

# Climate exam

## The exam for the Future

Climate change is the biggest challenge of our time. Still, the knowledge and actions required often lag behind. The climate exam is your chance to make a difference. With this unique initiative, we collectively inspire residents, businesses, schools, and local communities to take action for a more sustainable future.

In May 2024, the very first National Climate Exam was organized in the Netherlands. Given the many positive responses and the fact that climate change is not yet solved, we will be organizing the exam in at least 100 locations in 2025. And you can play an important role in this!

### Who is the Climate Exam for?

The Climate Exam is for everyone who wants to raise awareness and take action on climate change.

Municipalities can inspire their residents, businesses have the opportunity to motivate employees and partners, and schools can engage students, parents, and teachers in sustainability in a fun way. Together, we make an impact!

### What is the Climate Exam?

The Climate Exam is an accessible, educational, and fun way to increase awareness of climate change. Darel Education, in collaboration with the KNMI and Utrecht University, develops the Climate Exam. The exam is available in two versions: one for young people and one for adults. After the exam, the answers will be published online, allowing you to review your results. In this way, the Climate Exam tests your awareness and enriches your knowledge!

60 minutes

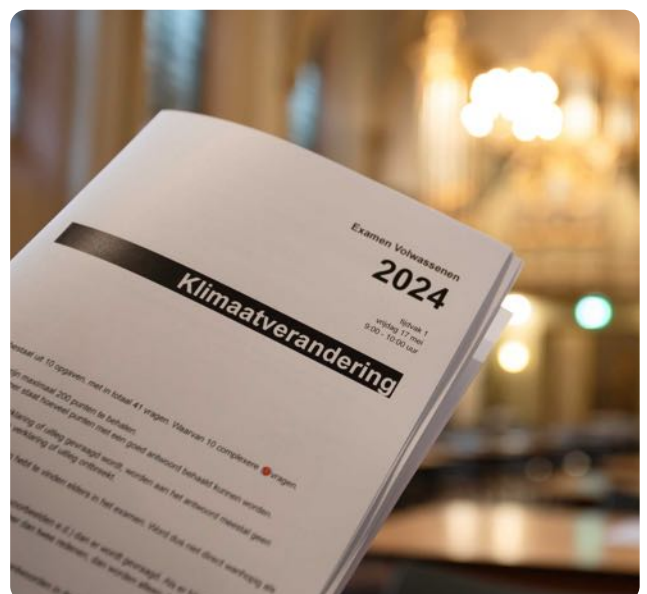

15-30 May

Young & Old

### What is the Climate Exam about?

The Climate Exam covers the causes and consequences of climate change. But of course, it also includes solutions such as the energy transition, the circular economy, and aspects where you can personally contribute.

# Organize the Climate Exam!

How great that you're interested in organizing the Climate Exam in your municipality or company! To organize the exam, you need to set a date and invite local residents, colleagues, or other interested participants to join.

We take care of general communication, a dedicated spot on the website, and participant registration. In May, you will receive the Climate Exam, which you will need to print. Participation is completely free!

## How to Organize the Climate Exam?

## Why Organize the Climate Exam?

First and foremost, it's fun and educational. Climate change is a pressing issue that affects us all. By organizing the Climate Exam, your municipality, company, or organization demonstrates its commitment to this important topic and encourages collaboration within the local community.

It's also a great opportunity to invite local figures, council members, or other stakeholders to participate. Of course, the exam also highlights solutions, ensuring that all participants leave feeling inspired and motivated!

## What past Climate Exam participants say:

"The Climate Exam confronts you with the facts! Just as challenging as in high school, but this time, the success rate for solving the climate crisis depends on global action."

Niels Kastelein

Director of Climate

Ministry of Climate and Green Growth

"Although I thought I was well-informed because I follow the news and am concerned about the climate, taking the exam made me realize that there were many things I didn't know or hadn't fully understood. It was both confronting and a valuable wake-up call."

Roel van Velzen

Famous Dutch Artist

"The Climate Exam in Utrecht was a fantastic experience! It was great to see people of all ages coming together to reflect on the climate, from young to old. The Academy Building at Domplein is also a beautiful and inspiring location to take this exam. I'll definitely participate again next year!"

Berend de Haas

Co-Founder Carboneers
