Digiscan Interface with WMS / ERP (Virtual Keyboard)

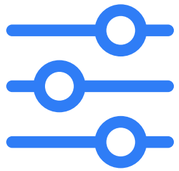

1) Digiscan reads the relevant code(s) and sends them wirelessly to the Receiver Box

2) The Receiver Box writes the pallet code and the gate number directly into your WMS/ERP like any normal barcode scanner via USB.

Digiscan key facts

- Compatible with **all brands** (Linde, Still, Toyota, Jungheinrich, etc.)
- Compatible with **all types of forklifts**
- Ready to use with **all WMS** (no integration required)

- **Automatic filtering** of barcodes (1D and 2D)
- Pictures taken by Digiscan can be **stored on a server**
- Fully compatible with **Digiload® and Digitrack®**

- More than **1000 units sold** since 2021
- Some **references**: GXO, ID Logistics, FM Logistic, Auchan
- Customers achieve **more than 95%** reading performance*

*for the remaining 5% (damaged labels, barcodes covered by plastic film, etc., a manual scanner can be used in parallel to Digiscan.).
