skills

- interviews
- usability tests
- personas, flows, empathy maps
- wireframes & prototypes
- metrics analysis
- UX/UI audits
- competition analysis
- working on design systems
- graphic design
- english B2.2 & polish native

I'm looking to return to a Wrocław-based UX Design role, involving research, analysis, and teamwork. In my career, I've been creating digital products **holistically** from concept, through research, ending with high-fidelity prototypes.

My dream is to work with an **ambitious team**, from whom I could learn and be inspired. I feel low satisfaction from my previous workplaces, cause didn't receive strategic and planned mentoring.

As a Communication Design graduate, I make sure that linguistic and visual elements of a project are consistent, confirmed by research. **I analyze a lot**, and I'm a protagonist with a positive attitude.

1st* secret: I have an african snail in my house 🐌
