

Symbiosis Logo

The Symbiosis logo mark is a simplified symbiot, reimagined as a clean geometric symbol. Its rounded forms create a friendly yet confident identity, while preserving one of the brand’s most recognizable assets.

LOGO MARK

symbiosis

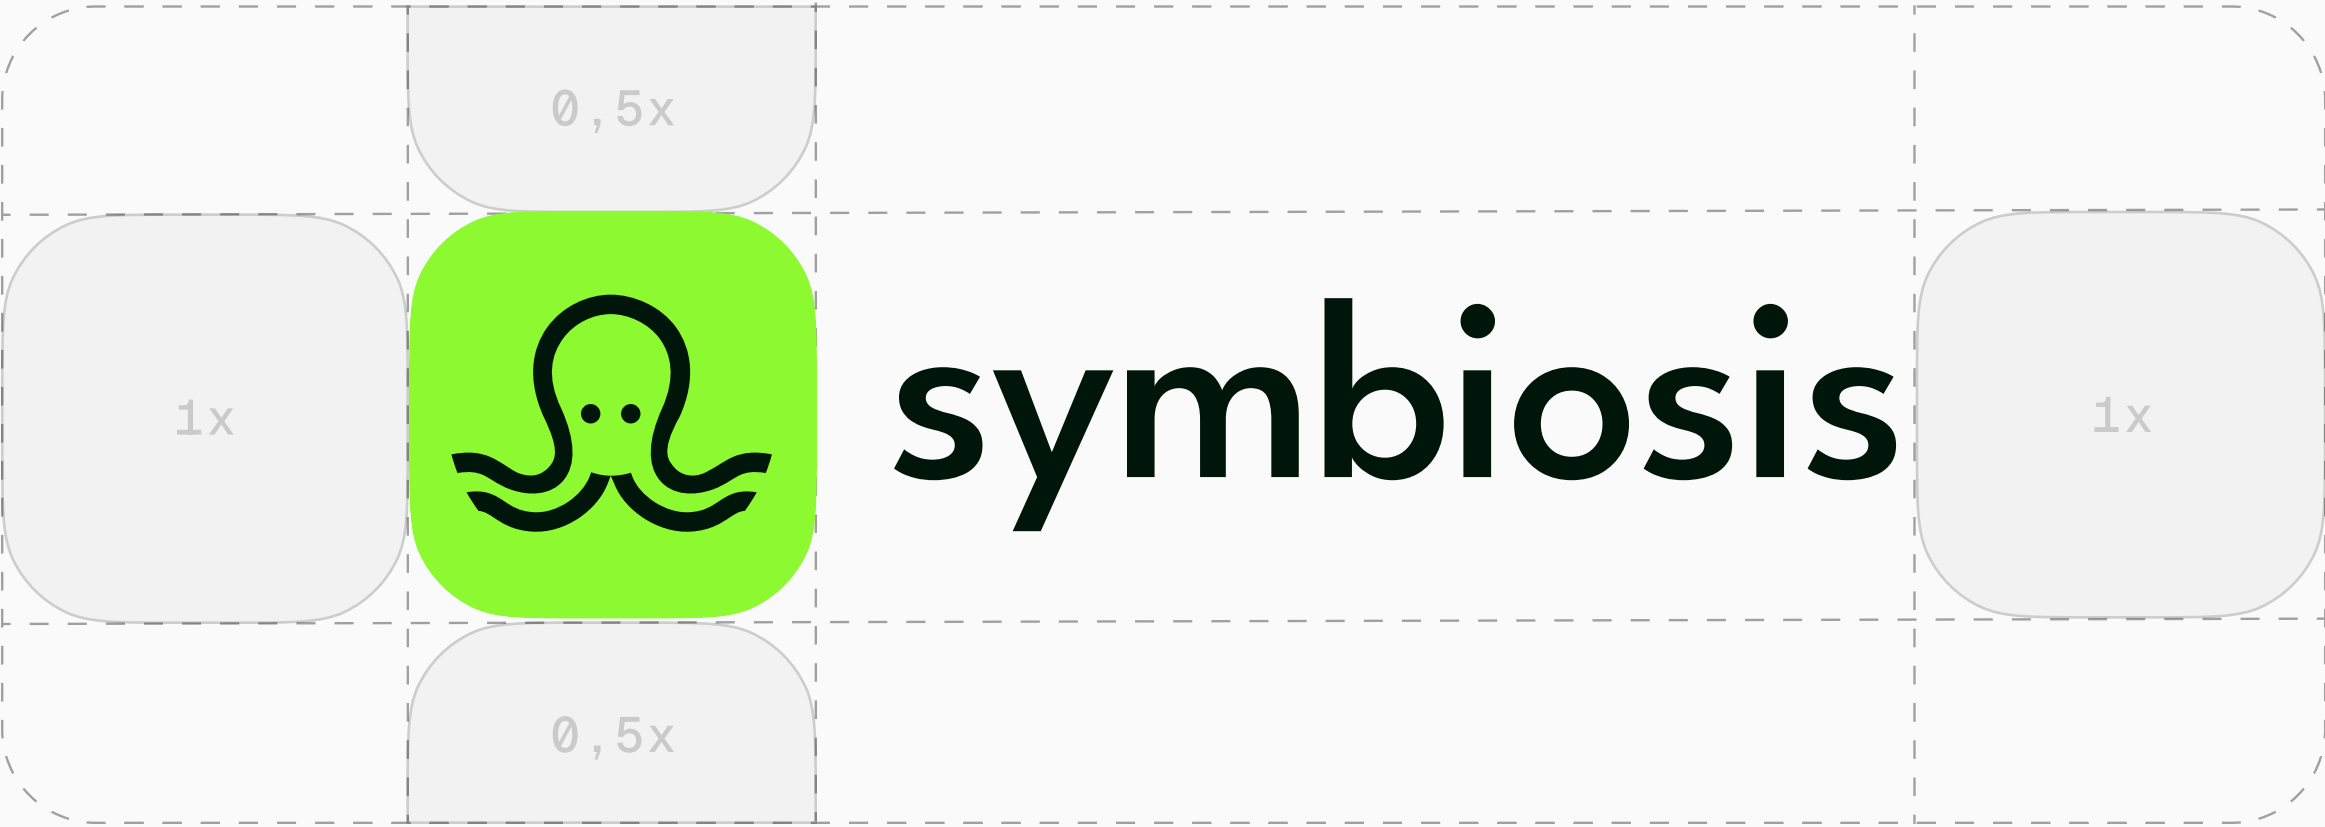

HORIZONTAL LOGO

Logo Spacing

To maintain clarity and consistency, always leave sufficient clear space around the logo. This area should remain free of text, graphics, and other visual elements.

The minimum clear space is equal to the height of the logo mark. Whenever possible, use more space to ensure maximum visibility and impact.

Never alter, distort, or recreate the logo in any way.

Core Palette

Our color system is designed to feel confident, modern, and timeless. Each color has a clear purpose, helping reinforce the Symbiosis identity while maintaining consistency across every touchpoint.

Symbiosis Green is our primary brand color and the most recognizable element of our visual identity. It should be used as the main accent across brand communications and digital products.

For light mode, use White or Off-White as primary background color to create a clean and balanced foundation.

Light Green should be used sparingly as a supporting accent, highlighting key interface elements without overpowering the overall composition.

Symbiosis Green #8CFA32	Dark Green #00371F	Light Green #CEF59E	Off-White #FFFFFF
			Feather #F5F7F5
			Sage #59806C
			Black #00170B

Logo Mark

The product icon always uses the primary logo mark with the green background. This is the only approved version and should be used consistently across all product applications.

Do not change the background color, recolor the mark, or create alternative versions of the product icon.

SIS Token

The SIS token always uses the dedicated logo mark with the dark green background. This is the only approved version and should be used consistently across all token-related applications.

Do not change the background color, recolor the mark, or create alternative versions of the token icon.
