ABOUT US

MELCO Trading and Contracting organization, formerly known as **Madar Al-Ettihad**, was established in 2002 in Dammam. It is one of the leading companies in the field of trading and contracting in the Kingdom of Saudi Arabia. Since its inception, the company has been committed to providing high-quality services that meet the growing needs of the Saudi market in the sectors of construction, real estate development, and general trading.

Vision

To be the trusted partner and the first choice in the contracting and commerce sectors by delivering innovative solutions that enhance the quality of projects and businesses, contributing effectively to building a strong and sustainable economy.

Mission

We strive for excellence in the contracting and commerce sectors by delivering innovative and comprehensive solutions that meet our clients' needs. Committed to the highest standards of quality and professionalism, we aim to enhance the value of projects and businesses, build long-term partnerships, and contribute to sustainable development and the advancement of the national economy.

Values

Quality

Commitment to the highest standards of quality in all our projects and operations.

Innovation

Delivering innovative solutions that meet our clients' aspirations and achieve excellence.

Professionalism

Upholding ethical standards and high practices to build trust and excellence.

Partnership

Establishing long-term relationships with clients and partners to foster collaboration and mutual success.

Sustainability

Contributing to sustainable development that supports the economy and society.

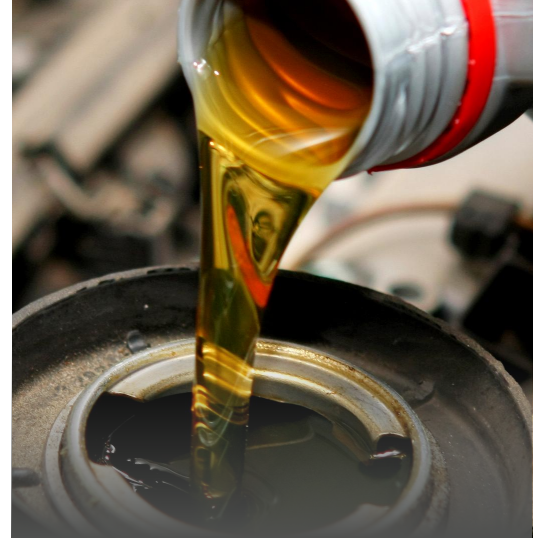

Divisions

Safety Division PPE

Our Safety Division specializes in providing a comprehensive range of Personal Protective Equipment (PPE) designed to ensure the safety, protection, and well-being of workers across various industries. We understand that workplace hazards can vary, which is why we offer tailored solutions to meet diverse safety needs.

[View](#)

Personal Protective Equipment (PPE)

Head Protection

Helmets and hard hats designed to protect against falling objects, impacts, and head injuries in construction, manufacturing, and industrial settings.

[More](#)

Eye and Face Protection

Safety glasses, goggles, and face shields that guard against chemical splashes, dust, debris, and other potential hazards.

[More](#)

Hearing Protection

Earplugs and earmuffs to reduce noise exposure, protecting workers in environments with high decibel levels.

[More](#)

Personal Protective Equipment (PPE)

Respiratory Protection

Masks, respirators, and filters to protect against harmful fumes, dust, and airborne contaminants.

[More](#)

Hand Protection

Safety gloves suitable for various applications, including cut-resistant, chemical-resistant, heat-resistant, and general-purpose gloves.

[More](#)

Body Protection

Earplugs and earmuffs to reduce noise exposure, protecting workers in environments with high decibel levels.

[More](#)

Personal Protective Equipment (PPE)

Foot Protection

Safety boots and shoes equipped with steel toes, slip resistance, and puncture protection for optimal safety in diverse work environments.

[More](#)

Gas Detector

Gas detectors monitor air and trigger alarms when dangerous gas levels are detected, ensuring safety.

Hearing Protection

3M

3M™ Earplugs 1100 Series

Type: Disposable foam earplugs

Features: Offers excellent hearing protection with a comfortable fit, designed for use in noisy environments.

3M

3M™ Foam Earplugs 1110, Corded

Type: Foam earplugs with cord

Features: Soft foam material for comfort, corded for easy removal and storage, effective noise reduction.

3M

3M™ E-A-R™ TaperFit™ 2 Large Uncorded Earplugs, Hearing Conservation 312-1221 in PolyBag

Type: Uncorded foam earplugs

Features: Designed for hearing conservation, these earplugs offer a tapered shape for a comfortable fit and good noise attenuation.

Hearing Protection

3M

**3M™ E-A-R™ TaperFit™ 2
Corded Earplugs 312-1223,
Regular**

Type: Corded foam earplugs

Features: Regular-sized tapered earplugs, ideal for use in high-noise environments, and the cord keeps them easily accessible.

3M

**3M™ Peltor™ Optime™ 98
Cap-Mount Earmuffs, Hearing
Conservation H9P3E**

Type: Cap-mounted earmuffs

Features: Designed for hearing conservation with a comfortable cap-mounting system, effective at reducing noise exposure.

3M

**3M™ PELTOR™ Optime™ 105
Over-the-Head Earmuffs H10A HV**

Type: Over-the-head earmuffs

Features: High noise reduction earmuffs designed for heavy-duty use in high-noise environments, with adjustable headband for comfort.

Hearing Protection

3M

**3M™ PELTOR™ Optime™ II
Earmuffs H520A, SNR value 31
dB, Green**

Type: Over-the-head earmuffs

Features: Green earmuffs with a high noise reduction rating, suitable for use in moderately noisy environments.

3M

**3M™ PELTOR™ Optime™ I
Earmuffs, Yellow, Headband,
H510A-401-GU**

Type: Cap-mounted earmuffs

Features: Designed for hearing conservation with a comfortable cap-mounting system, effective at reducing noise exposure.

3M

**3M™ PELTOR™ Optime™ 105
Over-the-Head Earmuffs
H10A HV**

Type: Over-the-head earmuffs

Features: High noise reduction earmuffs designed for heavy-duty use in high-noise environments, with adjustable headband for comfort.

Respiratory Protection

3M

3M™ Particulate Respirator 8210, N95

Type: N95 respirator

Features: Designed to help provide reliable respiratory protection against certain non-oil based particles. Commonly used in industrial and healthcare environments.

3M

3M™ Half Facepiece Reusable Respirator 6200/07025(AAD), Medium

Type: Half facepiece respirator

Size: Medium

Features: Reusable, designed for use with 3M™ filters and cartridges. Offers protection from various gases, vapors, and particulates.

3M

3M™ Reusable Full Face Mask 6800, Medium

Type: Full face respirator

Size: Medium

Features: Provides full-face protection, including eyes and face, and is suitable for use with various filters and cartridges. Offers enhanced protection from gases, vapors, and particulates.

Respiratory Protection

3M

3M™ Organic Vapor Cartridge 6001

Type: Organic vapor cartridge

Features: Designed to help protect against a wide range of organic vapors. Used with compatible 3M™ half and full facepiece respirators.

3M

3M™ Organic Vapor/Acid Gas Cartridge 6003/07047(AAD)

Type: Organic vapor/acid gas cartridge

Features: Protects against both organic vapors and acid gases, suitable for a wide range of industrial and chemical environments.

3M

3M™ Multi Gas/Vapor Cartridge 6006

Type: Multi-gas/vapor cartridge

Features: Provides protection from multiple gases and vapors, ideal for more complex hazardous environments.

Hand Protection

SAFETY JOGGER
SAFETY SHOES

Safety Jogger PROTECTOR 4X44C

Material: Cut-resistant HPPE (High-Performance Polyethylene).

Coating: Double nitrile coating.

Protection: Offers high protection against cuts while providing durability and resistance to abrasions.

Use: Ideal for tasks requiring cut resistance and strong grip, such as construction, metalworking, or handling sharp objects.

SAFETY JOGGER
SAFETY SHOES

Safety Jogger ALLFLEX 4131A

Material: Designed for maximum dexterity and sensitivity.

Coating: Light coating for sensitive handling.

Protection: Offers basic protection with high tactile sensitivity for delicate work.

Use: Suitable for tasks requiring fine motor skills and precision, such as electronics assembly or medical work.

SAFETY JOGGER
SAFETY SHOES

Safety Jogger SHIELD 4X43C

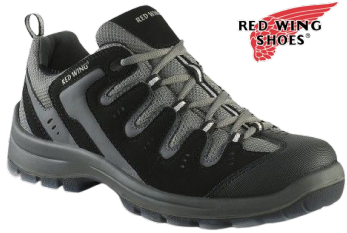

Material: Cut-resistant HPPE (High-Performance Polyethylene).

Coating: Polyurethane coating.

Protection: Offers cut resistance and a light coating for a good grip while maintaining flexibility.

Use: Best for light handling in environments with moderate cut risks, such as logistics

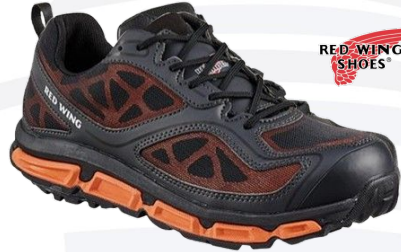

Foot Protection

Red Wing Style 3210 Men's Oxford

Features: Non-metallic toe, static dissipative.

Use: Ideal for environments where static discharge is a concern, such as electronics manufacturing.

Red Wing Style 6338 Men's Athletics

Features: Electrical hazard protection, aluminum toe, HRO heat-resistant, slip-resistant.

Use: Great for workers in high-heat and electrical hazard environments who need agility and protection.

Red Wing Style 6670 Men's TruHiker 6-Inch Hiker Boot

Features: Electrical hazard protection, steel toe, waterproof with Red Wing waterproofing system, heat-resistant, slip-resistant.

Use: Best for outdoor and heavy-duty work environments, such as construction, with weatherproof features.

Foot Protection

Red Wing Style 2233 Men's Supersole® 8-Inch Boot

Features: Electrical hazard, steel toe, Supersole technology, slip-resistant.

Use: Durable boot for workers who need both protection and comfort for extended hours on tough surfaces.

Red Wing Style 8264 Men's 9-Inch Pull-On Boot

Features: Puncture-resistant, steel toe, electrical hazard, slip-resistant, Swen Flex technology.

Use: Designed for industrial environments with high puncture risk, while maintaining comfort.

Red Wing Style 3207 Men's Petroking 8-Inch Boot

Features: Non-metallic toe, puncture-resistant, static dissipative, HRO heat-resistant, slip-resistant.

Use: Suitable for petrochemical or oil-related industries, offering protection from punctures and static discharge.

Foot Protection

Red Wing Style 6716 Men's Cross Lite Oxford

Features: Static dissipative, aluminum toe, extralight.

Use: Lightweight option for workers in sensitive environments where static discharge is a concern.

Red Wing Style 6721 Men's Cross Lite Slip-On

Features: Electrical hazard protection, aluminum toe, extralight.

Use: Comfortable slip-on safety shoe for those working in electrical hazard zones with a need for lightweight footwear.

Red Wing Style 6722 Men's Cross Lite Slip-On

Features: Static dissipative, aluminum toe, extralight, slip-resistant.

Use: For environments requiring anti-static protection, with slip-resistance for added safety.

Foot Protection

Red Wing Style 6714 Men's Cross Lite Chukka

Features: Static dissipative, aluminum toe, extralight, slip-resistant.

Use: Ideal for workers in environments requiring anti-static features and lightweight, comfortable footwear.

Red Wing Style 8212 Men's Supersole® 5-Inch Boot

Features: Electrical hazard, puncture-resistant, steel toe, slip-resistant, Swen Flex.

Use: Versatile and durable, suitable for workers needing multi-layered protection.

Red Wing Style 8231 Men's 11-Inch Pull-On Boot

Features: Electrical hazard, puncture-resistant, steel toe, slip-resistant.

Use: Best for rugged industrial tasks with puncture and electrical hazards.

Foot Protection

Red Wing Style 6719 Men's Cross Lite Chukka

Features: Static dissipative, aluminum toe, extralight, slip-resistant.

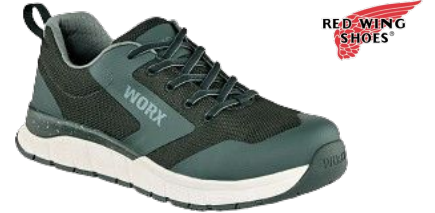

Use: Comfortable chukka style shoe for environments that require lightweight, anti-static footwear.

Red Wing Style 3229 Men's Petroking 8-Inch Boot

Features: Electrical hazard, non-metallic toe, puncture-resistant, slip-resistant.

Use: Designed for petrochemical, oil, or industrial environments with a focus on protection and safety

Worx Style 5160 Women's Lithium Athletic

Features: Electrical hazard, steel toe, heat-resistant.

Use: Lightweight and protective athletic-style shoe for women in electrical hazard zones.

Foot Protection

Safety Jogger X2000 S3

Design: Mid-cut shoe for everyday use.

Features: Steel toe, slip-resistant, oil-resistant.

Use: Reliable for daily tasks, offering protection and comfort for industrial or construction workers.

Safety Jogger X2020 S3

Design: Low-cut shoe for daily use.

Features: Steel toe, oil-resistant, slip-resistant.

Use: Excellent for workers in environments requiring comfortable, flexible shoes with standard protective features.

Red Wing Style 6646 Men's Slip-On

Features: Electrical hazard protection, non-metallic toe, heat-resistant (HRO), slip-resistant, and STARGRIP®.

Use: Suitable for workers in environments with electrical hazards, heat, and slippery surfaces.

Foot Protection

SAFETY JOGGER
SAFETY SHOES

Safety Jogger HERCULES S5 FO

Material: High puncture-resistant PVC.

Features: Steel toe, anti-puncture, oil, and slip resistance, suitable for hazardous environments.

Use: Ideal for heavy-duty industrial tasks or situations with high puncture risk.

SAFETY JOGGER
SAFETY SHOES

Safety Jogger Bestboy S3

Design: Mid-cut, metal-free.

Features: Non-metallic toe, oil and slip-resistant, water-resistant.

Use: Comfortable for workers who need flexibility and metal-free shoes, such as in electronics or airport security.

SAFETY JOGGER
SAFETY SHOES

Safety Jogger Bestrun S3

Design: Low-cut safety shoe.

Features: Non-metallic toe, slip-resistant, comfortable for all-day use.

Use: Great for light industrial environments where agility and comfort are priorities.

Body Protection

6111 Desert/Tropical FR Coverall

Features: Flame-resistant garment, Anti-static garment, Electric arc flash protection, CAT2 rating (Category 2 protection for electrical arc flash).

Use: Designed for workers exposed to electrical hazards and flame risks in desert or tropical climates.

61640 Desert Tropical Non-FR Coverall

Features: Non-flame resistant coverall.

Use: Ideal for workers in hot climates where flame resistance is not a requirement but comfort and breathability are important.

61615 Desert Tropical FR Coverall

Features: Flame-resistant garment., Anti-static garment, Electric arc flash protection

Use: Provides protection against fire, electric arcs, and static buildup in tropical environments.

Body Protection

66411 FR Plain Front Trousers

Features: Flame-resistant garment., Anti-static garment, Electric arc flash protection, CAT2 rating.

Use: Flame-resistant trousers for workers exposed to electrical hazards, ideal for industrial environments requiring high protection.

66311 FR Shirt

Features: Flame-resistant garment, Anti-static garment, Electric arc flash protection, CAT2 rating.

Use: Flame-resistant shirt for high-risk environments, offering protection from electric arcs and static discharge.

69007 Soft Shell Jacket

Features: Oil-resistant garment, Windproof, Water-resistant.

Use: Suitable for workers in outdoor environments exposed to harsh weather conditions like wind and rain, offering comfort and protection.

Body Protection

69018 Soft Shell Jacket

Features: Windproof, Water-resistant.

Use: Ideal for workers needing protection from wind and water in milder climates or environments.

69006 Winter Soft Shell Jacket

Features: Insulated, Wind and water-resistant.

Use: Designed for cold weather conditions, providing insulation along with wind and water protection.

69019 Backpack

Features: Durable, suitable for carrying tools and equipment.

Use: For transporting tools and personal items in various industrial or outdoor environments.

Gas Detector

BW
Technologies

BW Clip Series Single-Gas Detector

Available for detecting gases such as: **H2S, CO, O2, SO2, NH3**, And other toxic or flammable gases.

BW
Technologies

BW™ Gasalert Max XT LL Multi Gas (LEL , H2S , CO , O2)

It is capable of detecting four gases simultaneously: **LEL, H2S, CO, O2 (Oxygen)**

BW
Technologies

BW™ MicroClip XL Serviceable Multi-Gas Detector (LEL, H2S, CO, O2)

Multi-gas detector designed to monitor four gases simultaneously: **LEL, H2S, CO, and O2** .

Welding

Welding products encompass a wide range of tools, equipment, and materials essential for joining metals through heat and pressure. These include welding machines (MIG, TIG, Stick, and Plasma cutters), consumables like rods, wires, and electrodes, protective accessories such as helmets and gloves, shielding gases for weld protection, and inspection tools to ensure weld quality. Designed for industries such as construction, automotive, and manufacturing, welding products are crucial for achieving precise, durable, and safe welds in a variety of applications.

Lubricant

Ensure the optimal performance and longevity of your trucks, buses, and heavy machinery with our premium lubricants. Our high-quality products are designed to provide superior protection against wear and tear, enhance fuel efficiency and power, and extend the lifespan of your equipment. Suitable for a wide range of applications, including commercial fleets and construction equipment, our lubricants also support environmental sustainability by reducing emissions. Invest in our lubricants today to keep your vehicles and machinery running smoothly and efficiently. Contact us for more details.

Lubricant

Delo Gold Ultra SAE 15W-40

Delo® Gold Ultra is a high performance, multigrade, heavy-duty diesel engine oil specifically designed to lubricate a wide range of engines requiring API CI-4 or ACEA E7 performance lubricants. Formulated with ISOSYN® technology.

Havoline Fully Synthetic SAE 5W-40

Premium performance, multigrade motor oil formulated from selected synthetic base fluids and matching additive technology for use in passenger car and light truck gasoline and diesel engines under all operating conditions.

Havoline ATF III

Formulated for applications that call for the former DEXRON®-III H, MERCON®, and Allison C-4 fluids.

Lubricant

Havoline EasyCool 33

Antifreeze coolant for automotive and light duty diesel engine applications

Delo 6300 SAE 40

Heavy-duty diesel engine oil specifically formulated to meet API CH-4/ SJ. Proven performance designed for use in diesel engines in commercial fleets and off-highway vehicles.

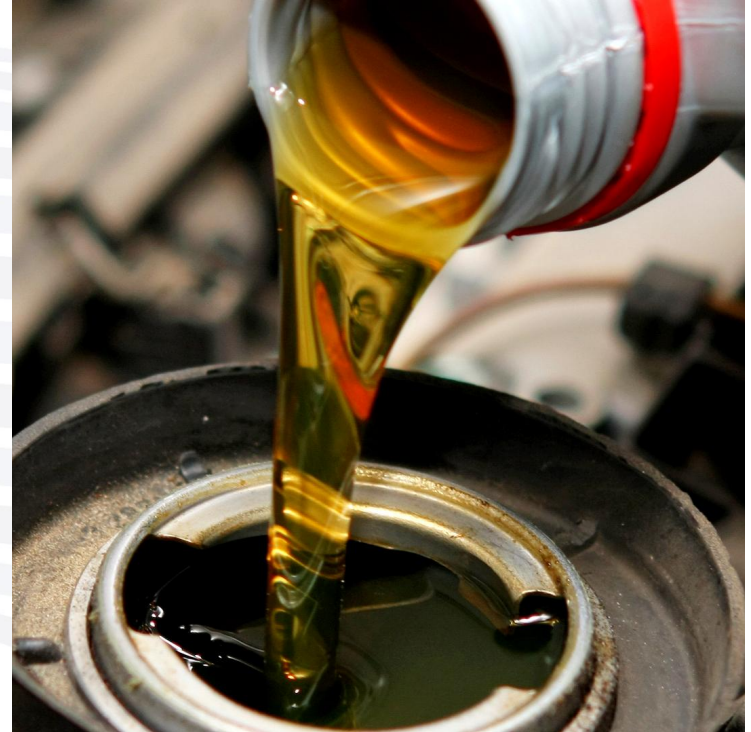

Delo Silver

Delo Silver are lubricating oils designed to lubricate a wide variety of equipment. The level of it is also suitable for use in applications for hydraulic, transmission and final drives and axles in older construction and mining equipment.
