

# Stay in control. Stay ahead.

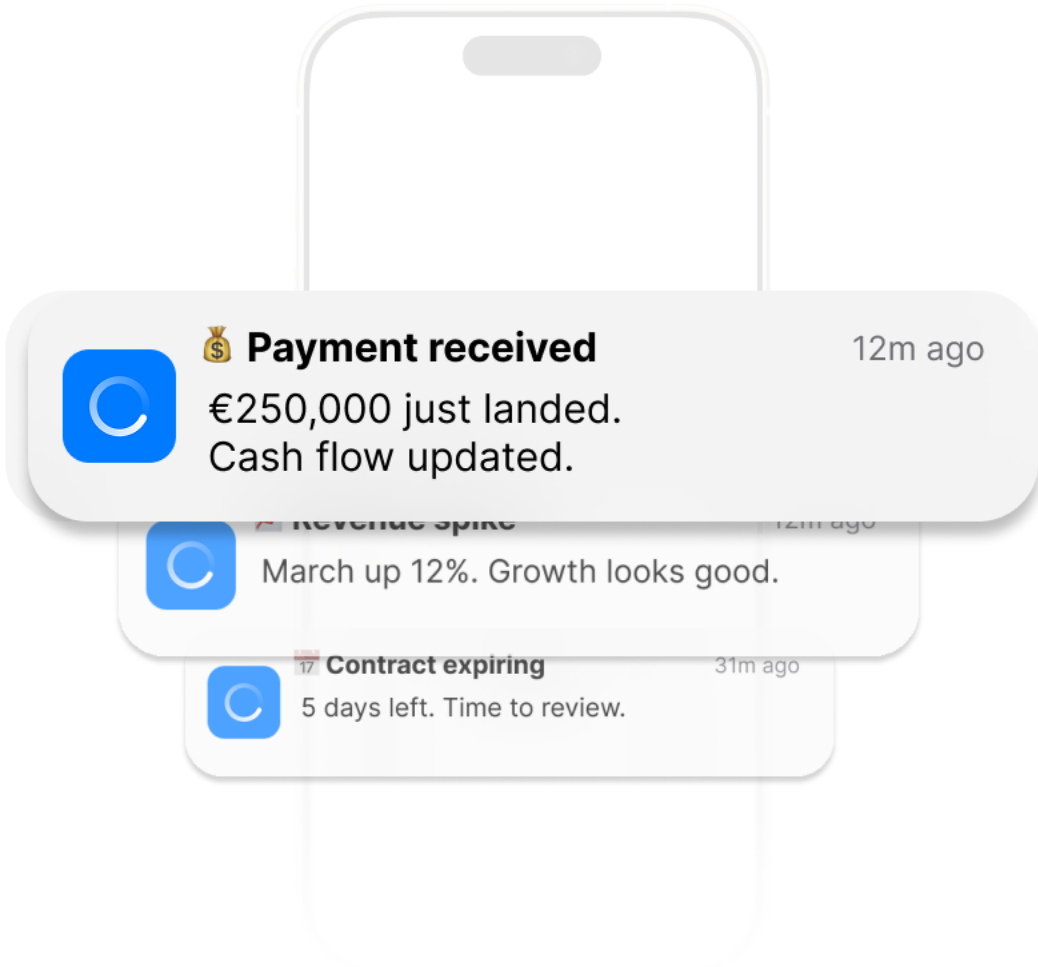

Visionary Notifications keep you connected to what matters most.  
Delivering real-time insights, seamless actions, and effortless decision-making.

# Notifications built for visionaries.

Instant, intelligent, and seamlessly integrated. Visionary redefines business engagement with proactive notifications that keep you informed, connected, and always in control. Receive real-time financial alerts, approval requests, and workflow updates that help you act with confidence.

No more searching for updates or logging in to check on your business. Visionary brings the most important information directly to you. When and where you need it.

**Be notified. Take action. Move forward.**

## Notifications. Clarity at every moment.

Visionary keeps you seamlessly connected to your business with real-time updates that matter. No noise, no clutter—just the essential insights you need, exactly when you need them.

### **Instant awareness**

Know the moment a transaction is processed, an invoice is received, or a key status changes.

### **Smart reminders**

Get notified about important milestones before they become urgent.

### **Always relevant**

No unnecessary alerts, only critical business intelligence tailored to you.

# **Not just notifications. It's about action. It's about moves.**

Visionary redefines the way you interact with your business.  
Beyond updates—every notification is a decision point, a step forward, a move  
that keeps you ahead.

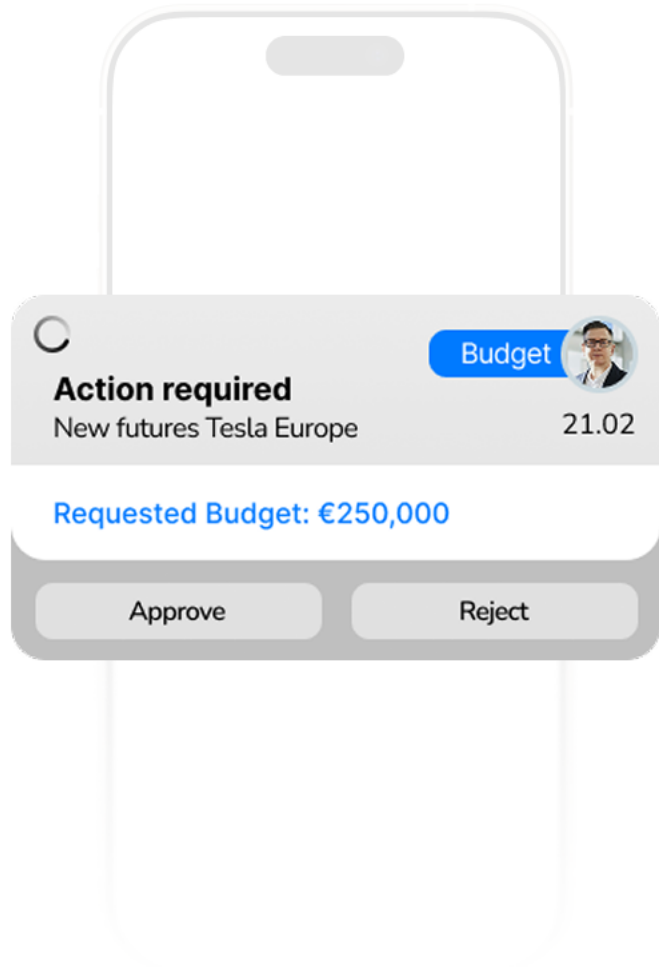

**Business moves fast. Now, you move faster.**

# Interact with your business.

Visionary revolutionizes the way you stay connected to your business with **Dynamic Notifications**, a seamless, intelligent system designed for instant interaction and real-time updates. No longer just passive alerts, these notifications evolve with your workflow, providing live status tracking and the ability to take immediate action—right from your lock screen.

With real-time progress updates, you can monitor approvals, budget allocations, and transactions as they happen, ensuring full visibility without the need to constantly check in. **Action-based notifications** allow you to approve, reject, or adjust key business decisions in one tap, reducing delays and keeping operations moving at the speed of thought.

This is the next generation of business interaction—faster, more intuitive, and perfectly in sync with your needs.

## Dynamic Notifications. Stay ahead in real time.

Visionary transforms notifications into a seamless business tool. See progress evolve. Make decisions instantly. Keep everything moving—without friction.

### Live status tracking

Approvals, budgets, and transactions updating in real time.

### Instant decision-making

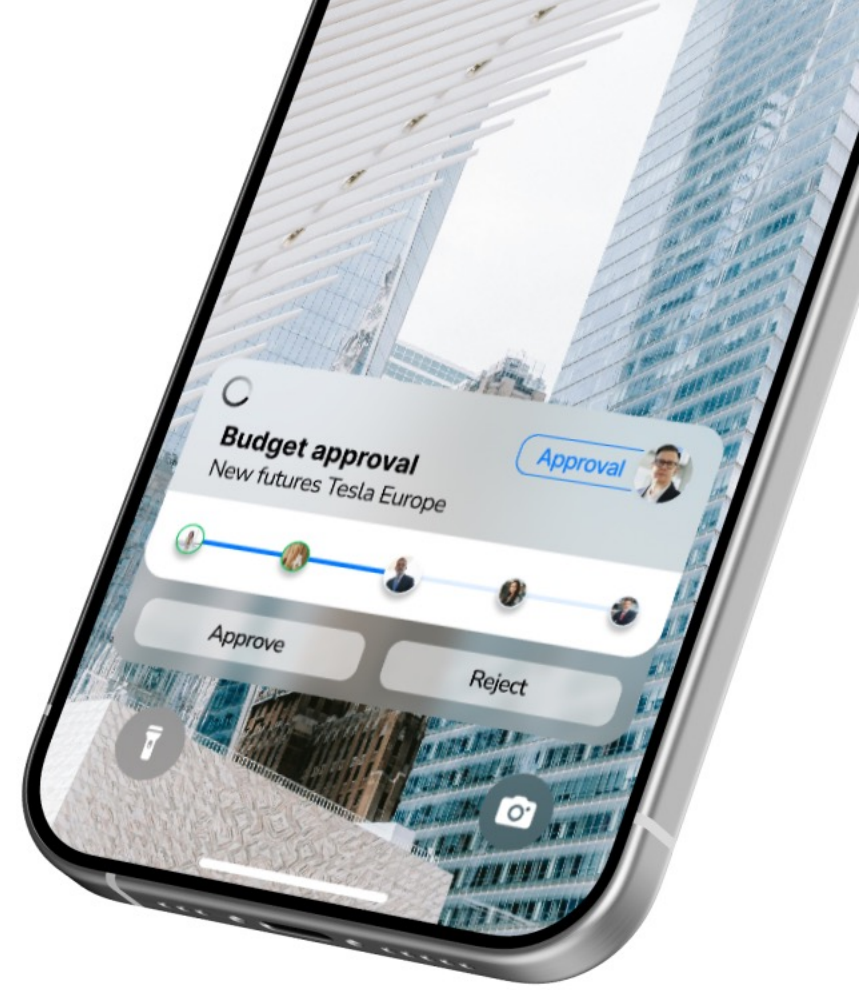

Approve or reject without opening the app.

### Effortless execution

Every action syncs instantly across your business.

**Stay in control.  
Know more.  
Act faster.**

The future of business starts here.
