

+ ASK PREPPR

PREPAREDNESS EXPERTISE, WHEREVER YOU WORK

Preppr answers from your own plans and knowledge base, cited to the page, and produces the deliverables you owe: THIRA, SPR, hazard mitigation plans, HSEEP AAR/IPs and more. Work with it in chat, on any page, in your meetings, or hand it a whole job by email, Slack or Teams. Nothing goes out without your approval.

The screenshot shows the app.preppr.ai interface. On the left is a dark sidebar with navigation options: Ask Preppr, Dashboard, Knowledge, Exercises, Collaborate, Intelligence, Simulate, Improve, and Simulator. The main area displays a chat window titled 'Foothill PSPS watch: LTC facility exposure'. The chat message asks: 'Which of our LTC facilities on PSPS circuits can't ride out a multi-day shutoff, and what did the December 2025 Foothill PSPS AAR say to fix first?'. Below the message, Preppr has responded with a table of facility data and a summary of findings.

Facility	Beds	Tier	Generator	Fuel on site	Fuel contract
Sunshine NH	150	C	200 kW life safety + N/S boiler	40 h	None
Ridgeview Estates AL	68	C	60 kW	24 h	None
Pine Hollow SNF & Rehab	48	D	7.5 kW portable gas	Retail	None
Harvest Junction Care Center	92	B	300 kW shared w/ dialysis	48 h	CPD P3

Tier C facilities are likely to need county or coalition support within 48 hours of a winter outage and Tier D within hours (Survey §4 ^[1]); none of the four holds the **72 hours** of on-site fuel the Department of Health expects (DOH Advisory LTC-2026-02, §3.2 ^[2]).

What the December 2025 AAR says to fix first

- An LTC fuel tier** — facilities on P3 or without a contract waited **50–70 hours** for fuel (Finding 1) (Foothill PSPS AAR/IP, AFI 2.1 ^[3]).
- The statewide contract** — a supplier with generators, heaters and fuel cans held one open to the county; no one called (AFI 2.3 ^[3]).
- One intake point** for LTC resource requests (Primary AFIs ^[3]).

An answer drawn from the county's own plans and after-action report, with every figure cited to its source.

Answer

Cited to the page

Answers from your own plans and knowledge base, cited to the page, with a confidence badge. When Preppr has no data, it says so.

Produce

Deliverables you owe

About 20 guided Actions that end in a deliverable you can hand over: THIRA, SPR, hazard mitigation plans, CPG 101 reviews, HSEEP AAR/IPs and more.

Forecast

See the risk ahead

Climate risk screening to 2050, and a Lifeline Risk & Cascade Forecast that uses your GIS layers and live weather, flood and wildfire data.

DELIVERABLES YOU CAN HAND OVER

FEMA risk assessment

THIRA

SPR

Hazard mitigation plan

CPG 101 plan review

Lifeline gap analysis

HSEEP AAR/IP

IPP and MYTEP

EEGs

Briefing decks

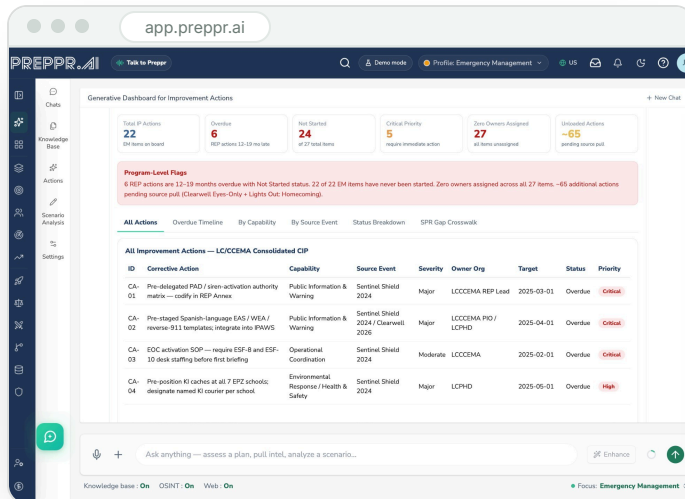

Climate risk screening

BIA extract

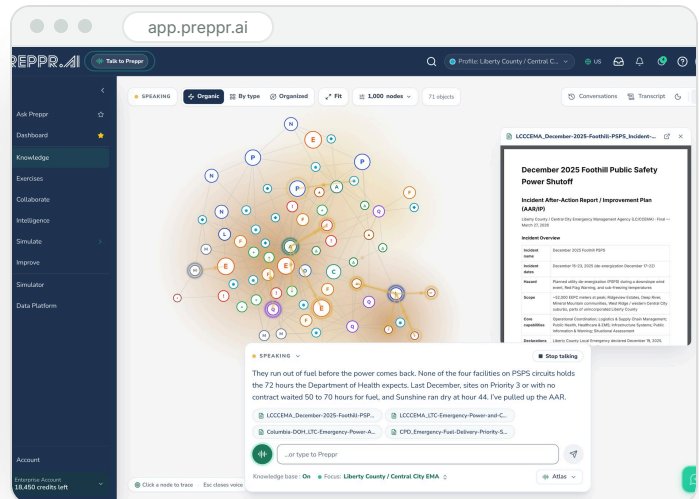

Continuity plan draft

+ ANSWERS YOU CAN USE

ASK A QUESTION, GET A WORKING VIEW

Build. A one-line request becomes a working dashboard: every improvement action from your after-action reports, with owner, due date and priority.

Talk. Ask out loud. Preppr answers from your own plans, lights up the knowledge it drew on, and opens the source.

In Preppr

Ask Preppr

Ask by typing or out loud, run a guided Action, and see the risk ahead.

On any page

Dr. Preppr

Knows what you're looking at and talks it through by voice.

In meetings

Observer

Joins Zoom, Google Meet or Teams calls and turns them into knowledge.

In your tools

Preppr Agent

Takes whole jobs by email, Slack, Teams, Claude, ChatGPT or Copilot, and returns them for approval.

PART OF ONE PLATFORM

Exercise & Simulation

Design, run and learn from every exercise

Improve

Readiness you can show

Ask Preppr

Expertise wherever you work

Knowledge

One cited, connected memory

Intelligence

Sourced threat briefs for your place

Collaborate

Input from everyone who should weigh in

Every area reads from Knowledge and writes back to it. Preppr is one platform, not a set of modules.

See it with your own plans

A 30-minute demo built around your hazards and obligations. The full product overview is at preppr.ai/downloads/product-overview.
