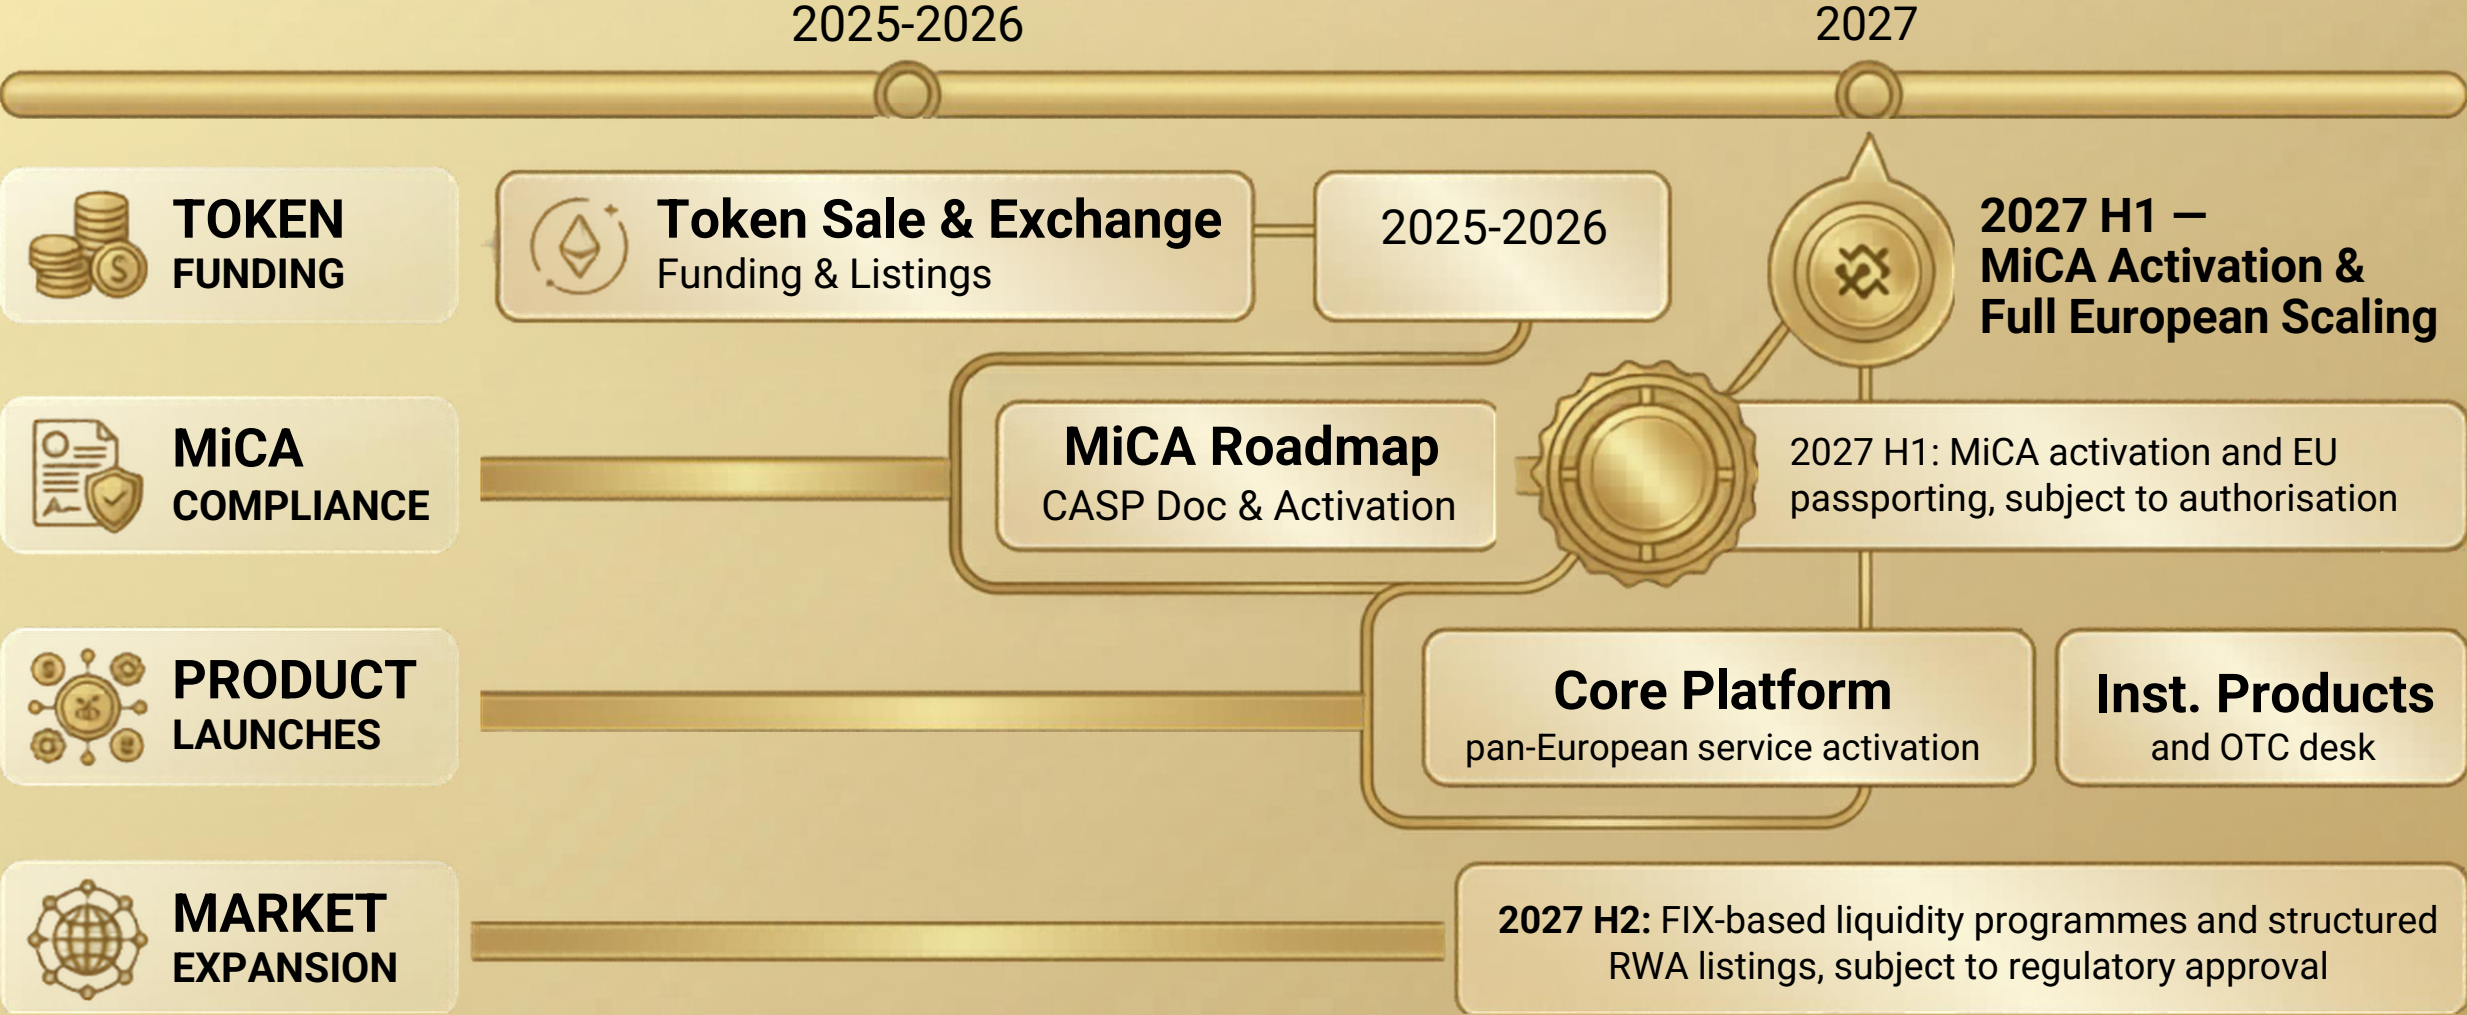

Revenue Engine

BitNordex generates transaction-based revenue from trading activity, fiat infrastructure, crypto withdrawals, institutional services, and BNX-driven ecosystem utility.

Execution Roadmap

Bitnordex is executing across token, regulatory, product, and expansion tracks.

Experienced Leadership Team

Bitnordex is led by operators with experience across finance, trading, cybersecurity, investment, marketing, and crypto infrastructure.
