

SANTOSH NIDAVANI

UI/UX DESIGNER

nidavanisantosh1@gmail.com • +91 7996 819 359 • [Linkedin Profile](#) • [Behance Profile](#)

SUMMARY

I'm Santosh - I started my journey solving real-world problems through mechanical engineering, but somewhere along the way, I got curious about the digital side of things how people actually experience products, not just how they function. My curiosity led me to Aspira's UX/UI Design program, where I transitioned into crafting thoughtful, purposeful interfaces.

Now, I combine logic, structure, and empathy to design experiences that don't just "look good" they feel right. I'm keen to be part of a team that sees design as more than decoration but as a way to shape how people connect, act, and decide.

SKILLS

- Conduct User Research
 - Create User Persona
 - Writing User Stories
 - Prepare Scope Document
 - Create User Flow
 - Usability Testing
 - User Interface Designing
 - Mobile and Web Designing
 - Build Information Architecture
 - Paper & Digital Prototypes
-

SOFTWARE

- Figma
 - Framer
 - Adobe XD
 - Maze
 - Wix
 - AI Tools
 - Canva
-

PROJECTS

Movemate – Packers & Movers Booking App

[View case study](#)

Mobile App | UX/UI Design

- Designed the complete booking flow for a relocation app, allowing users to select services, enter locations, list inventory, and confirm bookings in 4 streamlined steps.
- Created user flows, wireframes, and high-fidelity UI screens for key features like provider comparison, inventory checklist, and in-app chat.
- Improved booking clarity and user trust by designing detailed provider profiles with ratings, licenses, and service history.
- Conducted competitor analysis and usability testing to identify pain points and reduce booking friction.
- Designed a lightweight, mobile-first interface optimized for quick decision-making and simplified task completion.
- Integrated UX writing throughout the app for tooltips, CTAs, and form guidance to enhance user confidence and reduce drop-off.

Mindboard – Therapist Appointment Dashboard

[View case study](#)

Web App | UI Design | Light & Dark Mode

- Designed a clean, focused dashboard experience for therapists to manage appointments, client details, and session notes.
 - Designed light and dark mode UI systems to support visual comfort and accessibility during different working conditions.
 - Developed intuitive layouts for key screens like schedule view, session notes, and client profiles, ensuring easy focus and low cognitive load.
-

PROFESSIONAL EXPERIENCE

UI/UX Designer | Tandemloop Technologies

July 2025 - Present

- Working on end-to-end UX and UI design for mobile and web products.
 - Conduct user research, define flows, create wireframes, and deliver high-fidelity UI designs.
 - Design and prototype interactive experiences using Figma and Framer.
 - Collaborate with developers and stakeholders to ensure design feasibility and consistency.
-

Site Engineer - Altair GEC

Jun 2024 - May 2025

Client- (BIAL) Kempegowda International Airport, Bengaluru

- Worked on LPG gas station and gas pipeline projects for BIAL (Kempegowda International Airport).
 - Gained hands-on experience in system execution, coordination, and real-world constraints.
-

EDUCATION

Advanced UX UI Design Program - Aspira Design

Dec 2024 - May 2025

Bachelor of Engineering in Mechanical Engineering

SGBIT Belagavi | VTU University

GPA: 7.78 / 10 | 2021 - 2024

Diploma | Mechanical Engineering

R.N.Shetty Polytechnic

Percentage: 64.24% | 2017 - 2020

LANGUAGE

- English (Fluent)
- Kannada (Native)
- Hindi (Fluent)
