FEATURES

EXTRA BALLS

After the balls are drawn, if there is any valuable pattern or group of patterns that are almost being matched, the Extraball Feature will start. When triggered, extra balls are presented to be purchased.

ADAPTIVE CARD LAYOUT

The layout and size of the bingo cards automatically adjust based on how many are enabled (from 1 to 16), ensuring the game remains visually clear and easy to play regardless of the card count.

DYNAMIC CARD PRIORITIZATION

During gameplay, cards dynamically rearrange themselves in real time, first clustering near potential prize patterns, then sorting according to the value of the rewards they could unlock. This intelligent reordering draws the player's focus to the most strategic cards at every moment, enhancing clarity and engagement.
