- Adobe Photoshop
- Adobe InDesign
- Adobe Illustrator

Office & Documentation:

- Microsoft Office (Word, Excel, PowerPoint)

ABOUT ME:

I am an architect with three years of experience in different areas of architecture, including residential and public projects. My background has given me a strong understanding of the full design process, from concept to detail. I pay close attention to architectural details, both inside and out, and enjoy creating spaces that are thoughtful and well-balanced.

I'm currently based in Paris and looking for opportunities in international architecture firms where I can grow and contribute as part of a team. I speak fluent English and I'm improving my French.

EDUCATIONS:

- 2006-2017
