RISK PROFILE

NAV per Share can go up or down and the amount invested in the Fund is at risk. The Fund uses leverage and derivatives for hedging and as part of its investment strategy which entails additional risks and costs. For further details, please refer to the Offering Documents.

SECTORAL EXPOSURE^A

PORTFOLIO UPDATE

September was marked by macro volatility, with the Fed raising rates by 25bps, Brent crude moving above US\$100/bbl, and long-end Treasury yields remaining under pressure. While the Fed's move was aimed at limiting the risk of the energy shock feeding into broader inflation expectations, underlying inflation pressures remain relatively contained: core CPI eased to 2.4% YoY, wage growth remained moderate at 3.1% YoY, and shelter inflation continued to soften. Economic growth remains resilient, supported by AI-related investment, although labour-market breadth and lower-income consumption remain relatively weak.

Against this volatile backdrop, the Fund's NAV declined by 2.21% during the month, bringing its year-to-date return to 2.35%. The decline largely reflected broader mark-to-market pressure across bond markets rather than a change in the Fund's underlying positioning. The portfolio remains focused on short-duration, high-quality credit and broad diversification, with ongoing carry and pull-to-par helping cushion temporary market volatility. Geographically, American and Korean bonds were positive contributors, while Indian and Canadian bonds detracted from performance. Sector-wise, Industrial contributed positively, while Financial and Consumer Cyclical were the key detractors.

While the Fed has resumed tightening, pressures at the long end increasingly extend beyond monetary policy. A US fiscal deficit of close to 6% of GDP, together with around US\$320 billion of hyperscaler debt issuance in 2026, is adding significant government and corporate bond supply. These structural supply pressures reinforce our preference for the 2-3 year segment, where yields remain attractive without taking the additional volatility associated with longer-duration bonds.

For the Fund, this short-duration positioning provides attractive carry with materially lower interest-rate sensitivity. Ongoing coupon income, regular maturities and pull-to-par help absorb temporary mark-to-market volatility while improving return visibility as bonds approach maturity.

Overall, we continue to favour income, credit quality and maturity discipline over directional interest-rate calls. With yields remaining elevated, the portfolio remains positioned to capture attractive carry while limiting exposure to long-duration volatility and preserving flexibility as market conditions evolve.

RISK FACTORS

Interest Rate Risk: The increase (fall) in value of fixed income securities with fall (increase) in interest rate. **Credit Risk:** The ability of the issuer to redeem the securities on maturity. **Liquidity Risk:** The ability to sell a bond before its redemption. **Counterparty Risk:** The risk due to failure of the counterparty dealt with. **Country Risk:** The investment strategy is subject to the risks relating to the geographical, political, economic and social issues of the country of the issuer, and to a lesser extent that of USA. **Leverage/Derivatives Risk:** Disproportionately large change in value of securities due to relatively small change in determinant.

DISCLAIMER

This document is intended solely for Accredited and Institutional Investors under the Securities and Futures Act (Cap. 289) of Singapore and is for informational purposes only. It does not constitute investment advice, a recommendation, or an offer to buy or sell any security or shares in the Silverdale Bond Fund ("the Fund") or any other fund managed by Silverdale Capital Pte Ltd. The commentary is not a complete analysis of the Fund portfolio or market, and holdings, opinions, and information may change without notice; actual results will differ. The Fund uses leverage and invests in derivatives, which carry higher risks. Past performance is not indicative of future results. Investments must be made solely based on the Private Placement Memorandum of Silverdale Fund VCC, the Fund Supplement, and Subscription Documents. Distribution may be restricted in certain jurisdictions, and recipients are responsible for compliance with applicable laws. Nothing herein constitutes legal, tax, securities, or investment advice; please seek independent professional advice before making any investment decision. The NAV performance is computed taking: 1 month = 4 weeks, 3 months = 13 weeks, 6 months = 26 weeks, 9 months = 39 weeks, 12 months = 52 weeks, 3 years = 156 weeks and 5 years = 260 weeks; where attributable NAV is not available, the latest available NAV is taken for computation. NAV prior to 8 May 2015 is based on NAV of Sri Silverdale Opportunities Fund (Class-E); and NAV for the period 8 May 2015 to 23 April 2021 is that of Silverdale Fund SPC SP-1 managed by the same fund management team without change in strategy. Payment of Dividend results in equivalent amount of drop in the NAV of the Fund. (*) Indicative. (*) are based on gross investments into securities. (*) Credit Rating is based on best of the three ratings (S&P/Moodys/Fitch); Rating exposure of less than 3% has been clubbed as "Others"; unless otherwise specified. (*) Sector exposure of less than 3% has been clubbed as "Others"; unless otherwise specified. (*) Country exposure of less than 3% has been clubbed as "Others"; unless otherwise specified. (*) Certain derivatives, such as credit default swaps, are weighted at "bond equivalent value," which is the notional amount of the instrument adjusted by the current gain or loss on the position. (6) Gross Investments is aggregation of AUM and Net Loans and cash on hand. (7) Initially launched as multi-assets fund with quarterly NAV. (8) Assuming to be a Business Day. (10) Indicative. (11) For the period 4 Oct 2013 to 27 Dec 2013. (12) Portfolio Yield to Maturity is weighted average of total return on bonds held till maturity, derived from interest coupons and capital appreciation / depreciation based on their expected redemption values; it excludes bonds trading less than 20 cents to a dollar, while it reflects the current yield of the bonds for (a) the bonds trading between 20-50 cents to a dollar and (b) the bonds maturing within 1 month and trading higher than 98 cents to a dollar. (13) Dividend Yield (%) = (Amount per share / Ex-Dividend NAV) x 4 (envisaged divided frequency). (14) Since Strategy launch date.
