- ✓ Picking
- ✓ Packing
- ✓ Shipping
- ✓ Backorders
- ✓ Orders fulfillment
- ✓ Real-time visibility
- ✓ Real-time inventory
- ✓ Parts and assets tracking
- ✓ Scanning and Barcoding
- ✓ Serial Number
- ✓ Lot Number
- ✓ Expiration Date

# Addressed storage x10 times increased order fulfillment for the UAE spare parts e-com APM.group

The warehouse, a critical hub in APM.group's supply chain, was split into two main areas: the front half stored bulky and sometimes damaged items like windshields, while the back half housed rows of plastic bins for addressed storage.

## Problem

The lack of synchronisation between inventory and digital records not only affected operational tempo, but also negatively impacted customer satisfaction, highlighting the urgent need for a streamlined, technology-driven solution

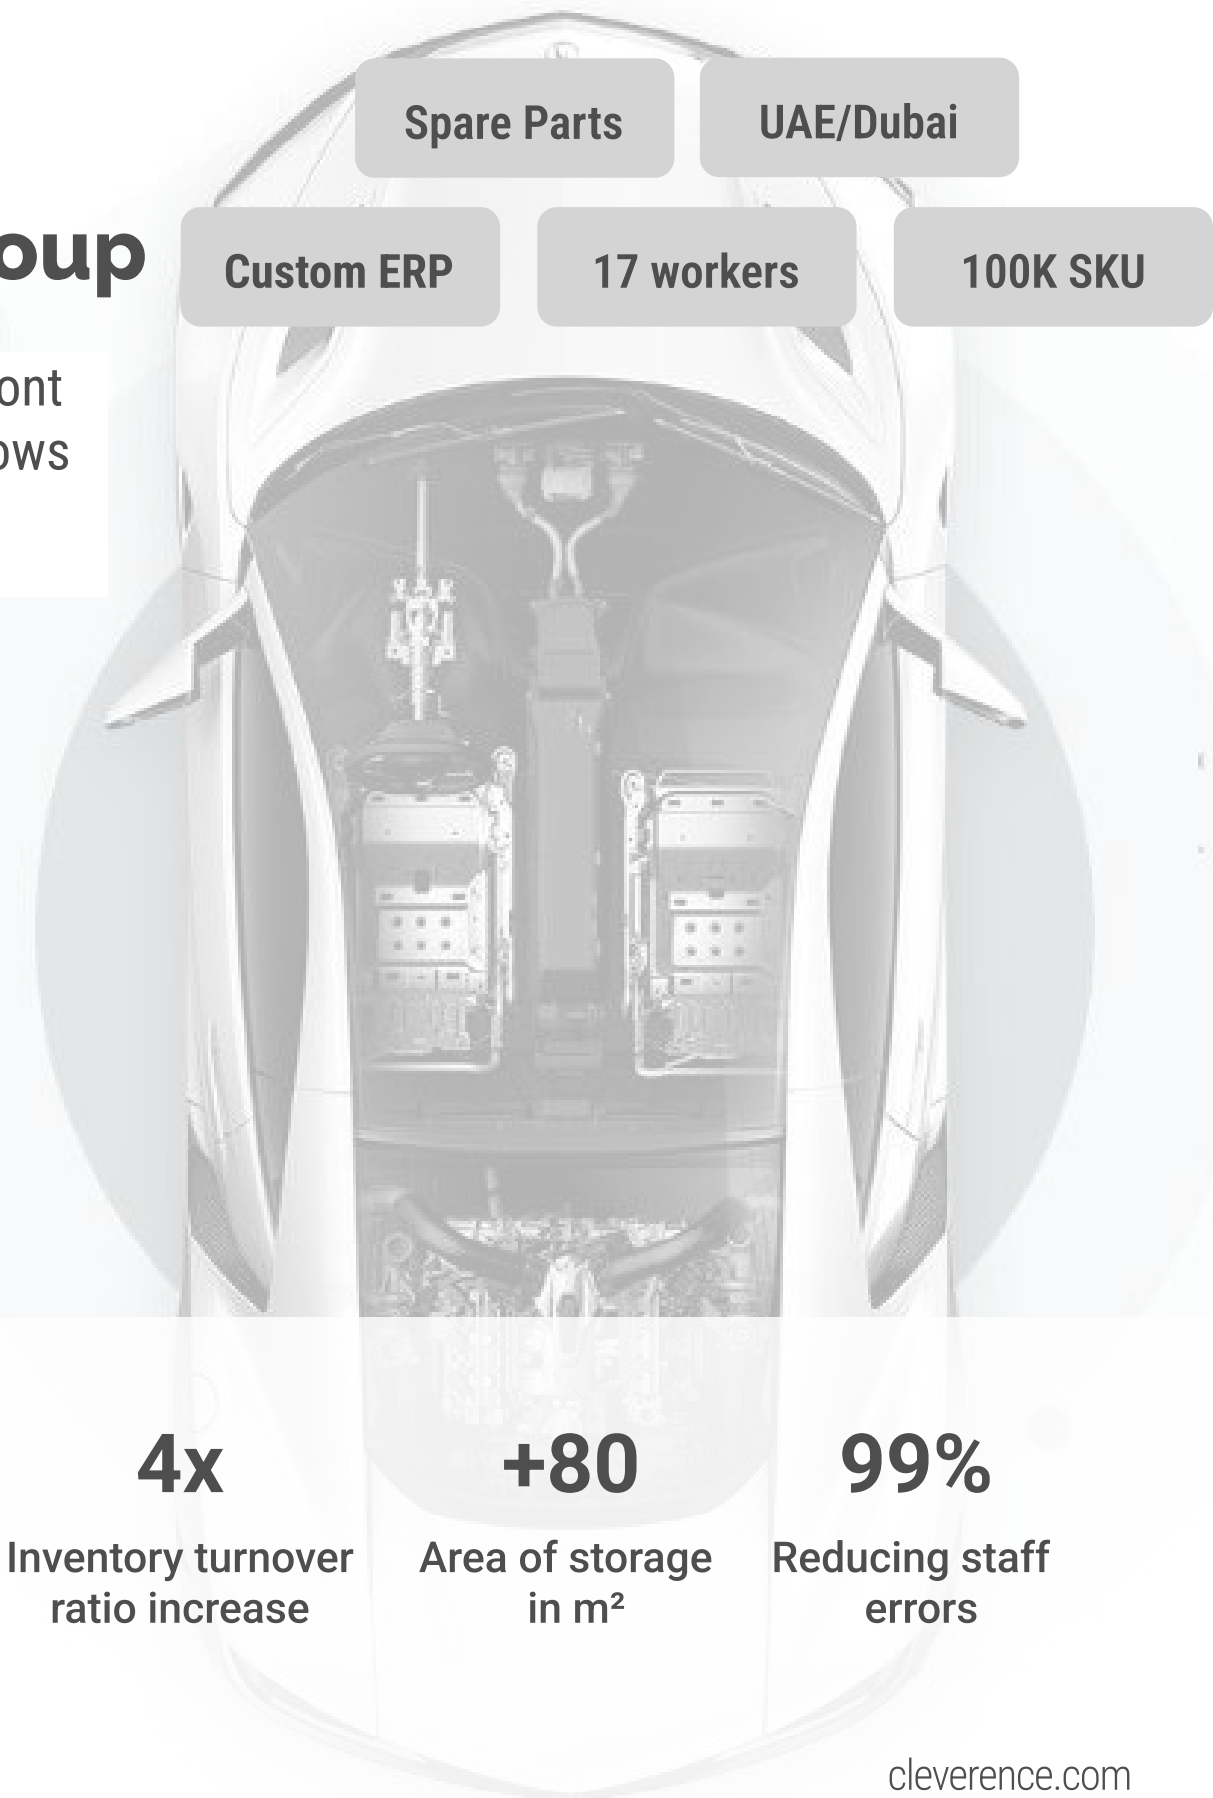

## Solution

Cleverence, introduced Zebra 3300 mobile computers and software to modernize Apm.group's warehouse operations – implementation focused on making operations mobile: delivery plan document, order supplier document, placement in the Cell and collected orders for shipment

## Result

The strategic shift to mobile operations significantly reduced manual data entry and physical trips to verify information, leading to a marked increase in processing accuracy and speed.

17 mobile devices in use.

# 99% error-decrease with x2 surge in manufacturing for The Blacksmith Coffee roastery in the UAE

The Blacksmith Coffee Company specializes in roasting and selling specialty coffee – they offer their high-quality products in both their own coffee shops and to private customers

## Problem

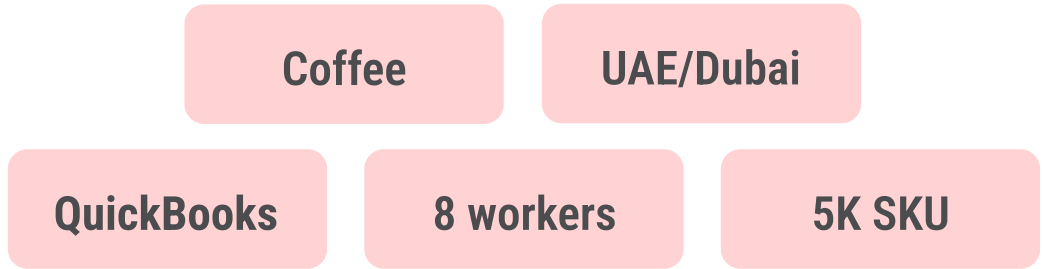

Company needed a more effective process control system that would lead to a reduction in the number of errors that occurred from time-to-time

## Solution

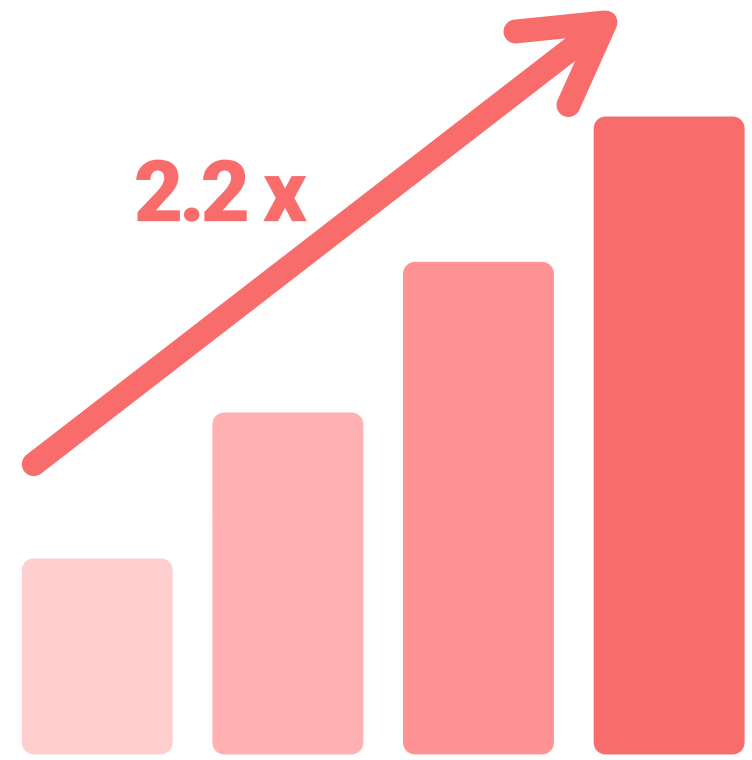

The introduction of the “Industry” software was a significant step that enabled the company to digitalize the entire coffee production process, from receiving raw materials in the warehouse to delivering orders to customers

## Result

BCC has seen many benefits: increased production efficiency, optimized logistics and warehouse management, improved interactions with partners and customers, the opportunity to expand market and increase profits

BCC increased production efficiency, optimized logistics and warehouse management

# Typical Project

## Hardware

At customers choice

**2** ×  **Mobile Portable Computer**

**1** ×  **Label Printer**

## Software

**2** ×  Lifetime, CLEVERENCE:  
Warehouse 15,  
ADVANCED for  
integration with SAP

- One Cleverence software license is required to operate one PDT (Portable Data Terminal), mobile device.
